PRICE FIVE CENTS

OLD QUEBEC SEMINARY IS RUINED BY FIRE

Three Hundred Students in Building Leave in Orderly Fashion
Flames Wreck Stately Land Mark of St. Hyacinthe Erected in 1853

St. Hyacinthe, Que., Oct. 1.—A stately old seminary, erected in 1853, was destroyed by fire this morning here. Three hundred students in residence at the institute were able to leave the building safely, though it is feared many valuable documents and records were destroyed. A newer section of the seminary and several factories nearby were saved by a favorable wind and the fire was done by the local fire brigade, augmented by volunteers from among the citizens.

STARTED IN DORMITORY
The fire is believed to have started in one of the dormitories. It spread with great rapidity and soon consumed the dormitories.

The local fire brigade sent out an SOS call for assistance to Montreal. A volunteer force recruited from among willing citizens assisted the local fighters.

The seminary, which was opened in 1853, consisted of an old wing and a new block which was constructed two years ago.

The building accommodated 300 to 400 students.

The fire broke out in an old part of the building which was soon destroyed. The flames spread to the newer part of the building which was in grave danger in a short time.

CITY LANDMARK
St. Hyacinthe is thirty-five miles southeast of Montreal.

The seminary, an imposing four-story building, built in the old style of rough stone, and surrounded by a dome, was one of the landmarks of the city.

Fortunately at the time the fire broke out all the students and the staff had risen and they walked out of the burning building in orderly fashion.

ALLEGED INDIAN SLAYERS JAILED AWAITING TRIAL

Under Guard on Ss. Princess Mary, Three Accused Here From Tofino

Edward Joe, Jacob George and Senen David, the three Indians charged with the killing of Edward A. Leach at Tofino, on or about the night of August 29, and now committed for trial, passed through this city yesterday after having been brought south on board the C.P.R. steamer Princess Mary under Provincial Police escort.

They are now in Oakalla awaiting the opening of the Nanaimo assizes where they will go before a higher court.

Inspector T. W. S. Parsons, who handled the prosecution's case against the three accused, returned to this city about the same time on which the prisoners were being transported on their way to the penitentiary. Inspector Parsons gave out a brief report on the proceedings at Tofino where the three alleged slayers faced Magistrate E. A. Parsons for their preliminary murder hearing.

MOST OF WITNESSES
The case ran smoothly, said Inspector Parsons. There were twenty-four witnesses called for the Crown and after the case for the prosecution had been closed, Victor Harrison, appearing as counsel for the three accused and traveling from Nanaimo to handle the case, reserved all evidence for the defense. The accused were not on the witness stand in consequence.

The Nanaimo Assize Court opens on October 17, but the case of the Indians will probably be one of the last on the list.

The alleged slayers were arrested on September 8 by Inspector Parsons and Constable H. N. Wood on the Opiashan reservation. Following the beginning of the preliminary hearing two of the prisoners were taken to Nanaimo for safe-keeping and the third was left in Alberni. They are all together at Oakalla.

The Indians have made no statement. Their counsel has entered their plea of not guilty.

Vancouver Doctor Finds Brother Dead From Gas Fumes

Vancouver, Oct. 1.—Apparently overcome by fumes from a gas jet which was turned on, it is thought by accident, the dead body of William Conklin, forty-six, was found in a room at 9 Hastings Street East, on Friday afternoon. The discovery was made by his brother, Dr. J. S. Conklin, who, on going to his office, noticed a strong smell of illuminating gas, and on entering an adjoining room found his brother lifeless.

The police were notified and the body removed to the morgue, but it is thought unlikely that an inquest will be necessary.

ASKS WATER BOARD TO INTERVENE IN POWER RATE FIGHT

Grand Forks Application Raises Important Question of Provincial Jurisdiction
Water Board Virtually a Public Utilities Commission, Solicitor Asserts

Scope of the Provincial Water Board in adjudicating disputes between municipalities and public utilities companies over electric power rates has been brought into question by the recent application of Grand Forks to the board to intervene in its dispute with the West Kootenay Power and Light Company over electric current rates. Up to the present the board has handled only water disputes, but Grand Forks claims that its powers extend to power as well.

No announcement has been made on the board's attitude to this request.

BIG QUESTION RAISED
The Grand Forks application, filed by F. A. McDermid, acting as solicitor for the city, raises important questions of interest to municipalities all over the Province. If Mr. McDermid's contention is correct, the Water Board is virtually a public utilities commission to which municipalities could appeal in all cases of dispute with power companies. Grand Forks has indicated that if the board declines to act as an authority on power rates, it will take legal steps to determine whether its application can thus be refused or not.

FIRE BREAKS OUT IN CHINESE SCHOOL

Missionaries Believe Blaze in Foo Chow of Incendiary Origin

Foo Chow, China, Oct. 1.—The boys' dormitory at Foo Chow College, the middle school of the Congregational mission institution here was burned yesterday. Missionaries declare there is the strongest evidence that the blaze was of incendiary origin.

The fire comes as the climax of a three months' campaign against the mission schools, seeking its abolition, and follows the inauguration here of a new government school. In this campaign teachers have been threatened with bodily harm unless they resigned. Appeals to the Chinese authorities were ignored.

GLOBE AVIATORS AT LOS ANGELES

Los Angeles, Oct. 1.—The globe-trotting duo of the air, William S. Brock and Edward F. Schlee, brought their triumphal tour to a close here at Earl Field at 12:24 p.m. here yesterday on their flight to Detroit from San Francisco.

The flyers, who covered by air more than half the globe in an attempt to break the around-the-world record of some twenty-eight days, only to abandon flight at Tokyo, left early today for El Paso, Texas. They will remain there a day, hopping off then for Dallas, Texas, thence to St. Louis and Detroit. They expect to arrive in Detroit at about 3 o'clock next Tuesday afternoon in time for a civic reception in their honor.

CANADIAN SENATOR PASSES SUDDENLY

Hon. Robert A. Mulholland, 67, Dies While on Visit to Old Country

Toronto, Oct. 1.—Hon. Robert A. Mulholland of Port Hope, Ont., member of the Senate of Canada, died suddenly in London, Eng., this morning following an attack of angina, according to a cable received here. Senator Mulholland was visiting the Old Country with Mrs. Mulholland and Mr. and Mrs. Angus MacMurchy of Toronto. The Senator was sixty-seven years of age.

Senator Mulholland left for England with his party about two months ago. The news of his sudden death came as a great shock to his friends here. Also surviving are two sons, H. C. of this city, and Arthur R., who is in California. W. A. Critch of this city, is a brother-in-law, and Mrs. Angus MacMurchy, a sister-in-law.

The Senator was born at Alderville, Ont., in 1860. He became a merchant and financier in Port Hope, where he was mayor for five years. A Conservative in politics, he was called to the Senate in 1918 during the tenure of the coalition government. He was a Presbyterian.

FOURTH VACANCY
Ottawa, Oct. 1.—A member of the Senate for nearly ten years, the death of Senator Robert A. Mulholland removes a figure well known in the capital. His death creates the fourth vacancy in the Senate. There are now two vacancies in the Quebec representation and two in that from Ontario.

Senator Mulholland, who was a Conservative, entered the Senate in 1918.

HINDENBURG, HERO OF GERMANY, ON HIS EIGHTIETH BIRTHDAY

Berlin, Oct. 1.—No birthday table that great traditional feature in German home life on which birthday gifts are displayed, was ever made big enough to hold all the tokens of nationwide affection which have been showered on President von Hindenburg for his eightieth birthday Sunday. Despite his request, intended to stop such offerings, thousands have insisted on making personal presents to him.

Pictures of the president and busts and plaques are in shop windows everywhere. Recently friends marveled at the robustness of the old warrior, saying: "I wonder that your nerves do not give way under the strain."

"When I feel nervous I whistle," the president replied. "But I have never known you to whistle," the astonished friend said. "Nor have I," said von Hindenburg dryly.

Berlin, Oct. 1.—The reserves of beer for the festivities in connection with President von Hindenburg's birthday are likely to be endangered since approximately 6,000 brewery hands went out on strike to-day.

STRATHCONA HOTEL TO BE REMODELLED

General Contract is Awarded to Luney Bros. For Renovations

Remodelling and renovating on an extensive programme to be carried out by the owners of the six-story Strathcona Hotel will get under way shortly. The general contract has been awarded to Luney Bros., with the plumbing and electrical contracts to be awarded Monday. The renovations will cost in the neighborhood of \$90,000, and will add a number of improvements to the popular hotel.

The plans, prepared by Ralph Bertrich, architect, provide for the remodelling of the bedrooms to incorporate the latest ideas on that class of accommodation, and the installation of twenty new bathrooms. To be fitted with tile floors and the plumbing and electrical work to be finished in a few weeks' time.

Tenders for the new wing at St. Joseph's Hospital, one of the largest individual undertakings of the year and estimated to cost about \$300,000, have been asked for by the hospital management, through C. Elwood Watkins, the designer of the remodelled plans, and will be received up to 4 p.m. on Wednesday, October 12. Work on the new wing will start on the old section of the hospital to make the best use of space laid open through the new wing added at the end of the old building.

These and other contracts pending for the Fall building programme will push city building permits close to the million mark before December. It is anticipated, in the record building year of the city's post-war growth. The value of work commenced, and in varying stages of completion is placed at \$1,039,112, or \$500,000 over and above building totals at this time last year.

BIRTHDAY GREETING FROM DEAD FATHER

Son of New Jersey Veteran Receives Letter Every Year

Vineyard, N.J., Oct. 1.—Yesterday was "Dick" Stevenson's seventh birthday, but that fact is incidental. The big thing is that a letter came for him.

This is the second letter Dick has received on his birthday. They come from his father, who he won't see again in this life. Dick's father, John Stevenson, died a year ago last Easter. He was a lawyer, a thorough record and war veteran. He died from the effects of being gassed.

The father's private papers were found an envelope "To be opened after his death."

It was addressed to "Dearest Boy of Mine."

"Each year, until you are big, you will get a letter from your daddy on your birthday, and then you will get your last letter when you are married."

The home of the Stevensons was closed today. The mother and her mother, who shuns publicity, went away for the week-end.

Neither the boy nor his mother knows who made the letters. They bear a local postmark. Mrs. Stevenson did not make public last year's letter nor the one received yesterday. They are too sacred, she is said to have told callers.

Dominion Steel to Carry Appeal to the Privy Council

Senator Ponnart Dead in France

Halifax, Oct. 1.—The Supreme Court of Nova Scotia to-day divided equally on the appeal of the Dominion Steel Corporation from the decision of Mr. Justice Chisholm ordering the winding-up of the corporation. The appeal is, therefore, dismissed without costs. Counsel for the corporation immediately asked leave to appeal to the Privy Council.

Paris, Oct. 1.—Senator Celestin Ponnart, first French Ambassador to the Vatican after the resumption of diplomatic relations with the Holy See in 1921, died yesterday.

Senator Ponnart was the former Minister of Foreign Affairs.

SOOKE HARBOR CHOSEN IS SITE OF COUNTRY CLUB

Former Bible Students Property to Become Exclusive Outing Resort

Sooke Harbor, Oct. 1.—Inauguration of a big country club, scattered over thirty acres of land, based on the southernmost part of Vancouver Island and looking across the Straits to the Olympic Mountains, was announced to-day by a Victoria syndicate headed by R. H. Allen, of the financial arm of Brown Brothers & Allen, R. Stuart Yates and H. Norman Flynn.

The country club is to take over the property formerly occupied by Bible Students and the twenty buildings on that property, including the large two-story community hall and dining-rooms.

A price of \$10,000 is being paid for the property by Mr. Allen, Mr. Yates and Mr. Flynn. The clearing-road work and other improvements made on the thirty acres cost the Bible Students four times that sum. It was explained. The waterfront of the club will run along the west side of Sooke Harbor.

Membership in the club will be limited and exclusive. The grounds are to be laid out with golf course and tennis courts, while boat houses will be constructed for the yachtsmen. Mr. Allen is looking after the financial arrangements, Mr. Yates after the legal end, while the general appointments and regulations regarding membership and conduct of members are being placed under Mr. Flynn, who is familiar with country club activities along the Coast as a result of his Chamber of Commerce connection.

"The lay of the land and buildings are such that they will make an admirable setting for a country club," Mr. Flynn said. "The scenic beauty of Sooke Harbor, the excellent road to Sooke and the short distance from Victoria, coupled with the imminent development of the West Coast of Vancouver Island, are factors which have determined influential Victoria men to give their backing to the country club."

"The grounds will be laid out and buildings remodelled under the supervision of a landscape gardener and an architect."

RAINFALL TO DATE LOWER THAN USUAL

Only 11.75 Inches Here From January to September; 3.75 Below Average.

Unless the remaining three months bring an unusually heavy rainfall, 1927 will be a year of drought in the west to Victoria. According to Superintendent Denison of Gonzales Heights Meteorological Observatory, the total precipitation from January 1 to September 30 was only 11.75 inches, or 3.75 inches below the average for that period. The rainfall in September was 1.85 inches, or 3.35 inches above average.

With more rain than usual and consequently cloudy skies, Victoria's sunshine for the month totaled 174 hours 48 minutes, or 44 hours below the average for September. But in spite of the lessened sunshine the temperature was higher, the mean temperature for the month being 57 degrees, instead of the usual 56 degrees, with the highest temperature 78 on September 19, and the lowest 47 on September 6.

CAPTAIN JACK VON WEIGAND

German war ace, who claims to have led the flying squadron which shot down Quentin Roosevelt, photographed in Washington en route to the west coast to prepare for a trans-Pacific flight. Told is the objective of his ambitious venture.

RUTH ELDER AGAIN HALTS ATLANTIC HOP

Roosevelt Field, N.Y., Oct. 1.—Another postponement of the start of their proposed non-stop flight to Paris was decided upon to-day by Ruth Elder, Lakeland, Fla., aviator, and George Halstead, her co-pilot and navigator, after they had completed their monoplane, American Girl, for a take-off about 2 p.m. to-day.

Miss Elder said that adverse weather conditions on the Atlantic where storms have been raging for several days, caused the postponement.

LOST MOUNTAIN GOAT FOUND ON ISLAND RESERVE

New Game Family, Missing For Years, Finally Established at Cowichan Lake

Specimens Brought Here By Game Board Expected to Multiply Rapidly

Mountain goats have definitely established themselves on Vancouver Island after game experts had given up all hope of making them live here. B. Jackson, E.C., chairman of the Game Conservation Board, announced to-day.

Mr. Jackson's announcement, which will be hailed with delight by island sportsmen and lovers of wild life, was made after he had received news from Game Warden Simpson, of Cowichan Lake, who sighted goat in the Shaw Creek game reserve this week. These animals were placed in the reserve under Mr. Jackson's directions three years ago, but since that time all trace of them has been lost. Game officials had given them up for dead, thinking that the climate of the island did not suit them.

While traveling in the wilds of the reserve near the head of Cowichan Lake Mr. Simpson saw the creature on a high mountain peak, clearly visible with binoculars. He estimated that there were twelve animals in the band. JACKSON DELIGHTED

"This is the best news that the Game Board has heard in many years since they were left there three years ago. A couple of years ago a game warden saw what he took to be the track of a goat but he could not be certain. Since then we have been on the lookout for more tracks and game warden in that district have carried plaster of Paris so that they could make a cast of any new tracks discovered. None has been seen, however, and we had given up all hope when Mr. Simpson discovered the animals this week."

"It is evident from this that the island suits mountain goat and that they will flourish and increase here. Our experiment may be considered a large number of course, they will be rigorously protected. Now that they are definitely established and become one of the most interesting branches of wild life on the island."

ONE MINER DEAD ONE INJURED IN FERNIE EXPLOSION

Fernie, Oct. 1.—One man was killed and one seriously injured this morning in an explosion in No. 6 mine of the Corbin Coal Limited.

The explosion occurred on the Eastern British Columbia Railway about forty-five miles northeast of here. Intimation of the disaster was only flashed here to the Government Mine Rescue Station shortly after noon and particulars whether there has been greater loss of life and damage to property can not be learned. Later mine inspectors Strachan and McDonald proceeded from here to Corbin and returned here at 4 p.m. under the direction of J. Puckey of Fernie government station are in readiness to respond to call for assistance in case of a disaster. Bailcliffe, fire boss, well-known here.

BRITISH COMMUNIST MEMBERSHIP DROPS

Nearly Three Thousand Less Than Year Ago, Annual Report Shows

London, Oct. 1.—(Canadian Press Cable).—The National Labor Party has decided to end the affiliation of nineteen trades and labor councils, and labor parties with the national body because of their recent decision to expel communists from their ranks, but the latter have asked the National Labor Party for a truce in order to present a united front in the next general election. In the meantime they propose to take a referendum on their decision to expel the communists and not to take definite action thereon pending the referendum.

It is noteworthy that the annual report of the British Communist Party, published two days ago, showed that the membership was 7,377 against 10,800 a year ago.

RUTH ELDER AGAIN HALTS ATLANTIC HOP

Roosevelt Field, N.Y., Oct. 1.—Another postponement of the start of their proposed non-stop flight to Paris was decided upon to-day by Ruth Elder, Lakeland, Fla., aviator, and George Halstead, her co-pilot and navigator, after they had completed their monoplane, American Girl, for a take-off about 2 p.m. to-day.

Miss Elder said that adverse weather conditions on the Atlantic where storms have been raging for several days, caused the postponement.

ON WAY TO CANADA

RT. HON. REGINALD MCKENNA

who sailed from Southampton to-day aboard the Empress of France, bound for Montreal and Toronto. He will address the Canadian Club of Montreal.

LONDON BANK HEAD COMING TO CANADA

Rt. Hon. Reginald McKenna, Also Director of C.P.R., Crossing Atlantic

Southampton, Oct. 1.—Right Hon. Reginald McKenna, former Chancellor of the British Exchequer and now chairman of the London Joint City and Midland Bank, sailed on board Canadian Pacific steamer Empress of France from here to-day and is due to arrive at Quebec next Friday or Saturday.

Mr. McKenna is also a director of the Canadian Pacific Railway and this is his first visit to Canada since his election to that position. On Monday, October 10, he is scheduled to address the Canadian Club in Montreal and will later visit Toronto. He has filled many positions under the British Government, including that of Financial Secretary of the Treasury, President of the Board of Education, First Lord of the Admiralty, and Home Secretary. His university days at Cambridge. Mr. McKenna was a prominent carman.

The Empress of France will also bring to Canada Edward Robert Peacock, recently appointed a director of the Canadian Pacific Railway.

Mr. Peacock, who will be accompanied by his wife and who will cross the Dominion to the Pacific Coast, is one of England's leading financiers, being a former governor of the Bank of England.

He was born in Glangary County, Ontario, and until 1902 was a lecturer at Upper Canada College. Entering the business he went to England and was rapidly advanced. In 1921 he was appointed a director of Baring, Bros. & Company.

Calling upon members of his organization to respond to the Red Cross appeal, President Bixby said St. Louis would meet the emergency without outside help.

The gauge of workers under the building commissioner started to work this morning, tearing down and clearing away dangerous parts of the damaged buildings. The work is expected to be completed by the end of the week. The storm had splintered poles, snapped standards and shattered street lights. They were prepared to shoot at marauders, but evidently none was seen.

REDS STAGE FIGHT AT SMUT'S MEETING

Three Hundred Fight With Chair Clubs and Bottles in South Africa

Bloemhof, Transvaal, Oct. 1.—Fighting with chairs, clubs and bottles, three hundred Red Cross demonstrators at a meeting here last night and evening General J. C. Smuts, former premier of the South African Union, presided at a scheduled speech. Union Jacks used in decorating the hall were torn into shreds. The nationalists chased members of Smuts's South African Party from the hall and free fights continued outside. There were numerous cracked heads, bleeding faces and other injuries.

After General Smuts's supporters had been routed, the nationalists indulged in singing and dancing on the platform.

At a banquet later in the evening, General Smuts said:

"In the whole course of my life I have never seen anything so shocking. The country is rapidly becoming a little Russia—but we won't submit to it."

KIDNAPPINGS, DEATHS AND FLOGGINGS IN ALABAMA REVEALED

Birmingham, Ala., Oct. 1.—A series of floggings, kidnappings and deaths described by Attorney-General Charles C. McCall as a "reign of terror" in Crenshaw County, Ala., was revealed last night in a statement to the press. The mask and hood was employed in 90 per cent of the cases, he said.

Twenty floggings and kidnappings, several of which resulted in death, have been revealed in a partially completed investigation, said Mr. McCall. More than 150 persons are involved.

CHURCHES LOSE \$1,000,000

Churches of all denominations suffered. Twelve of them were enumerated by Dr. A. H. Armstrong, secretary of the St. Louis Church Federation, in estimating their total loss, \$1,000,000.

SPEED TOLL ROADS FOR EUROPE PLANNED

Philadelphia, Oct. 1.—Special express highways, privately built and operated, may direct tourists with speed and comfort to the principal cities of Europe.

Some such private highways, on which tolls are exacted, are already operating in Germany and Italy, and more are contemplated in these countries. Switzerland, Spain and France, reports Automobile Industries, in a recent issue.

The report is based on a plan proposed by M. Kerm-Marsand, French highway engineer, for the construction of a special auto road between Paris and Trouville on the north coast of France. This road, built by private capital at a cost of about \$37,000,000, and operated under the toll system, would bring tourists landing at Havre, Cherbourg or any of the other French ports nearby direct to Paris by their own automobiles.

The plan is similar to those of other engineers in Germany, Italy, Spain and Switzerland, by which the proposed auto highways would be operated like toll roads, along similar right-of-way.

They would be wide, of concrete or macadam construction, would be lighted and marked by a fence or rail along the middle to separate traffic going and coming, and would be free from railroad or public highway crossings.

Viaducts would lead them over railroad tracks, and ramps would connect them with the Government roads.

According to Automobile Industries, Italy was first to construct such private toll highways called autostrade after the name of the company operating them. These connect Milan with Lakes Maggiore, Como and Varese.

The owners contemplate their extension to Venice and another line down the west coast of Italy, to Genoa, Florence, Rome, Naples and eventually to Reggio at the tip of the boot.

GENERAL EUROPE LINKED
Germany has an express highway, under private control, between Berlin and Charlottenburg, and is contemplating a network of such roads connecting the main cities of the country and linking in with the private roads

On Thursday afternoon there was a meeting of the committee arranging for the Harvest Home Supper to be held on October 11. There was a full attendance and the canvassers reported a most excellent response to their appeals. A gift towards the supper, chickens, home cooking, and cash donations. Mrs. A. D. Ellwood had generously proffered to devote the whole of the afternoon of the day to collecting the donations and the rest of the committee will meet at the hall to prepare tables and have everything in readiness for the supper.

Mrs. Thomas Bell of Oak Bay is the guest of Mr. and Mrs. A. D. Ellwood.

Twenty-cent Theft Brings Life Term
New York, Oct. 1.—For the rest of his life Thomas McCarthy, forty-seven, must occupy a cell in Sing Sing prison because he stole 20 cents. He received that sentence under the Baumes Law as a fourth offender after a jury had found him guilty of a burglary in Queens, which netted him two times from the hope chest of Miss Lydia Mohr.

Five C's Dance—The Five C's Football Club will hold a winter dance and dance at the S.O.E. Hall, Broad Street, on Wednesday, October 5. There will be good prizes for cards and a good orchestra.

SUTTON EXPLAINS PLANS FOR PEACE RIVER RAIL PLAN

Wants no Financial Assistance But Asks Northern Field to Himself

Will Go to England to Raise Capital For P.G.E. Extension Northwest

Plans for the construction of a railway into the Peace River country to make the P.G.E. line tributary to the northern hinterland, were laid before Hon. A. M. Manson, Attorney-General and a director of the Government-owned road, at a meeting in the Parliament Buildings this morning, by General F. A. Sutton, formerly of China and now a resident of Vancouver.

General Sutton proposed to enlist British capital in this scheme and finance it privately. He stated that he asked the Government only to assure him that if he started work on a new railway he would be allowed to have the field to himself. If he were successful in his plans, he explained, he did not wish the Government to sell the P.G.E. to other interests.

SEEKS BRITISH MONEY
General Sutton was introduced to Mr. Manson by J. M. Bryan, M.P.P. for North Vancouver, and was accompanied by Noel Humphries, Vancouver consulting engineer, who is now associated with him.

Manson that he is confident of securing capital for his venture in England. Before going to London to arrange for financing the scheme, however, he will make a careful study of the whole railway situation in the Province and the possibilities of the Peace River country. He will leave Monday for a tour of the P.G.E. accompanied by Mr. Bryan. From Prince George he will travel by pack train and come into the heart of the Peace River area and eastward to Edmonton, where he will confer with the Alberta Government and address a public meeting.

TO FIGHT NORTH
Returning to Vancouver October 17, he will start flights into the Peace River country by aeroplane with a base at Barkerville in an effort to locate a satisfactory route for a railway. Later he will go to England to enlist the support of British capital.

Mr. Manson will explain General Sutton's representations to his colleagues. The General was a noted figure in China before coming to British Columbia. He was regarded as the right-hand man of Chan Tso Lin, Manchurian war lord, and is reputed to have made an enormous fortune in the course of his adventurous career in the Orient.

MOTOR ACCIDENTS

To the Editor:—In a recent issue of our daily papers we are informed that the fatalities from motor accidents are decidedly on the increase throughout the Dominion of Canada, and at the same time we are given the startling information that British Columbia leads all other provinces in this most serious menace.

This being the case one would think that it devolves upon us to take the initiative in forming some policy of protection for motorists on the highways of this Province, and on the streets of our cities wherever such protection might be necessary.

The automobile is a very dangerous weapon when placed in the hands of all and sundry, to do with as they see fit, and when one considers the mental make-up of humanity as a whole, then in allowing for the use of the automobile, measures should surely be taken to protect the motorist against themselves as well as for themselves, and more so the public at large.

In my opinion one of the best plans would be to remind drivers constantly of the possibility of danger night and day, when approaching dangerous points.

Attempts to do this have been made by various automobile clubs by the erection of thousands of painted warning signs, but if as we are told accidents are on the increase, it is surely evident that the method employed has not been very effective.

As an automobile driver, I am not (and I think most drivers would agree) attracted or impressed quickly enough by the common painted signs in use on our roads.

You, Mr. Editor, drew attention in the columns of your paper two or three years ago, to the corner of Linden Avenue and Fairfield Road in this city, where some very serious accidents had occurred, and you suggested the use of some type of red reflector, yet it is noteworthy that no serious accidents have occurred at this point since that device has been used.

A few (very few) of these reflectors are to be seen at various points throughout the Province, and it would be interesting if one could check up on

the number of accidents which have occurred at points where these reflectors are used, and compare them with the number of accidents which have occurred at points where they are not used.

As an average of \$60.75 was enough to feed a horse last year, if eighty-two animals on twenty Putnam county farms are typical of the state.

Lower prices of corn, oats and hay are said to be responsible.

IT COSTS LESS TO FEED A HORSE
Columbus, O., Oct. 1.—Despite the increased cost of living, the board bill for a horse on an Ohio farm was less last year than in any of the last ten years, economists of the Ohio Agricultural Experiment Station here report.

SCHOOL TRUSTEES PLAN CONVENTION

The British Columbia School Trustees' Association will participate in an enlarged programme of education and entertainment sponsored by the U.S. Department of Agriculture.

The programme begins on October 3 and will continue almost daily through April 30 of next year. Eleven distinct features will be presented and twelve scientific bureaus of the government will contribute their services in presenting authentic information to the millions of fans expected to listen in.

This year, not only farmers' but city people will become listeners to this great national broadcast.

KRUSCHEN VERSUS INDIGESTION

For pity's sake—and your friends—don't mope around fluttering harsh words about your stomach. Probably you've been eating things you shouldn't—or haven't been exercising enough.

In any case, Kruschen's SIX salts will soon fix you up, ridding you of poisons, soothing your digestive tract, purifying your blood and bringing back the old enthusiasm for life.

One salt could never do what Kruschen's SIX do. So, tomorrow morning, begin taking the little "daily dimful", tasteless in your coffee or tea. Get that good old "Kruschen feeling".

ABSOLUTE PURITY

The proprietors of Kruschen Salts guarantee its absolute purity. Each ingredient attains a standard of purity far exceeding that demanded by the British Pharmacopoeia.

Kruschen Salts

PREVENT CONSTIPATION AND RHEUMATISM.

SOLE IMPORTERS: MCGILLIVRAY BROS., LIMITED, TORONTO, ONT.

WHAT KRUSCHEN IS NOT ONE SALT ONLY—but six!

SODIUM SULPHATE
Very valuable medicinal salt. Aperient. Diuretic. Purifies the blood. Prevents absorption of toxins.

SODIUM CHLORIDE
Medicine and food. Improves digestion. Maintains alkalinity of the blood serum. Antiseptic. Prevents fermentation.

MAGNESIUM SULPHATE
A most valuable salt in medicine. Brings back the appetite. Useful in all gastric conditions. Excellent remedy for Dropsy and Gravel.

POTASSIUM IODIDE
Affects favourably every organ and tissue. Fortifies body and mind. Maintains normal function in drinking water, table salt, etc.

POTASSIUM CHLORIDE
Of great benefit in cases of high blood pressure. Valuable for Gout and Rheumatism.

POTASSIUM SULPHATE
Similar saline action to Sodium Sulphate. Dissolves Uric Acid.

MINISTERS TOUCH ON HUDSON BAY LINE

Change of Port Removes Handicap to Successful Development, Says Dunning

Saskatoon, Oct. 1.—Hon. J. A. Robb, Minister of Finance, speaking here last night, said he was all for the Hudson Bay Railway and declared that if there was anyone in Canada to-day who wanted to see the railway through it was Charles Dunning. He declared that the National Debt had been reduced \$104,000,000, and the annual interest on the National Debt was reduced by \$9,000,000. He went into detail regarding "a considerable reduction in taxes which had been made, and every reduction made had given new courage to industry."

Quoting a rumor that Canada would have to go to New York to borrow for October maturities, he said: "We have the money to meet them."

The greatest possible handicap to the successful development of the Hudson Bay Railway route was removed in the change of the port on the Bay from Port Nelson to Fort Churchill, declared Hon. Charles Dunning, Minister of Railways, here to-day, when addressing 2,500 people.

TO DEVELOP HARBOR
The decision to make the change had only been made after all necessary engineering data had been received, he said. The work of completing the route will be carried out at the earliest possible moment, the speaker assured the audience. Complete information upon which to base a report had not been available until this year, he said, on looking over the files it could be seen that no borings had been made previously to determine the sub-strata of the two harbors. A considerable amount of other data had not been secured until after Mr. Palmer had been engaged as consulting engineer to go into the whole situation.

There had been too much office engineering and not enough on the actual ground where the work was to be done, the speaker declared. The change that he had influenced the decision of Mr. Palmer, Mr. Dunning emphatically denied. An engineer of the caliber of Mr. Palmer valued his reputation highly, Mr. Dunning replied to the audience.

WIDE EXPERIENCE
Mr. Palmer had been engaged because of his wide experience and his reputation highly, Mr. Dunning replied to the audience.

An indication of the standing of Mr. Palmer in his own profession could be seen in his election to the presidency of the British Engineering Institute, one of the highest offices in the gift of the organization.

"As far as the railway itself is concerned, good progress has been made. When undertaken, only eighteen months ago, there was nothing but 333 miles of rusted rails on rotten ties. Now we have 350 miles of real roadbed, water facilities, engine terminals and can run over it and get on with the job at the other end, he declared. "Not one day has been lost in prosecuting this work," Mr. Dunning added.

Good Description of Would-be Bank Robbers Broadcast

Calgary, Oct. 1.—Five suspects have been rounded up in connection with the attempted robbery of the Hillhurst branch of the Royal Bank. Police have begun a check-up of all strangers in the city and intend to line the suspects at headquarters to-day before the eyewitnesses. Good descriptions of the would-be robbers have been broadcast. All police of Alberta have been pressed into service.

Local detectives do not believe the men have got out of town and all avenues of escape were blocked immediately the report of the bank robbery was received.

SOVIET AMBASSADOR
Paris, Oct. 1.—The French cabinet meeting yesterday at Rambouillet charged Foreign Minister Briand to inform Foreign Minister Tchitcherine of Russia that Christian Rakovsky, Soviet ambassador to France, has ceased to be persona grata. It is asserted here. It is understood that L. Briand is to ask his replacement, making clear that France has no intention of breaking relations with Moscow.

THIEVES BLOW SAFE
Prince Albert, Sask., Oct. 1.—Thieves are reported to have blown open the safe of F. T. Grave's general store at Davis, Saskatchewan, and escaped with \$50. They overtook \$1,000 in another compartment of the safe.

Boy Gets Chance To Kill Big Game
Edmonds, Oct. 1.—George Killer, Eastings Street East, Burnaby, seventeen years of age, shot a black bear cub on the Berrydale Estate, Douglas Road, Thursday. Burnaby police stated a call was sent in by the caretaker of the estate that a bear was in the chicken house. Knowing of Killer's desire to kill big game, police sent word, and the boy arrived promptly with a sporting rifle. At a range of nearly 100 yards he shot the animal cleanly between the eyes. Another bear escaped.

U.S. Boat Searches For Missing Plane
Washington, Oct. 1.—The sending of a naval vessel to Johnson Island, 750 miles northwest of the Hawaiian Islands to renew the search for the Goeben Eagle, one of the planes lost in the Dole San Francisco to Honolulu air derby, was authorized to-day by President Coolidge. A seagoing tug probably will be used.

RAILROAD MEN SCALDED
London, Ont., Oct. 1.—Engineer Edward Anderson and brakeman W. T. Burley were seriously scalded when the boiler on a heavy Mikado type of Canadian National Railway freight engine blew up one mile east of Konoctia yesterday. No cause for the explosion is known.

The force of the explosion derailed the engine and tender and ten cars. The rails were torn up for twenty yards.

Verkhne, Siberia, Oct. 1.—Michael Borodin, former adviser to the Chinese Nationalists, arrived here to-day by aeroplane from Canton en route to Moscow. On the way from the air-drome to the railway station one of the motor cars carrying his escort plunged over an embankment, killing one and injuring several others.

THREE SCENES FROM AN AERIAL DEATH DRAMA—Three scenes in the death drama which marred the New York-Spokane air derby, these! At left, Richard E. Hudson (left) and Jay Radice pose for their pictures at Roosevelt Field, Long Island, before climbing into their trim Alister biplane, seen at the right getting under way as the starter's flag fell. Over Morristown, N.J., a short distance away, a clogged gas line stopped the motor at low altitude and the Alister plunged earthward into woods, killing both men. The wreck is viewed below.

COAST OUTLET FOR PEACE RIVER AREA

Necessary Before Branch Line or Other Development Justified, Says Sutton

General Offers Solution of Alberta and B.C. Railway Problem

Vancouver, Oct. 1.—Branch line construction in the Peace River district, or any other development, is not justified until a coast outlet has been provided, declared General F. A. Sutton, Vancouver financier, in discussing a statement by Hon. C. A. Dunning, Minister of Railways, to the effect that interior construction should be completed before any new ventures were launched.

"One needs only to compare the present haul from Grande Prairie to the Coast via Edmonton, a distance of 1,200 miles, with the direct connection to Vancouver or Prince Rupert via Pine River Pass, the natural outlet, a distance of 700 miles, to be convinced the direct line is the logical solution of the problem," said General Sutton. "Construction of branch lines is not a problem of engineering; it is the obvious and necessary thing to do, following up the natural settlement which takes place after construction of the main line. To build branch lines as feeders to the present Edmonton, Dunvegan Railway, hauling grain eastward to the Great Lakes or to the Coast via Edmonton, would result merely in exaggeration of an already intolerable condition."

"There is but one solution of British Columbia's P.G.E. and Alberta's Edmonton-Dunvegan problems, and that is to complete these two half-finished roads by the obvious route nature has provided through Pine Pass. Extend the P.G.E. easterly to Alberta and the Edmonton, Dunvegan line westerly to British Columbia, link them up, and provide a short haul west to the Pacific Coast at Vancouver and Prince Rupert, and there is no longer any railway problem for either Alberta or British Columbia."

Mount Holly, N.J., Oct. 1.—For selling liquor in order to get clothes "fit to wear to school," Bertha Johnson, eighteen, was sentenced to forty-five days imprisonment.

PLANNING THE HOME GARDEN

By JOHN HUTCHISON, F.R.H.S.

The writer does not propose to go into the matter of formal gardens, Japanese gardens, rocks gardens and so on in this article, because such subjects should, he thinks, be treated in separate articles, but rather to give some general hints as to the laying out of home grounds. These may be useful in this, the best time of the year for all kinds of garden building and planting.

The trouble with most home gardens is not that there is too little planting of trees, shrubs and flowers, but that the planting is meaningless. Every garden should be a picture. That is to say, the area of the garden should be framed and, so to speak, set off from the surrounding area, and it should be so planted that the observer will catch the whole effect and purpose of the planting without having to stop and analyze its various parts. The garden should be one picture, with every feature contributing in some degree to one homogeneous effect.

AVOIDING A JUMBLE

One often sees a garden with bushes and trees scattered promiscuously over the whole area. Such a garden has no purpose, no main idea. Such planting shows at once that the planter has no conception of design and no appreciation of the elements of beauty of landscape. It has only one point in its favor and that is that a number of trees, shrubs and what not have been planted. Every shrub and tree stands alone, unattended and disconnected from its fellows, making a meaningless jumble. Such a garden is only a nursery.

Much better would be a planting with the house as the central idea, with a free and open stretch of lawn in front of it. The same trees and shrubs which were planted haphazard all over the place are gathered together and massed into a frame for the landscape. This style of planting may be used in the smallest area or the largest and will make a picture while the other is only a collection of plants at the best. The one has a restful and pleasing appearance which makes the visitor say: "What a very beautiful home!" The other divides and distracts the attention and the remark is apt to be: "That is a very fine leucanthemum."

FRAMING THE GARDEN

The landscape in a garden is attained by the use of two means—planting and vistas. The planting should be so arranged that it will

frame the views or vistas. Everyone knows that a very ordinary scene will often take on a glorified effect when photographed. It is not the photograph that does this but it is the framing of the picture that is the cause. So it is with the garden. The side plantings are the sides of the frame, the foreground is the bottom and the sky is the top.

In order to accentuate the homeliness of a house everything surrounding it should be, in a measure, subordinate to it. To scatter shrubs and trees over the whole area defeats this, the idea being to make every feature of the grounds lead up, as it were, to the house.

A background must be arranged for the house if it is to be a home. A house standing by itself on the "bald-headed prairie" is a part of the universe but it is in no sense a part of a home.

MASS EFFECT
The greatest landscape gardeners, and there have not been many great landscape gardeners, have all claimed that the greatest artistic value in planting is in the mass effect, and not in the individual plants. Bailey says: "A mass has the greater value because it presents a much greater range and variety of forms, colors, shades and textures, because it has sufficient extent or dimensions to add structural character to a place, and because its features are so continuous and so well blended that the mind is not distracted by incidental and irrelevant ideas."

The reader will have gathered that the idea for the fundamental planting of any home ground will consist of a framework of greenery in various shades and tones and an open greenward without any suggestion of flower beds cut out therefrom.

The selection of the trees and shrubs which are to form the frame of the picture and the background must be left to the individual taste of the planter, but this much may be suggested—a good proportion of the trees and shrubs used should be evergreen so that the winter aspect may be quite as interesting in a quiet way, as the summer outlook.

Plants which carry bright fruits throughout the winter should not be overlooked, such as the Berberis and Cotoneaster, to mention just two.

In the next article the writer will discuss the matter of flowers for the home grounds.

Smartly Styled Fur-trimmed COATS

Specially Priced to Sell Monday

At \$27.50, \$32.50 and \$37.50

Presenting here Monday a very fine showing of new Fur-trimmed Coats that offer values "out of the ordinary." They are all well-tailored garments and come in all the newest colors so much fancied for Fall and Winter.

Vancouver Island News Chemainus

Chemainus, Oct. 1.—For some time past Mr. Williams, a local poultry farmer living on Chemainus River road, has experienced losses in his poultry yard. On Wednesday last he was fortunate in shooting a large black bear which scaled at 200 pounds.

Jerry Monk, after a long illness, is convalescing at Anyox, the guest of his son-in-law and daughter, Mr. and Mrs. Leonard Campbell.

J. C. Adam, chief engineer for the Victoria Lumber and Manufacturing Company, is spending a few days in Victoria.

Mr. and Mrs. Jack Stewart are holidaying in Victoria.

A Great Northern barge in tow of the tug Tepic entered port yesterday for a consignment of lumber. The Tepic left later for Ladysmith with a coal scow.

Duncan

Duncan, Oct. 1.—The senior branch of St. John's W.A. held a very enjoyable book tea on Thursday afternoon at the home of Mrs. E. G. Sanford, Duncan. The rooms were beautifully decorated with a profusion of dahlias kindly donated by Crosland Bros.

A musical programme was much enjoyed, and included songs by Mrs. W. Dobson, Mrs. Howell Paine, Mrs. Wade, violin solos by Miss Meta Seirup and recitations by Mrs. W. de B. Hopkins. Mrs. E. W. Neel kindly acted as accompanist. Tea was served under the direction of Mrs. T. Pitt, Mrs. L. C. Brockway and Mrs. J. Fletcher. Mrs. E. G. Sanford and Mrs. J. Robinson presided at the table. Mrs. Howell Paine won the first

Ladysmith

Ladysmith, Oct. 1.—The Girl Guides of St. John's Church held a successful silver tea and sale of home-cooked and candy Thursday afternoon at the home of Rev. and Mrs. H. Pearson. In the evening a whist drive was held by the Girls' Guild and their friends. A very enjoyable time was spent. The prizes were awarded to: First, Miss Jessie Maxwell and H. Pearson; second, Miss Lillah Anderson and J. Clarkson.

Mrs. Brown has returned to her home in Vancouver after spending the past week here the guest of her parents, Mr. and Mrs. W. Gluck.

Mr. and Mrs. Davis and son accompanied by Mrs. Davis's mother, Mrs. H. Thornly, left Thursday for a round tour of the Sound cities.

WITHOUT ELECTRIC LIGHT

Ottawa, Oct. 1.—Ottawa, Hull and the district immediately surrounding the two cities including several small towns, were without electric lighting or telegraphic communication to the outside world for nearly an hour last night when a generator at the Ottawa Hull power plant burned out.

Decide to Build Now

Home of J. E. Johnson, Esq., Corner Simcoe and South Turner Streets

You've probably been thinking a long time of the day you'd have a nice little home of your own. Why not turn the dream into reality? Why keep putting it off? You are not growing younger and the sooner you start the sooner you'll have the home all paid off.

We have a selection of house plans drawn by the Architects' Institute of B.C., by arrangement, which we would be glad to have you look over. Let's talk it over. Even if you don't decide to build right away, it would pay you to see these plans, so you have the ideas when you do get ready.

Moving in accord with public sentiment to give every service to its large audience, CFCT some months ago changed its wavelength in order not to interfere with other popular stations on a lower wavelength which it had overpowered. The Deaville station was previously operated on a wavelength of 329.5 metres, but owing to requests from the public, this was shifted to 475.9 metres, on which length the station now operates. A high class of service is now being extended, by CFCT, the management of which is at all times endeavoring to still further the development of radio broadcasting. The studio in the B.C. Permanent Loan Building is elaborately equipped and the artists' room and control station are kept in excellent condition.

CFCT EDUCATIONAL TALKS

JOSEPH ROSE, Opt. D.

Well-known optometrist who has been giving a series of radio lectures on "Care of the Eyes."

Mr. Rose is well qualified, being a graduate of Bradley Institute, and has taken post-graduate work in London, England, and at the present time he is chairman of the board of examiners in optometry for British Columbia. He recently returned from an extended visit to Eastern Canada and the United States, studying the latest in optical technique in the treatment and examination of the eyes. Mr. Rose has taken a very deep interest as an optometrist in, advances made in the science of the care of the eyes. He has what he believes to be the only instrument of its kind on the North American continent. This is the invention of Prof. Stocks, and is made in Germany. It is known as the Meddix phorometer. In line with his policy of keeping up-to-date Mr. Rose has added

another modern instrument called the genothalmic kratometer for the treatment of ocular imbalances. Mr. Rose says it is not sufficient that eyes be "tested" by the test lenses and reading charts; modern optical science has provided instruments that measure the strength and action of every eye muscle. Thanks to the invention of the kratometer and the development of a technique, the entire aspect of ocular muscle work has changed. Knowing the governing principle, it is now with few exceptions a relatively simple matter to uncover and remove the cause of muscular imbalances and to achieve comfortable binocular balance. The only instrument that enables us to do this work is the genothalmic kratometer.

Mr. Rose is pleased if through the medium of his radio talks on "the care of the eyes" he is making the public eye conscious.

STEVENSON DRAMATIC SOCIETY

Howard S. Stevenson, author and director of Stevenson's Dramatic Society, has written some forty-two plays in the last two years and has received more letters from satisfied listeners than any other individual broadcaster on the Pacific Coast. Plays are unusual over the air, but they fill a long felt want, as radio fans have proven by the many letters of appreciation received by Mr. Stevenson. Some of these letters have been of a personal nature expressing the enjoyment of people confined to the house, through illness or other causes.

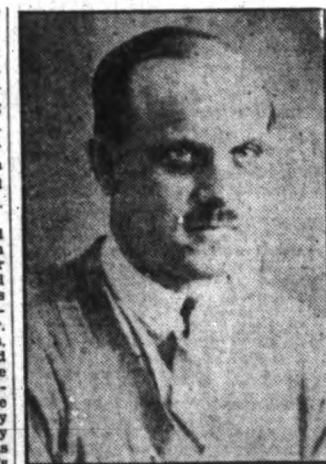

These little plays go on the air the first and third Wednesdays of every month, starting October 3, at 8 p.m. Notice of these plays appear in the local papers.

It has been the aim and object of Mr. Stevenson to make the plays educational and instructive and to hold the attention of the radio audiences. He has had numerous people walk into his stores at 1118 Douglas Street, or 725 Yates Street, introduce themselves and say "We are from Calgary," (or some other city), "and we just wanted to thank the management for the splendid entertainment over the air from CFCT."

This has been so gratifying to Mr.

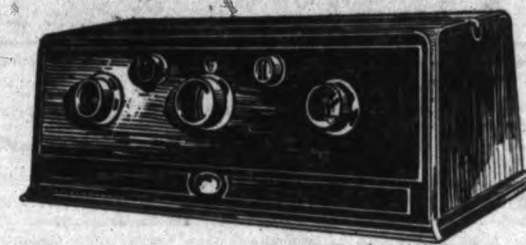

Stevenson that he has, at considerable trouble and expense, written a new series of plays which he intends broadcasting. He also has added new artists. As already stated The Stevenson Dramatic Society will start broadcasting next Wednesday night at 8 o'clock. They are producing a serial play entitled, "Richard Granton of Granton Lodge." This play in four series will finish November 16. It is one of Mr. Stevenson's best efforts.

Mr. Norval Peterson has been secured as the announcer for the Stevenson Dramatic Society. "Norval" is popular at announcing, he also holds a lead part with the following artists: Miss Lily Roseboom, Miss Gladys MacLachlan, Miss Helen Parkinson, Mr. Hubert Detharby, Mr. Harold Groves, Mr. J. Miller, Mr. Reginald Owen and Howard S. Stevenson, director. The above artists are well-known and talented, some having stage experience that has proven their dramatic ability and made popular the dramatic society and the home of "Hoe-Maid" delicious Victoria chocolates, also Stevenson's Tea-rooms and Ice Cream Parlor. Many of the radio fans visiting one or other of the Stevenson Stores which cater to afternoon teas, lunch and theatre parties.

NORVAL PETERSON

It has always been the aim of Mr. Stevenson to give only the best in radio or business.

Illustrated Talk On Queen Victoria

"The Golden Age of Queen Victoria" will be the subject of an illustrated talk on Friday, October 7 at Alexandra House by Miss Lila Van Kirk, who will be remembered in Victoria through those given upon Italy in the Spring.

Miss Van Kirk feels that while the great Victorian Age has been much written about, little or nothing has been shown, so that in her illustrated talk on Friday upon "The Golden Age of Queen Victoria," she will show interesting scenes from the personal life of the queen, great characters and events of the period, as well as lovely paintings from the galleries of London.

It is an appropriate subject for this jubilee year, especially in a city named to commemorate the most glorious of all English reigns.

St. Alban's Social—The Ladies' Guild of St. Alban's Church will hold another of their popular card parties in the church hall on Wednesday evening, October 5, at 8 o'clock.

St. Mark's Social—A progressive bridge and 500 party will be held in St. Mark's Hall under the auspices of the W.A. on Wednesday, October 5, at 8 p.m. Refreshments and prizes will be provided.

Friendly Help Society—The monthly meeting of the Friendly Help Association will be held on Tuesday morning, October 4, at 10:30 in rooms (upstairs), Market Building, Cormorant Street.

PRESENTATION MADE AT OAK BAY HIGH SCHOOL YESTERDAY

J. Miller Receives Women's Canadian Club \$100 Bursary

An interesting ceremony took place at the Oak Bay High School yesterday morning when formal presentation was made of the Women's Canadian Club bursary of \$100 to James Miller, the leading boy matriculant in Victoria and district, going on to the University of British Columbia.

Principal G. Downes received Miss Agnew, the president, and Mrs. Fletcher, secretary of the club, and introduced them to the student body assembled in the auditorium for morning prayers.

After a brief talk in which she outlined the aims and objects of the Canadian Club in promoting the highest type of citizenship and fostering a study of Canadian history and art, Miss Agnew presented James Miller with the club's bursary of \$100, annually given by the club to the student receiving the highest marks at matriculation in Victoria and district and going on to the university. The money, in crisp new bills, was presented in a handsome leather billfold.

BRILLIANT STUDENT
Young Miller has been one of Oak Bay's most brilliant students, winning the medal for entrance students when first entering the school and having a splendid record throughout his career at the school.

It redounds greatly to the credit of Oak Bay High School that yesterday's presentation marked the second occasion on which a student of the school has won the Women's Canadian Club bursary. The bursary was only established by the club three years ago. The first year Charles Dupont of Oak Bay won it; again in the second year a student of Oak Bay High School won the highest matriculation for Victoria and district but was not eligible for the bursary as he was not going on to the University.

VICTORIA HIGH SCHOOL
A packed auditorium witnessed the presentation of bursaries and scholarships at the Victoria High School yesterday where Idele Wilson won the Cecilia Green memorial scholarship of \$100, Patricia Morton won the Mrs. Forbes Wilson (formerly Miss Margaret Sayward) bursary of \$100 for proficiency in home economics, Idele Wilson was awarded the Women's Canadian Club scholarship of \$100, James Moyes won the special Canadian history prize, Margaret Montaldi received a \$20 bursary for three years of high proficiency in English literature.

Prizes for students particularly efficient in English literature were presented in the Lady Douglas Chapter scholarship named as follows: Gwen Jones, Ethel Wiley, Lyman Nesbitt, Richard Lendrum, James Gibson, Mary Woodward, Ruth Fields and Marjorie Henderson.

Major and Mrs. H. Outberr Holmes entertained at a dinner party of twelve on Thursday evening last at the R. B. Lybourn, Mr. and Mrs. A. L. C. Madden, Mr. and Mrs. F. D. Campbell, and Mrs. E. T. W. Pearce at the Oak Bay Avenue home of Capt. and Mrs. Lybourn last evening.

Commander C. Currie, who has been appointed to succeed Engineer-Commander G. P. Clarke at the Naval Base, has arrived from Ottawa, Mr. Currie and family. They are staying for a few days at the Glenelgh Hotel pending taking up their residence at Esquimalt.

Mr. and Mrs. T. Gilman announce the engagement of their daughter, Emily Anne, to Mr. Thomas Wright Scott, only son of the late Mr. T. Scott of Edinburgh, Scotland, and Mrs. Scott, Point Grey, Vancouver. The wedding will take place in November.

Mr. and Mrs. Robert Lewis announce the marriage of their daughter, Miss Elsie B. Hill, to Mr. Edgar Stonier, eldest son of Mr. and Mrs. T. Stonier of Cloverdale Avenue. The marriage will take place shortly.

Mrs. Ernest Hall, who arrived recently from Palo Alto, Cal., has been the guest of Dr. and Mrs. J. Walker, 228 Obed Avenue, when Miss Walker, for a few days before leaving for Seattle to make her home with her son, Fred, who is a student at the University of Washington.

Mrs. H. Bird, 2085 Chaucer Street, announces the engagement of her stepdaughter, Miss Francis Isabel, to Mr. Robert Marshall (Tom) Davies, youngest son of Mr. and Mrs. Charles R. Davies, 1819 Lillian Road. The wedding will take place at Mrs. Bird's Church, October 29, at 1:30 p.m.

Mr. Kenneth F. Pettis of the George H. MacDonald Advertising Agency, and his bride, who were married in Toronto a few days ago, have arrived in Victoria in the course of their honeymoon trip. They travelled from the East via Jasper Park and Prince Rupert and will return to Toronto via Banff and Lake Louise.

A quiet wedding was solemnized today at the home of Mrs. J. R. Walker, 228 Obed Avenue, when Miss Walker, daughter of Mr. C. R. Loosley, a graduate of the Royal Jubilee Hospital, to Dr. William Nicholson Turpel, son of Mr. and Mrs. Emerson Turpel, Quadra Street, Victoria. The marriage by Dr. E. W. Boak, the bride was charming in her French model gown of navy blue cloth trimmed with figured crepe de Chine with a smart little deep blue velvet hat and coat of grey cloth trimmed with fur. She carried a bouquet of Opelia roses.

Her sister, Miss Edith Loosley, as bridesmaid, wore a becoming frock of beige satin and black panne velvet, with a black velvet wrap, and carried a bouquet of pink and white. Dr. and Mrs. Turpel left on the midnight boat for the mainland, and will proceed to Norway House, Manitoba, where they will reside.

Mr. and Mrs. G. A. Bucklin entertained at a dinner party at their home, "The Oaks," Oak Bay Avenue, in honor of Eng-Commander and Mrs. G. P. Clarke, last evening, prior to the dance at the home of Capt. and Mrs. Lybourn.

Mrs. Curtis Samson entertained at tea at "Molton Combe," Newport Avenue, for Mrs. Ashburnham of Cowichan Lake, who is the guest of Mr. and Mrs. H. B. Turpin, Rockland Avenue.

Mr. John Jenner Jr., of 2203 Belmont Avenue, left yesterday for San Domingo, West India, to take up missionary work.

The ladies of the Royal Purple Lodge No. 7 are honoring a bridge party on Thursday afternoon, October 6, at 2:30 in the Elks Hall, Douglas Street. Some very good prizes have been secured. At the conclusion of the cards these will be distributed and tea will be served. Reservations for tables may be made through the committee, Mrs. D. W. Webster, convenor, phone 4467; Mrs. S. A. Shrimpton, 7825, or Mrs. Gillis, 1066. Players are requested to bring their own cards and score pads.

A quiet wedding was solemnized at Holy Trinity Anglican Church, Clontarf, on Thursday morning, when Miss Katherine Elizabeth Redding, daughter of Mr. and Mrs. J. T. Redding of Victoria, was united in marriage to Mr. James Broughton Smith, son of Mrs. Wm. Smith and the late Mr. O. Broughton, vicar of Holy Trinity, officiating. The bride was given in marriage by Mr. John Blackburn of Sandwick, and attended by her sister, Mrs. Harold E. Murray, B.C. Registrar, Rosedale, and Mr. Murray supported the groom.

Miss Margaret Armstrong, Gladstone Avenue, entertained with five tables of bridge last evening, when her guests were the Misses Alex Bradshaw, Gwen Wood, Grace Humber, Dorothy Oseke, Margaret Adam, Wilma and Ena Henderson, Major Raymond, Jean Moody, Elaine Gallier, Millicent Umbach, Marion Hargrave, Beatrice and Gertrude Hicks, Olive Acton, Noel Casack, Marguerite Sehl, Pat Tooley, Kay Dane, Helen Hemmoff, Eleanore Dinsdale, Louise Pollard, Doris Woolson, Janet Pearce, Gertrude Hill, Dorothy Greenwood, Lucille Hall, Justa McKenna, Elsie Watts and Doris McMorran.

A delightful party was held Thursday evening at the home of Mrs. Roberts, Wark Street, the occasion being the seventeenth birthday of her daughter, Terence. The evening was spent in games and dancing, music being provided by Mr. Len Acres. A delicious supper was served at 10:30. Those present were the Misses Margery Moody, Melville Daly, Margery Stern, Martha Harrison, Nancy Herron, Mabel Rogers, Nelly France, Mildred Perry, Margaret Brockington, Bridget Arvey, Ethel McKenna, Kelly, Ruby Ford, Doris Edna Roberts, Babe Haslam, Mary Minnie, Margaret McIntyre, Marion Davies, Emily Burke, Baby Burke, Meares, Reggie Allan, Nannie B. Hall, Jack Davies, Bob Warrack, Dave Warrack, Dan Morris, Fred Campbell, Porky Williams, Percy Graves, Lawrence Brydson, John Davies, Bobby Brown, Sandy McNaughton, Sam McKenna, Doreen McNaughton, Hutchinson, Jim Perry, Alf Tripp, Bill Harrison, George Farquhar, Polly Moody, Harold Hall, Marnie Padlock.

Engineer-Commander and Mrs. G. P. Clarke, who will leave shortly to reside at Ottawa, were the guests of honor at a delightful farewell dance given Thursday evening at the home of Mr. and Mrs. A. L. C. Madden, Mr. and Mrs. F. D. Campbell, and Mrs. E. T. W. Pearce at the Oak Bay Avenue home of Capt. and Mrs. Lybourn last evening.

Others who lived in the country and backyard gardeners brought bouquets of sweet peas, four and five lovely blooms on a stem, each one more exquisite in coloring than the other. Poppies of numerous sizes were brought. Photographs and original samples of green "Masterpiece" beans measuring fourteen inches in length. Long yellow ears of Golden Bantam corn and huge Danish mangels, all grown in Ontario gardens from samples given out last year.

The Eastern people are enthusiastic gardeners. They are not looking for cheap seeds or bulbs either. When the proof of our products has been fully demonstrated the British Columbia industry will be given preference and because it will be a Canadian product, it will hold it.

3,000 BULBS ORDERED
The superintendent of the Exhibition Park, Toronto, who grew some British Columbia tulips last year, made a recommendation to the commissioner which has resulted in an order for 3,000 "Darwins" to be grown next Spring in trial plots. Roses will also be grown and these beds will be placed as a British Columbia product. The press of Toronto will announce through its columns that all may go and see the British Columbia products perform.

FIELD OF B.C. ROSES
At Simco, Ontario, a field of British Columbia propagated roses. They are grown for cutting and Prof. Crowe is able to get a greater yield from his acres and a bigger price for

WOMEN'S AFFAIRS

PRESENTATION MADE AT OAK BAY HIGH SCHOOL YESTERDAY

J. Miller Receives Women's Canadian Club \$100 Bursary

An interesting ceremony took place at the Oak Bay High School yesterday morning when formal presentation was made of the Women's Canadian Club bursary of \$100 to James Miller, the leading boy matriculant in Victoria and district, going on to the University of British Columbia.

Principal G. Downes received Miss Agnew, the president, and Mrs. Fletcher, secretary of the club, and introduced them to the student body assembled in the auditorium for morning prayers.

After a brief talk in which she outlined the aims and objects of the Canadian Club in promoting the highest type of citizenship and fostering a study of Canadian history and art, Miss Agnew presented James Miller with the club's bursary of \$100, annually given by the club to the student receiving the highest marks at matriculation in Victoria and district and going on to the university. The money, in crisp new bills, was presented in a handsome leather billfold.

BRILLIANT STUDENT
Young Miller has been one of Oak Bay's most brilliant students, winning the medal for entrance students when first entering the school and having a splendid record throughout his career at the school.

It redounds greatly to the credit of Oak Bay High School that yesterday's presentation marked the second occasion on which a student of the school has won the Women's Canadian Club bursary. The bursary was only established by the club three years ago. The first year Charles Dupont of Oak Bay won it; again in the second year a student of Oak Bay High School won the highest matriculation for Victoria and district but was not eligible for the bursary as he was not going on to the University.

VICTORIA HIGH SCHOOL
A packed auditorium witnessed the presentation of bursaries and scholarships at the Victoria High School yesterday where Idele Wilson won the Cecilia Green memorial scholarship of \$100, Patricia Morton won the Mrs. Forbes Wilson (formerly Miss Margaret Sayward) bursary of \$100 for proficiency in home economics, Idele Wilson was awarded the Women's Canadian Club scholarship of \$100, James Moyes won the special Canadian history prize, Margaret Montaldi received a \$20 bursary for three years of high proficiency in English literature.

Prizes for students particularly efficient in English literature were presented in the Lady Douglas Chapter scholarship named as follows: Gwen Jones, Ethel Wiley, Lyman Nesbitt, Richard Lendrum, James Gibson, Mary Woodward, Ruth Fields and Marjorie Henderson.

Major and Mrs. H. Outberr Holmes entertained at a dinner party of twelve on Thursday evening last at the R. B. Lybourn, Mr. and Mrs. A. L. C. Madden, Mr. and Mrs. F. D. Campbell, and Mrs. E. T. W. Pearce at the Oak Bay Avenue home of Capt. and Mrs. Lybourn last evening.

Commander C. Currie, who has been appointed to succeed Engineer-Commander G. P. Clarke at the Naval Base, has arrived from Ottawa, Mr. Currie and family. They are staying for a few days at the Glenelgh Hotel pending taking up their residence at Esquimalt.

Mr. and Mrs. T. Gilman announce the engagement of their daughter, Emily Anne, to Mr. Thomas Wright Scott, only son of the late Mr. T. Scott of Edinburgh, Scotland, and Mrs. Scott, Point Grey, Vancouver. The wedding will take place in November.

Mr. and Mrs. Robert Lewis announce the marriage of their daughter, Miss Elsie B. Hill, to Mr. Edgar Stonier, eldest son of Mr. and Mrs. T. Stonier of Cloverdale Avenue. The marriage will take place shortly.

Mrs. Ernest Hall, who arrived recently from Palo Alto, Cal., has been the guest of Dr. and Mrs. J. Walker, 228 Obed Avenue, when Miss Walker, for a few days before leaving for Seattle to make her home with her son, Fred, who is a student at the University of Washington.

Mrs. H. Bird, 2085 Chaucer Street, announces the engagement of her stepdaughter, Miss Francis Isabel, to Mr. Robert Marshall (Tom) Davies, youngest son of Mr. and Mrs. Charles R. Davies, 1819 Lillian Road. The wedding will take place at Mrs. Bird's Church, October 29, at 1:30 p.m.

Mr. Kenneth F. Pettis of the George H. MacDonald Advertising Agency, and his bride, who were married in Toronto a few days ago, have arrived in Victoria in the course of their honeymoon trip. They travelled from the East via Jasper Park and Prince Rupert and will return to Toronto via Banff and Lake Louise.

A quiet wedding was solemnized today at the home of Mrs. J. R. Walker, 228 Obed Avenue, when Miss Walker, daughter of Mr. C. R. Loosley, a graduate of the Royal Jubilee Hospital, to Dr. William Nicholson Turpel, son of Mr. and Mrs. Emerson Turpel, Quadra Street, Victoria. The marriage by Dr. E. W. Boak, the bride was charming in her French model gown of navy blue cloth trimmed with figured crepe de Chine with a smart little deep blue velvet hat and coat of grey cloth trimmed with fur. She carried a bouquet of Opelia roses.

Her sister, Miss Edith Loosley, as bridesmaid, wore a becoming frock of beige satin and black panne velvet, with a black velvet wrap, and carried a bouquet of pink and white. Dr. and Mrs. Turpel left on the midnight boat for the mainland, and will proceed to Norway House, Manitoba, where they will reside.

Mr. and Mrs. G. A. Bucklin entertained at a dinner party at their home, "The Oaks," Oak Bay Avenue, in honor of Eng-Commander and Mrs. G. P. Clarke, last evening, prior to the dance at the home of Capt. and Mrs. Lybourn.

Mrs. Curtis Samson entertained at tea at "Molton Combe," Newport Avenue, for Mrs. Ashburnham of Cowichan Lake, who is the guest of Mr. and Mrs. H. B. Turpin, Rockland Avenue.

Mr. John Jenner Jr., of 2203 Belmont Avenue, left yesterday for San Domingo, West India, to take up missionary work.

The ladies of the Royal Purple Lodge No. 7 are honoring a bridge party on Thursday afternoon, October 6, at 2:30 in the Elks Hall, Douglas Street. Some very good prizes have been secured. At the conclusion of the cards these will be distributed and tea will be served. Reservations for tables may be made through the committee, Mrs. D. W. Webster, convenor, phone 4467; Mrs. S. A. Shrimpton, 7825, or Mrs. Gillis, 1066. Players are requested to bring their own cards and score pads.

A quiet wedding was solemnized at Holy Trinity Anglican Church, Clontarf, on Thursday morning, when Miss Katherine Elizabeth Redding, daughter of Mr. and Mrs. J. T. Redding of Victoria, was united in marriage to Mr. James Broughton Smith, son of Mrs. Wm. Smith and the late Mr. O. Broughton, vicar of Holy Trinity, officiating. The bride was given in marriage by Mr. John Blackburn of Sandwick, and attended by her sister, Mrs. Harold E. Murray, B.C. Registrar, Rosedale, and Mr. Murray supported the groom.

Miss Margaret Armstrong, Gladstone Avenue, entertained with five tables of bridge last evening, when her guests were the Misses Alex Bradshaw, Gwen Wood, Grace Humber, Dorothy Oseke, Margaret Adam, Wilma and Ena Henderson, Major Raymond, Jean Moody, Elaine Gallier, Millicent Umbach, Marion Hargrave, Beatrice and Gertrude Hicks, Olive Acton, Noel Casack, Marguerite Sehl, Pat Tooley, Kay Dane, Helen Hemmoff, Eleanore Dinsdale, Louise Pollard, Doris Woolson, Janet Pearce, Gertrude Hill, Dorothy Greenwood, Lucille Hall, Justa McKenna, Elsie Watts and Doris McMorran.

A delightful party was held Thursday evening at the home of Mrs. Roberts, Wark Street, the occasion being the seventeenth birthday of her daughter, Terence. The evening was spent in games and dancing, music being provided by Mr. Len Acres. A delicious supper was served at 10:30. Those present were the Misses Margery Moody, Melville Daly, Margery Stern, Martha Harrison, Nancy Herron, Mabel Rogers, Nelly France, Mildred Perry, Margaret Brockington, Bridget Arvey, Ethel McKenna, Kelly, Ruby Ford, Doris Edna Roberts, Babe Haslam, Mary Minnie, Margaret McIntyre, Marion Davies, Emily Burke, Baby Burke, Meares, Reggie Allan, Nannie B. Hall, Jack Davies, Bob Warrack, Dave Warrack, Dan Morris, Fred Campbell, Porky Williams, Percy Graves, Lawrence Brydson, John Davies, Bobby Brown, Sandy McNaughton, Sam McKenna, Doreen McNaughton, Hutchinson, Jim Perry, Alf Tripp, Bill Harrison, George Farquhar, Polly Moody, Harold Hall, Marnie Padlock.

Engineer-Commander and Mrs. G. P. Clarke, who will leave shortly to reside at Ottawa, were the guests of honor at a delightful farewell dance given Thursday evening at the home of Mr. and Mrs. A. L. C. Madden, Mr. and Mrs. F. D. Campbell, and Mrs. E. T. W. Pearce at the Oak Bay Avenue home of Capt. and Mrs. Lybourn last evening.

Others who lived in the country and backyard gardeners brought bouquets of sweet peas, four and five lovely blooms on a stem, each one more exquisite in coloring than the other. Poppies of numerous sizes were brought. Photographs and original samples of green "Masterpiece" beans measuring fourteen inches in length. Long yellow ears of Golden Bantam corn and huge Danish mangels, all grown in Ontario gardens from samples given out last year.

The Eastern people are enthusiastic gardeners. They are not looking for cheap seeds or bulbs either. When the proof of our products has been fully demonstrated the British Columbia industry will be given preference and because it will be a Canadian product, it will hold it.

3,000 BULBS ORDERED
The superintendent of the Exhibition Park, Toronto, who grew some British Columbia tulips last year, made a recommendation to the commissioner which has resulted in an order for 3,000 "Darwins" to be grown next Spring in trial plots. Roses will also be grown and these beds will be placed as a British Columbia product. The press of Toronto will announce through its columns that all may go and see the British Columbia products perform.

FIELD OF B.C. ROSES
At Simco, Ontario, a field of British Columbia propagated roses. They are grown for cutting and Prof. Crowe is able to get a greater yield from his acres and a bigger price for

B.C. TULIPS AND ROSES TO BLOOM IN TORONTO PARKS

By MARGARET L. MURRAY

The Women's Institutes of British Columbia are proud to get results from their efforts to extend markets through Canada's National Exhibition.

For four consecutive years country women have taken advantage of free space given to them and all the other provinces in the Dominion, through their federation by the management of the Canadian National Exhibition, a space which could not be bought at any price and one where women, who are recognized in Canada as managers of the family "bank roll," are sure to go.

The Provincial Board of Women's Institutes assisted the country women in selecting an exhibit that would in no way conflict with eastern or prairie enterprises. Until last year no tangible proof was given to eastern growers of the superior quality of British Columbia bulbs, seeds, etc.

Several hundred packets of seeds, as many tulips and hyacinth bulbs were given out to those who were especially interested. The reward to the country women was shown a year later in many photographs showing the quality of

OAK BAY-LAW DRAWS OBJECTIONS

Residents Opposed to Certain
Sections in New Municipal
Zoning Plan

Extension of Hotel Area Asked,
and Protest Against Un-
restricted District

Discussion at the public meeting held on the Oak Bay zoning by-law in the Municipal hall last night centered around two main points—the extension of the hotel area on Beach Drive from Beresford to Bowker Avenue and the situation of the unrestricted area near the Chinese cemetery.

F. M. Rattenbury, owner of four acres of property on Beach Drive upon which he intends to erect an apartment house and by the by-law he would be prevented from doing so. Mr. Rattenbury stated his property was on Beach Drive opposite Oak Bay Avenue where no view would be obstructed, the site at present being particularly bare.

PROTESTS VOICED

A number of residents who would be affected by such building voiced protests to this end. P. Curtis pointed out many of the residents in the neighborhood had come to that location as it was a choice residential location, and stated it would be a real blow to them if this hotel were erected.

T. W. Gore declared his property was next to that of Mr. Rattenbury and as his house was fairly close to the lot line, a high building would throw it in the shade. Although I don't like to object to hotels in Oak Bay in fact I am in favor of them—nevertheless, I agree with Mr. Curtis that this area should be reserved for residential purposes only," he declared.

WOULD CHANGE ASPECT

O. W. Smith protested the move, declaring he had built in this district because it was one of the finest residential areas of the municipality. To have an apartment house there would change the aspect of the whole district, he asserted.

J. W. Morris entered into an argument regarding the subject, stating the latter had previously maintained the area only suitable for residences. Mr. Rattenbury pointed out a low attractive-looking building would, rather than blot the landscape, serve to make it more attractive.

H. G. Heisterman, W. Ellis Brown and G. O. Atkinson registered a protest against extending the area.

UNRESTRICTED AREA

Representing four owners in the vicinity, O. J. Bouton protested against the location of the unrestricted area. In view of the fact that some of the districts are zoned as only one lot, he thought it would be a good idea to make the unrestricted area one lot near the Exhibition Grounds. His clients were anxious to develop the waterfront site at a residential area, he said.

With the unrestricted area just across the street, the Chinese cemetery, which is falling into decay owing to a rule preventing repairs, could move across the street if it was seen fit, he declared, instead of being done away with as was now the object. The cemetery is not of particularly great importance to the Chinese, he explained, as the bodies are usually exhumed and sent back to China.

DUMPING GROUNDS

Mr. Bouton also pointed out that the area could be used as a dumping ground, a fish factory or any other unsatisfactory use.

"My clients are in accord with the general plan of the act, but I hope the board will see fit to help by clients further develop this area," he concluded.

Mr. Bouton acted for the Gonzales Realty Company, C. C. Pemberton, L. C. M. Hurrell and T. O. Giltho. Miss J. A. Cann, speaking for two owners of lots on Gonzales Avenue, maintained that the section of waterfront there with its glorious view was the most desirable for unrestricted area. In the case of Oak Bay going ahead in the future the lots would become valuable as residential sites.

J. W. Morris also protested this area. At the opening of the meeting, Reeve Anson, who occupied the chair, explained its purpose, stating how the council was given further powers in the matter of zoning by legislation passed last year. The by-law, he explained had for its purpose the preserving of residential property values.

SIX AREAS

Reeve Anson then enumerated the six different areas in the municipality—residential, apartments and hotels, garages, retail districts, farming and unrestricted, the boundaries of these being later defined by Municipal Clerk R. F. Blandy.

In specific cases where the act would be unnecessary hardship on property holders, a board of appeal would be formed, he explained, consisting of one member appointed by the council, one member appointed by the Lieutenant-Governor-in-Council and the third selected by the other two.

CONGRATULATE COUNCIL. Several of those attending the meeting congratulated the council on their progress in the matter and expressed themselves as sure the council was making attempt to look after all interests.

Several specific complaints were dealt with including those of Capt. W. Merston who wished to place a garage on the opposite side of Beach Drive from the place in which his hotel is to be situated; H. Cuthbert Holmes, who wished more garages in the municipality, pointing out a specific case at the corner of Windsor and Goodwin Streets where there was a large apartment area and a lot for a garage; Miss J. A. Cann, who registered a protest against the residential zoning of the southeast corner of St. Patrick Street and Oak Bay Avenue, declaring her principals had held the lots for fourteen years with a view to erecting an apartment or some such public building and had paid \$2,900 in taxes during the last ten years, and C. C. Cooper who wished to have a retail building less than ten feet from the side walk line on the corner of St. Patrick and Central Streets, maintaining that as the lots were narrow very little clearance would be given the adjoining property.

It takes about half a minute, on the average, for a drop of blood to complete its trip through the body from the time it leaves the heart until the time it gets back.

FIND FAULT IN PACIFIC CABLE

Cableship Restorer Will Sail
To-morrow For Honolulu to
Make Repairs

May be Away From Port
Several Months; Made Trip
to Guam Last Year

Preparations for putting to sea were under way on the Commercial Cable Company's ship Restorer to-day following receipt yesterday by Capt. C. M. Fleming that the Pacific cable between San Francisco and Shanghai is not functioning, with one hundred per cent efficiency.

The Restorer, which uses Pier B, Opposite Point Dock, as her base, will probably set out for Honolulu to-morrow, Capt. Fleming announced. Provisions are now being taken aboard and everything made shipshape for the voyage.

According to the advice received by Capt. Fleming the cable is not broken, but is evidently slightly damaged in the portion between Honolulu and Midway Island. This cable stretches from San Francisco to Honolulu, thence to Midway Island, to Guam, Manila and Shanghai. It is the chief connection between countries opposite on the Pacific.

It is thought the Restorer may be away from Victoria several months on this work. The locating of the trouble is a tedious process, as miles and miles of cable must be taken up and inspected. This is the second year in succession that the Restorer has been ordered to repair the Pacific cable in the Fall. She left Victoria last year on November 12 and was away three months, six weeks being consumed in locating the fault in the cable, which was in the neighborhood of Guam. She arrived back in Victoria February 9.

Cucumbers With Rice

Two good sized cucumbers, 3 cups white sauce, 3 hard cooked eggs, 2 tablespoons grated cheese, 4 to 6 strips of toast, 4 rolls of rice.

Parse cucumbers and cut in three-inch lengths. Remove seeds. Stand on ends in a sauce pan in a little hot water and simmer closely covered for 15 to 20 minutes until tender. Run yolks of egg through sieve and set aside. Cut remaining eggs in neat dice. Add to one cup white sauce. Fry rice rolls and add to the mixture. Pour the mixture over the cucumbers and pour remaining sauce around rolls and toast, not over them. Reheat in hot oven if necessary and serve.

SPOKEN BY WIRELESS

September 30, 8 p.m.—Shipping: AORANGI, Honolulu for Sydney, 831 miles from Honolulu. MUHUKONA, Port Angeles for Hilo, 1,108 miles from Port Angeles. MARINE NOTES

A. H. Hebb, local N.Y.K. agent, is advised the liner Iyo Maru, booked to sail October 2 from this port for the Orient is completely sold out as far as passenger accommodation is concerned.

The O.R.K. transpacific liner London Maru, bringing a heavy silk cargo from the Orient, will arrive at William Head quarantine at 1 p.m. Tuesday. Rithet Consolidated, local agents are advised. She will not call at Victoria, proceeding direct to Vancouver.

St. Salvage King returned to her berth in the Inner Harbor last night after towing the damaged freighter Chalmers to Seattle.

The Holland-America liner Moordyk, inbound from London and Antwerp, will arrive next Tuesday or Wednesday according to advice received by A. P. Moffat, local agent. She has about 200 tons of cargo for discharge here.

The fourth liner of the recently inaugurated Donaldson Line service to the Pacific ports from the United Kingdom will be the Moveria, due here November 5, local agents are advised. Ms. Tacoma loading lumber at Ogden Point for Japan will remain here until probably next Tuesday. King Bros. announced this morning. She is taking on a total of 1,500,000 feet here.

The Government freighter Canadian Maru, also loading at Ogden Point will clear to-morrow or Monday for Eastern Canada.

Whaling tender St. Grey is expected here to-morrow morning.

ECONOMIC PROGRESS IS SHOWN BY TRAVEL

D. C. Coleman Points to Tendency of Canadian to Know Own Country

Winnipeg, Oct. 1.—The growing tendency of Canadians to secure a first-hand knowledge of the conditions and possibilities throughout their own country is another indication of healthy economic progress, D. C. Coleman, vice-president of Canadian Pacific Railway, stated here yesterday when commenting on the marked increase in the tourist business in the recent months.

The beneficial results accruing from the steady movement of a large number of people from one part of the Dominion to another, whether engaged in business or on holidays, were manifest in the deeper interest being taken in the future development of the country, he said.

The movement across Canada of such important organizations as the Canadian Manufacturers' Association to their convention in Calgary, the western visit of the Canadian Chamber of Commerce, the University of Montreal, the Outlook and Deseret, and special trains was indicative, he felt, of a growing desire to see and know Canada first. Visitors to the West as members of these and other special parties all returned to their homes possessed of a wider knowledge and greater appreciation of the progress being made in each of the provinces and Mr. Coleman was of the opinion that this fact would make for a notable turning up in the development of this potential wealth of the Dominion.

FOREIGNERS VISIT

Another phase of travel during recent months and one which Mr. Coleman believed would be of marked importance was the fact that several trains of outstanding men from other countries visited Canada. These special trains included the Empire Mining Congress, representatives of the mining and engineering interests from all parts of the British Empire, the British provincial editors and the Investment Bankers' Association of America. These visitors, he said, would return to their respective countries with an enthusiasm for, and understanding of Canada and Canadian problems and possibilities, which would eventually prove of untold benefit to this Dominion.

In this connection the visit of the British editors was particularly important, he said. The editors, by reason of their control of newspapers in the Old Country would be able to tell the British people of the opportunities for settlement in Canada and would write of this country with their Canadian experiences as a background. In addition to the special parties and other organizations, hundreds of others visited Western Canada and the resorts in the Rocky Mountains. All these visitors besides enjoying their trips carried away a more comprehensive idea of the country and its great possibilities.

ASIA HAS LARGE
SILK SHIPMENT

Canadian Pacific Liner, Due
To-morrow, Has Over \$5-
000,000 in Silk Cargo

R.M.S. Empress of Asia, Canadian Pacific liner, which is due here to-morrow afternoon from London and Antwerp, is bringing over \$5,000,000 worth of raw silk, according to advice received by the Canadian Pacific. The Asia's silk cargo will require eighteen cars for transportation East by special train.

The Asia will arrive at William Head quarantine station at 1 o'clock to-morrow afternoon, Capt. L. D. Douglas states in wireless messages. The vessel is expected to get up to Pier 2, Rithet Docks by 2 o'clock to discharge cargo and passengers before proceeding to Vancouver.

There are nearly 400 passengers in all classes aboard the Asia, including Sir Francis Burrett, D.S.O., C.M.G., of the Shanghai Defence Force, who is on his way to England.

Pilgrims to Follow
Mayflower Voyage

London, Oct. 1.—More than 1,200 modern "Pilgrim Fathers" will sail to America next June to greet the descendants of those who went over on the Mayflower 300 years ago.

At Plymouth Rock will be held a great reunion of Anglo-American Congregationalists. Later a mass demonstration on Boston Common will be attended by many thousands.

The twentieth-century pilgrims have chartered the White Star liner Celtic for the trip and will make the crossing in about as many days as it took the Mayflower weeks to complete the voyage. The Colonial Missionary Society, organizer of the 1926 pilgrimage, has been enquired under with letters of application from those wishing to take part in the reunion.

New Esquimalt Drydock Will Take Two Vessels At Same Time Next Week

For the first time since it was completed this year, the new government drydock at Esquimalt will have two vessels docked in it undergoing repairs next week.

According to an announcement made by Yarrows Limited this morning, the Imperial Oil tanker Mina Brea will be docked by the firm in the new dock on Monday. The St. Princess Charlotte, Canadian Pacific Railway coastwise vessel, which went ashore on Victoria's Rock at the end of August is still in the dock undergoing repairs so that two vessels will be out of the water in the dock at the same time. The Charlotte is in the front portion of the basin, occupying the smaller of the two sections.

The Mina Brea will be put in the other section to undergo general repairs and overhauling. Equipment to the new drydock has recently been augmented as the huge 100-ton derrick was put into operation. Tests with this derrick were conducted yesterday, sixty-one tons being the heaviest weight lifted.

This is what the floor of the New Orleans Cotton Exchange looks like on a busy day. The Cotton Exchange, according to Vice-President J. P. Henican is not a scene of wild gambling and unrestrained speculation, as many suppose; on the contrary, it provides both cotton grower and buyer with excellent insurance against loss.

McKinley Outbound

From San Francisco

San Francisco, Oct. 1.—When the Los Angeles Steamship Company's coastal liner Yale, Capt. F. Johnson, sails from here to-day, more than 150 delegates of the San Francisco Advertising Club will be aboard, bound for Los Angeles where they will attend the three-day meeting of advertising representatives of the Pacific Coast.

Under command of Capt. Chester R. Gilbert, the Panama Mail Liner Genesler arrived here late yesterday from New York by way of San Pedro. The vessel was several hours late arriving due to having stopped off the coast of Lower California to render medical assistance to a seaman on an eastbound freighter. An unusually heavy passenger list was aboard the liner.

The Dollar Liner President McKinley, Capt. A. C. Lustie, sailed from San Francisco for the Orient by way of Honolulu, to-day. The three-day voyage on drydock while in port here for repairs to her propellers, and as a result San Pedro will be omitted as a port of call on her subsequent voyage.

The world's record for a rainstorm was established in July, 1911, at Baguio, Philippine Islands, when forty-five inches of rain fell in twenty-four hours. The record for a single hour is eleven and one-half inches, which fell at Campo Southern California.

Fox.

\$42,000 DAMAGE TO
SEATTLE FISH PLANT

Bachelor Meets Death in One
Room Shack Destroyed
By Fire

Seattle, Oct. 1.—Martin Hausenhus, fifty-five, a bachelor, was burned to death when his one-room shack was destroyed by fire early to-day. When the fire was extinguished, firemen found the body and near it a broken kerosene lamp.

In another fire, \$42,000 damage was done to the plant of the Fishing Vessel Owners Marine Ways, Inc., near where Seattle's halibut and salmon fleet is moored.

The fire started in an oil storeroom and spread rapidly to the entire building. A strong wind made control efforts difficult.

OBITUARY

The funeral of the late L. R. Turner, who succumbed to injuries received in a shooting accident at Hill Island, will take place on Monday at 3:30 o'clock from the Sands Funeral Chapel, and interment will be made in Royal Oak Burial Park.

The funeral of Mrs. Elizabeth Middleton, who died at White Rock on Wednesday morning, was held yesterday afternoon from First Baptist Church, Rev. James Strachan officiating. During the service Mrs. Robert McIntosh sang "Crossing the Bar." Interment was made in Ross Bay Cemetery, with the five sons, Edmund, Bertram, Walter, Albert and Frederick Middleton, and S. E. Hall as pallbearers.

The funeral of the late Joe Gum Wah, whose accidental death occurred September 28 at Shawnigan Lake, will take place on Sunday afternoon at 2 o'clock from the Thomson Funeral Home, 1625 Quadra Street. He was a native of Canton, China, aged fifty years, and is survived by his widow, two sons, and one daughter. He had been a resident of this city for many years.

Mrs. T. Rowan, 818 Vine Street, has received word from Kentucky of the death of her brother, John Kennedy, late of the B.C. Coast Service. He was born in Scotland twenty-six years ago and left Victoria fifteen months ago for Kentucky. He leaves beside his widow, his parents, five sisters and two brothers in Scotland and two sisters in Victoria, Mrs. T. Rowan of Vine Street and Mrs. Carnochan of Blackwood Avenue.

NEWS IN BRIEF

A meeting of Conservative electors in Ward Four will be held Marigold Hall at 8 o'clock to-night for transaction of annual business.

The Saanich Council was last night informed that investment of about \$51,000 in sinking fund securities will have to be undertaken about October 10.

The cost of resurfacing Benvenuto Avenue was last night reported to the Saanich Council as being \$2,445, towards which Victoria contributed \$500, Saanich paid \$300 and the Provincial Public Works Department, \$1,445.

Probates and administrations issued at the Supreme Court of British Columbia at Victoria for the week ending October 1, 1927, are as follows: Sarah Blair, late of Victoria, died May 3, 1927, estate \$2,293; Charles William Munro, late of Esquimalt, died July 10, 1927, estate \$2,789.04.

The Saanich Council last night decided to add an automobile repair man to the permanent staff of the municipality. The duties will include upkeep of the municipal buses, and trucks, and to act as emergency bus driver. Reeve Crouch stated that monthly repair bills have attained excessive figures, and that much money would be saved.

Ward Two Liberals will meet on Monday at 8 p.m. in the association club rooms at Government and Broughton Streets. Following the business of the meeting, W. M. Ivel will explain to a joint gathering of Wards One and Two "How Victoria can be made into one of the world's largest shipping centres." The meeting will be open to the general public.

The Saanich Council last night refused to grant D. M. Macdonald and N. A. Moore a permit to keep thirty-five pairs of foxes on Whittier Avenue in Ward Two, where a large fox ranch has been operated for some years. Instead of a permanent permit, the council will allow the applicants to continue operation of their ranch until the end of 1928, when all foxes must be removed.

Assessment equalization in Saanich will be discussed at a special session of the Saanich Council next Friday evening at 8 o'clock. Reeve Crouch pointed out last night that little time remains for any changes to be made, as the legal date has to be passed shortly. Councillor Graham declared many complaints of inequality exist, and Councillor Vantage agreed.

The first of the C.P.R. Social Club dances held Thursday night at the Empress Hotel gave promise of another enjoyable winter series. Most of those who have attended the previous C.P.R. dances applied for invitation cards, and the big ballroom was well filled with dancers. Orsini's orchestra supplied excellent music while excellent lighting effects were greatly appreciated.

Appeal to the Railway Commission for lower telephone rates in British Columbia will be laid before the United Nations and the discussion on Canada's place in world affairs will lend interest at the lecture to be delivered in Forum Hall, 717 Pandora Avenue, at 7:30 to-morrow evening, when W. Bennett will speak on "Canada and British Imperialism." The lecture will be followed by discussion.

The following are the donations received by F. Landsberg, treasurer, Save the Children Fund, from September 12 to September 30: Miss E. Harle \$2, C. F. Saunders \$2.50, Mrs. N. F. Porritt \$4, E. C. R. \$2, Near East Relief \$1, Mrs. J. Plasket \$10, G. F. Chisholm \$10, F. N. E. Shakespeare \$1, Mrs. J. B. Henderson \$10; total donations \$68.50. Further donations will be gratefully received by Mr. Landsberg at 641 Port Street.

Flight-Lieutenant Cowley of the Royal Canadian Air Force, and acting on behalf of the Federal civil aviation authorities, is in the city to-day in connection with coast-to-coast survey of the trans-Canada public airway. Six cities in Canada have already applied for airport licenses on the route, and have set aside lands which may be used for the purpose of public aerodromes when the need arises. Victoria took early action to secure advice in the selection of a site, its representations going to Ottawa shortly through the medium of W. D. Van Vleet, pilot officer formerly in command at the Jericho Air Station, who was recently in this city for the purpose.

An early adjournment was taken at the second day of the city's annual tax sale to-day, to make way for a session of the Court of Revision on the 1928 assessment roll. Edwin C. Smith, City Treasurer, auctioned one parcel on the list, and then adjourned the sale until Monday at 10 a.m., when the sale will proceed in the Council Chamber.

Dean C. S. Quinlan, honorary president of the Royal Society of St. George, will give a lecture on "Recent Impressions of England," before the regular meeting of the society on Tuesday next, in the Conservative Clubrooms, Campbell building, commencing at 8 o'clock. Rev. R. W. Lee, president, will take the chair. The public is invited to attend.

The regular monthly meeting of Ward One Liberals will be held on Monday October 3 in the Liberal headquarters rooms, corner of Government and Broughton Streets, at 8 o'clock. Henry Wilson, secretary, announced that the society is interested in being present at arrangement for other meetings and other business will be under consideration, he said.

Harvest thanksgiving services will be to-morrow. At the sponsoring held in Belmont Avenue United Church Rev. S. S. Pest will preach at the evening service. Special music by the choir. The church is beautifully decorated with flowers and fruits for the occasion. A new furnace has been installed for better heating, and a special offering will be taken in aid of the furnace fund. Rev. J. Hood is the pastor.

The Victoria Women's Conservative Association will hold a meeting in the Campbell Building, 5 p.m. sharp, Oct. 3. Nominations will be received for the executive committee on the date and a full attendance is requested. A very energetic committee has arranged a social meeting to end the year's work, and the members the privilege to invite friends. A pleasant social time is assured and a good game of cards, play to commence at 8 p.m.

Charcoal, acetate, tar and chipped fuel in some of the by-products which can be made from the waste of sawmills, according to information reaching the City Hall in a communication from Hon. P. D. Fostell, Minister of Lands in the Provincial Cabinet. The Provincial authorities were asked what remedy could be found to assist in the elimination of the smoke and dust nuisance. Much depends on the market for the by-products as to whether or not their manufacture would prove or not their manufacture for the situation, it is explained.

The annual meeting of the Saanich Conservative Association is to be held in the Community Centre Hall at Lake Hill on Tuesday, October 4 at 8 p.m. The date of the meeting was changed to the earlier date to secure the attendance of Hon. S. F. Tolmie, M.P. Mr. R. H. Postall, M.P. and C. D. Dickie, M.P. The proceedings of the meeting will be: election of officers for the ensuing year, general business, followed by addresses for the provincial and federal houses.

Registration of voters for the city voters list commenced at the office of the City Clerk to-day and will continue throughout the month of October. The voters will be divided into four groups, each of which has a slightly different procedure to go through. Individual property owners are registered, non-property owners, and corporations have to register. To ensure a correct revision of the list, the only method which will be used is to vote to make sure that their name is correctly placed on the list. Full information can be obtained daily between 9 a.m. and 5 p.m. at the office of M. F. Hunter, City Clerk.

The Metropolitan Brotherhood's Grand Council on Tuesday next, October 4, is expected to prove a very popular musical event. It is doubtful whether so many gold medals will be taken as in the case of the previous year. The following are the donations received by F. Landsberg, treasurer, Save the Children Fund, from September 12 to September 30: Miss E. Harle \$2, C. F. Saunders \$2.50, Mrs. N. F. Porritt \$4, E. C. R. \$2, Near East Relief \$1, Mrs. J. Plasket \$10, G. F. Chisholm \$10, F. N. E. Shakespeare \$1, Mrs. J. B. Henderson \$10; total donations \$68.50. Further donations will be gratefully received by Mr. Landsberg at 641 Port Street.

GEHRIG KNOCKS OUT HIS 47TH HOMER

New York, Oct. 1.—Lou Gehrig of the Yankees, homerun rival of Babe Ruth, knocked his forty-seventh homerun of the season in the first inning of to-day's game with Washington. Burke was pitching. Koenig, who had tripled, and Ruth, who had walked, were on base.

MAY HAVE REUNION OF OLD VICTORIANS

Rotary Club Fostering Idea and Asks Co-operation of Whole Community

The Rotary Club of this city is considering plans for organizing what will be known as an "Old Home Week" or "Old Boys' Reunion" for Victoria, along the same lines as similar events in other cities of the Dominion. It is the object of such a week to induce old residents and native sons and daughters to return to the city simultaneously. But the entire community would need to back such a venture, for it would entail much work and expense, according to an announcement coming from the club.

As an inaugural step, the Rotary club is inviting a number of other service clubs and organizations into conference to discuss the subject. Kilman, Gyro, Kinmen, Knights of the Round Table, Chamber of Commerce, Victoria Canadian Club, Sons of B.C. Native Daughters of B.C. and the Kumtiks membership have all signified their intention of having representatives at this gathering.

The meeting will take the form of a supper gathering, at 6:15 p.m. on Tuesday, October 4. The meeting will adjourn before 8 o'clock.

NEW MUSIC STORE IS OPENED TO-DAY

W. Harold Davis and Harry King Launch Into Business

An interesting addition to the businesses in the city is made to-day with the opening of the general music store at 719 Port Street by the new firm of Davis & King Limited.

The firm's personnel includes W. Harold Davis and Harry King, both of whom have been associated for a number of years with Fletcher Bros. music store. Mr. Davis came to Victoria from Vancouver in 1926 and has since been active in musical affairs in the city. For the last five years he has been organist and choirmaster at St. Charles Cathedral. Mr. King saw active service overseas for four years, and after the war joined the staff of Fletcher Bros. He is a prominent Klava, and has been chairman of the music committee of the Kiwanis Club.

The new firm will conduct a general music business, handling such agencies as the Mason & Birch piano, the new Columbia Viva-sonic phonograph, the new electric process Columbia records, and De Forest-Crosley Radios, as well as a full line of musical instruments and sheet music. It is in the premises recently occupied by the Garden Shop.

GREATEST BRITISH FAIR IS PLANNED

The fourteenth British Industrial Fair will be held from February 20 to March 2, 1928, at the White City, London, and at Coleshill, Birmingham.

Ranking not only as the national fair of Great Britain, but also as one of the most important of the great world exhibitions, the fair of the world, the British Industries Fair now plays an essential part in the commercial life of the Empire. As in previous years, the fair is a comprehensive display of the products of the British Empire, comprising a large variety of trades such as jewelry, textile, leather goods, pottery, chemicals, foodstuffs, etc., will be under the management of the Birmingham Chamber of Commerce.

The fair is primarily for trade buyers, the general public being admitted in the evening. The fair is open to exhibitors from all over the world. The buildings will have to be enlarged considerably to provide the necessary space, but it is expected that the fair will be a success. Only goods produced in the British Empire will be shown and only by the actual manufacturer or by a firm controlling the entire output. The trade buyer interested in, say, pottery and chinaware, is thus enabled to view under one roof the latest patterns of scores of manufacturers, which he could only otherwise do by many visits to individual factories throughout the country, and the same convenience applies to all other lines.

APPEAL TO WORLD

Catalogues will be printed in nine languages and interpreters and clerical facilities will be provided for foreign visitors. The Empire Marketing Board's function is to stimulate the consumption of Empire products and foodstuffs, will stage a representative display drawn from every one of the British Empire. In addition to foreign buyers from sixty different countries, this year's fair was visited by over 20,000 buyers from Great Britain, a full advance overseas edition of the catalogue, which was in the hands of trade buyers throughout Europe and North America a full month before the fair was time for them to commence their journey to England. Similar advance publication will be made in respect of the 1928 fair.

Further particulars in regard to the fair may be had from Major A. E. Pollard, British Trade Commissioner, 18 Commerce Building, Vancouver.

RADIO SAVES HOUSES

A lightning storm in Middleborough, England, recently hit four houses. These were in the midst of a section thick with aerials, but were the only four that had no radio.

LOGGER'S DEATH WAS ACCIDENTAL

Samuel Waggett Fractured Skull in Fall; Workmen Tell Circumstances

The inquest to inquire into the circumstances surrounding the death of Samuel Waggett, who died as a result of injuries received at Port Renfrew while loading a flatcar with logs, resulted in a verdict of accidental death yesterday afternoon at Sands Funeral Parlors. Waggett, according to testimony offered by Withrow Young, a fellow worker, was head loader at the Cathels and Sorensen yard. He was struck by a flying piece of wood during loading operations, on September 30, fell backwards and fractured his skull in the fall.

Dr. Gordon Kenning's and Charles Leonard's evidence corroborated that of Young.

Waggett was rushed here by a relay of fast launches, but never regained consciousness. He died within a week at the Jubilee Hospital.

He was a man of twenty-two years of age and resided up to the time he went to work at Port Renfrew with his mother and father in Vancouver. Coroner Dr. E. C. Hart officiated yesterday.

SPLENDID DISPLAY OF FLOWERS GIVEN

Chamber of Commerce Scene of Colorful Social of Organization

Flowers in all their beauty bedecked the auditorium of the Chamber of Commerce last evening, when the Victoria and District Gardeners' Association held its annual social evening and prize distribution. The display staged on the exhibition table proved beyond question the ability of the members as gardeners, and the enjoyment attending the meeting has amply proved their ability as hosts. Along the length of the hall tables had been placed to hold the numerous exhibits, and on the super tables were vases of flowers of various kinds, all grown by members of the association.

The president of the association, P. R. Leighton, presided over the gathering. Alderman William Marchant presented the prizes won by the successful competitors at the recent "Home garden competition," also the prizes won in the monthly competition, which are held in connection with the regular meetings of the Victoria Gardeners' Association. The prizes being donated by the Hudson's Bay Company.

The successful competitors in the garden competition were: 60x120 and over: 1. John Dean challenge cup and 12. Francis Turner; 2. 110. W. O. Flight; 3 and 4, equal, 65.50, Miss L. J. Lawndes and W. N. Blackaller.

Class "B"—Smaller gardens: 1. Wender challenge cup and 12. F. B. Robinson; 2. 110. Mrs. James Robinson; 3. 87. R. Battison; 4. 84. Mrs. A. V. Bryant.

Successful exhibitors in the monthly competition were: 1. Mrs. A. V. Bryant, Floral—E. W. Darcus, G. C. Howell, Albert Smith, H. W. Cooper and F. J. Wiley.

Vegetable—A. Green, T. Astley, Dr. A. G. Price and F. B. Robinson.

An excellent musical programme had been arranged in which the following artists assisted: Vocal, Misses Audrey and Deen Bennett and Charles Stappleton; instrumentalists, Miss Mary Warren and Master Allan Baker, with George Hallett looking after the elocution numbers.

The members, with their friends, were welcomed by the president. About 150 sat down to supper.

P. E. Boulter, secretary of the association, was responsible for the vote of thanks to the artists and to those who so ably assisted him in arranging so successful an evening, this being supported by Dr. A. G. Price, vice-president of the association.

Color photographs were shown of an entirely new process on the seed farm of George Robinson, of Elk Lake.

OCTOBER LIST IN COUNTY COURT

Judge Lampman to Set Dates for Month's Sessions on Monday at 11 a.m.

A short list of trials will be set down for hearing in the County Court in October. Dates for the hearings will be set by Judge Lampman at 11 a.m. Monday. The following issues are included in the list: Nicola Eremita (Sinnott) vs. E. Rainaldi (Shaw).

T. L. Boyden (Cameron) vs. H. I. Temple (Miller).

Edwin Hornsby O'Halloran vs. H. E. Munday (Cress).

J. J. O'Brien (O'Halloran) vs. C. & C. Taxi Service Limited (Higgins).

M. S. Inglis (Bass) vs. Dalhousie Mining Company Limited (Tait).

F. T. Scott (Sinnott) vs. Harry Walker (Walls).

P. R. LEIGHTON OPENS OFFICE

P. R. Leighton, well-known barrister who has been identified with the law firm of Tait & Marchant for a number of years, has opened an office at Port and Langley Streets, on the ground floor of the premises of the B.C. Telephone offices formerly occupied by the late Capt. W. H. Logan.

Mr. Leighton has a distinguished war record. In 1907 after nearly ten years' service in the National Provincial Bank of England, he came to Manitoba. In that province, after some years school-teaching, during which he studied law and obtained the degree of Bachelor of Laws at the University of Manitoba, Mr. Leighton entered the legal profession. When the war broke out he was located in Brandon with Adolph & Blake, barristers and solicitors.

FEWER APPEALS BEFORE COURT

Aldermen Deal With Assessment Revision at City Hall

One Applicant Asks City to Raise Value of His Improvements

The annual court of revision on the city assessment roll for 1928 opened in the City Council Chamber at 10 a.m. to-day. The court this year includes Aldermen Marchant, J. L. Mara, H. O. Litchfield and John Harvey. Alderman William Marchant presided in the absence of Mayor J. C. Pendry, who was called out of town on business.

Appeals to the revision court are fewer this year than for some years past, the applications coming in the main from real estate agents on behalf of clients, and from a few private owners. While applications before the court are usually for a reduction in assessments the court will be asked this year by at least one applicant to raise the value of the assessments on his improvements.

In the boom years of 1912-13 the city court of revision was besieged by dealers and owners to raise the value of the land and improvement values placed on property for taxation purposes. After the recession of the boom the applications swung the other way around. This year, however, is the first in post-war years that an actual complaint against under-assessment has been made. The applicant is a well-known local barrister, who has been a student of city affairs for some years past.

Speaking to the continuity of the sessions to-day Alderman Marchant stated that the court would convene at

Unity Lectures to Continue Until Middle of Week

The course of lectures given by Miss Shanklin during the past week have been largely attended, and have been listened to with deep attention and appreciation. These lectures will be continued on Sunday morning at 11 o'clock, Sunday evening, at 8 o'clock on Tuesday at 8 p.m., and on Wednesday at the same hour, the last of these

studies will be given, as Miss Shanklin leaves for Portland on Thursday. The subjects will be as follows: Sunday morning, "Your Objective," Tuesday, "Substance and Form of Substance," on Wednesday, "Non-resistance," Miss Shanklin is a wonderful student, deep in her research and simple in her explanation.

St. Alban's Sunday School—St. Alban's Sunday School, Oaklands, will hold a children's service on Sunday, October 2, at 2.30, to which parents and friends are specially invited. Mr. Emmerson, superintendent, will speak on the subject of "Thankfulness."

Weekly Sunday School Lesson

COURAGE OF CONVICTION

Text: 1 Kings xviii 30-39

And Elijah said unto all the people, Come near unto me. And all the people came near unto him. And he repaired the altar of the Lord that was broken down.

And Elijah took twelve stones, according to the number of the tribes of the sons of Jacob, unto whom the word of the Lord came, saying, Israel shall be thy name:

And with the stones he built an altar in the name of the Lord: and he made a trench about the altar, as great as would contain two measures of seed.

And he put the wood in order, and cut the bullock in pieces, and laid him on the wood, and said, Fill four barrels with water, and pour it on the burnt sacrifice, and on the wood.

And he said, Do it the second time. And they did it the second time. And he said, Do it the third time. And they did it the third time.

And the water ran around about the altar; and he filled the trench also with water.

And it came to pass at the time of the offering of the evening sacrifice, that Elijah came near, and said, Lord God of Abraham, Isaac, and of Israel, let it be known this day that thou art God in Israel, and that I am thy servant, and that I have done all these things at thy word.

Hear me, O Lord, hear me, that this people may know that thou art the Lord God, and that thou hast turned their heart back again.

Then the fire of the Lord fell, and consumed the burnt sacrifice, and the wood, and the stones, and the dust, and licked up the water that was in the trench.

And when all the people saw it, they fell on their faces: and they said, The Lord, he is the God; the Lord, he is the God.

The International Uniform Sunday School Lesson for October 2, The Courage of Conviction. 1 Kings xviii 30-39.

By WM. E. GILROY, D.D.

Elijah stands as a striking and picturesque figure in Israel's history. He is a time of great spiritual unrest and danger. Backgrounds of the picture are often somewhat obscure and lacking in detail. It is a period of the history of Israel of which we lack exact historical knowledge and concerning which there had apparently gathered many legends, but in its great essential truths, in the power of its contrast between good and evil, and in its simple emphasis upon decision, in its character and conviction, the story is plain and clear.

Israel was facing the problem of contacts with surrounding peoples whose religious life was idolatrous and corrupt. Without going into details it may be remembered that much of the religion of the peoples with whom Israel came into contact was associated with immoral rites and practices. Whether this came through the corruption of an earlier and simply sincere religious feeling or whether it was simply a perversion of the religious instinct makes little difference in the actual effect.

TO SUSTAIN MORALITY

Much of the religious strictness and ritualism in Judaism had been developed with the manifest purpose of establishing and perpetuating sound morality. The "worship of heathen gods" meant for Israel sheer moral lapse, a letting down of their leaders like Moses, Joshua and Samuel, and now Elijah, whose belief in a personal God, set himself sternly against idolatry and kept the people free from contaminating influences of surrounding peoples.

In the time of Elijah the struggle to maintain the integrity of the religion of Israel had been seriously aggravated by the influence of a powerful queen, Jezebel, whose husband, King Ahab, was a man of great intensity as well as of ability. Deeply devoted to the worship of Baal, she had determined, with all a woman's persistency, to establish the worship of Baal in Israel.

Here was Elijah's opportunity. Upon

him devolved the full burden of leadership in Israel. It was a dangerous as well as a responsible task. And in the winning of his cause Elijah so spent all his strength and moral energy that he was left exhausted and discouraged, seeking a refuge in the wilderness and longing to die.

HAD TO BE REMINDED

Elijah had confidence in the power of God, but he lacked the power to estimate rightly the gods' forces that operate in human life. It was necessary for the Lord to remind him, when he complained that he only was left of the faithful in Israel, that there were 7,000 who had not bowed the knee to Baal.

Elijah's mistake has been a very common one even on the part of very conspicuous religious leaders. A Master of Belief once said that the greatest church in these days is the church outside of the churches. While that is an exaggeration, there is a fair amount of truth in it. It is always well to appreciate not only the power of God but the power that God has placed in men.

HIS CHALLENGE

Outstandingly, however, in this lesson is the great challenge of Elijah for men to declare themselves. He wants no futile compromise, no amiable and good-natured indifference, no willingness to be complacent to the powers that have the upper hand at the moment. The moral challenge of life is clear and decisive: "If the Lord be God, follow him; if Baal, then follow him."

Can any one doubt that such moral and spiritual crises are present in every age and come in the life of every man? It is this fact that gives the ancient story of great intensity and life for life today. It is of little use to read the story of his courage and decision unless our own moral fibre is strengthened and a new spirit of determination is brought into our lives.

To what one ought to be and to do what one ought to do with decisive ness is the secret of great living and of noble accomplishment. Moreover, it is the secret that every man, no matter how small his abilities and how great his fear, may discover for the enriching of his life.

PASTOR HAS MESSAGE FOR BOYS AND GIRLS

"Perseverance" Subject of Rev. Henry Knox at Emmanuel Church

Rally week was most enthusiastically observed in Emmanuel Baptist Church. Excellent congregations gathered and a spirit of harmony and hopefulness marked each service held on Sunday and during the week.

The reunion social gathering held on Wednesday evening brought together in large numbers members of the church and congregation. The Rev. Henry Knox presided, and very cordially welcomed the company. The following made a much appreciated contribution to the pleasant evening.

Cornet solos, G. H. E. Green; readings, Miss N. Sowercroft; vocal solos, Mrs. G. Anstey and Geo. H. Guy; violin solo, Mrs. F. Eileen; Miss W. Sowercroft and Mrs. G. H. E. Green acted as accompanists. Miss Q. Shields at the piano led a brief song service. The Rev. Geo. W. Dean, who was introduced as a veteran in church work, gave an address. Refreshments were served by the Ladies' Aid Society, and social intercourse was much enjoyed. The singing of the fellowship hymn, "Blest Be the Tie That Binds," brought to a close what, in the opinion of many, was one of the best attended and most profitable social gatherings ever held in the church.

The services to-morrow will be conducted by the pastor, the Rev. Henry Knox. At the morning hour of worship there will be a brief message to the girls and boys. The subject of the morning sermon will be "Perseverance," and the choir will sing the anthem, "Praise the Lord, (Mauder.)"

The Lord's Supper will be observed at this service when a large attendance is expected.

At the evening service Mr. Knox will deliver a sermon especially to young people. The theme of his sermon will be "Youth Questioning Jesus." Young people will be heartily welcomed. The choir will render the anthem "What Are These?" (Stainer.) At the close of this service the informal song service, which was popular earlier in the year, will be resumed in the school-room.

At the morning service of the First Baptist Church, the minister, the Rev. J. Strachan, will take "The Foundation" as the theme of his sermon. There are certain elements that are basic to all successful living. They form the very foundation of life. Without these, we are as a building on sand, and will find his way into the land of satisfaction. What are these elements?

In the evening, the minister will preach the fourth sermon of a series of sermons on "Religious Difficulties." His subject will be, "The Changing Universe." This sermon should be of special interest to young people, and particularly to all who find it difficult to reconcile views of the world presented in the Scriptures and the universe as we find it to-day. How can we adjust our religious thinking to the revelations of science? After all, has evolution any religious significance and in it, all where is man and what is he?

The anthem, "Thou, O God, Art Praised in Zion," by Barton, will be sung by the choir at the morning service, and Hopkins' "Hear the Voice and Prayer," will be given by the choir in the evening.

How can we adjust our religious thinking to the revelations of science? After all, has evolution any religious significance and in it, all where is man and what is he?

The anthem, "Thou, O God, Art Praised in Zion," by Barton, will be sung by the choir at the morning service, and Hopkins' "Hear the Voice and Prayer," will be given by the choir in the evening.

At the evening service of the First Baptist Church, the minister, the Rev. J. Strachan, will take "The Foundation" as the theme of his sermon. There are certain elements that are basic to all successful living. They form the very foundation of life. Without these, we are as a building on sand, and will find his way into the land of satisfaction. What are these elements?

In the evening, the minister will preach the fourth sermon of a series of sermons on "Religious Difficulties." His subject will be, "The Changing Universe." This sermon should be of special interest to young people, and particularly to all who find it difficult to reconcile views of the world presented in the Scriptures and the universe as we find it to-day. How can we adjust our religious thinking to the revelations of science? After all, has evolution any religious significance and in it, all where is man and what is he?

BISHOP HUSTON AT ST. JOHN'S CHURCH

Harvest Thanksgiving Services to be Held To-morrow; Special Music

Harvest Thanksgiving services will be held in St. John's Church on Sunday, and Rt. Rev. S. A. Huston, Bishop of Olympia, will be the preacher.

The services will consist of Holy Communion at 8 o'clock, morning prayer and Holy Communion at 11 o'clock, children's service at 2.30 and evening service at 7.30.

The church has been beautifully decorated with grain, flowers, fruits and vegetables, and special music will be rendered by the choir. Besides the well-known harvest hymns, "Come Ye Thankful People," "We Praise Thee, O God," "To Thee, O Lord, Our Hearts We Raise," there will be the Harvest anthem, "Praise The Lord, O Jerusalem," by Christopher and "Nunc Dimittis," by Christopher.

On Tuesday evening, October 4, a Harvest Supper will be served by the Ladies' Guild of St. John's, at 6 p.m., in the school room. This will be followed by musical programme of exceptional interest.

More than usual interest attaches to these services because this is Bishop Huston's first visit to Victoria, at the invitation of Rev. F. A. P. Chadwick, rector of St. John's Church.

IN OUR CHURCHES

SALVATIONISTS VISITING COAST

COMMISSIONER RICH ARRIVES ON COAST

Salvation Army Leader, Now at Vancouver, Will be in Victoria October 9

Commissioner Charles T. Rich, the head of the Salvation Army in Western Canada, arrived in Vancouver to-day for the purpose of holding special services of evangelism on the coast and for the dedication of the new Grace hospital under the care of Brigadier Payne.

He is accompanied by Mrs. Rich, and will meet in Vancouver one of the staff officers from the Winnipeg headquarters, Brigadier Annie Park, the secretary for women's social work.

The programme of Commissioner Rich on the coast will include two addresses in the Vancouver citadel, morning and evening, on October 2, as well as the dedication of the hospital in the afternoon. On Tuesday, October 4, he will visit the corps of the army in Chilliwack. On Wednesday, October 5, he will meet the Vancouver advisory board, the members of which confer with the officers of the army on important social questions, and on Thursday, October 6, he will address the members of the Lions' club at their luncheon.

For the week-end of October 9 Commissioner Rich and Mrs. Rich will be in Victoria, where a series of services of earnest evangelism will be conducted. On October 13 they will be at Glenora, Alberta, where they will conduct a meeting in the Evening Home of the army, where eighty old people are cared for by the organization. On October 14 they will take part in an important gathering at the Grace hospital of the army in Calgary.

Commissioner Rich will, on October 6, complete three years of very active service in Western Canada.

Commissioner Rich will be back in Winnipeg on October 16 to take part in the annual congress for officers and the opening of the new college building.

DR. CLAY DEDICATES CHURCH IN TORONTO

New Calvin Presbyterian Church Is Impressive Building

Toronto, Oct. 1.—With the moderator of the Presbyterian Church in Canada, Rev. Dr. W. Leslie Clay of Victoria, B.C., officiating, and more than 1,000 people present, the dedication of the new Calvin Presbyterian Church, DeLisle Avenue, North Toronto, was an impressive occasion. The new church, built of stone, with its imposing twin towers and stately colonial style of architecture is an important addition to the many fine church buildings in Toronto. With large Sunday school and church rooms, which were open for inspection Thursday night, the manse and site, the cost of the church plant was \$215,000. The church auditorium, with a gallery in each transept, and above the entrance, seats between 900 and 1,000 people. Rev. Joseph Wasson is the minister and Albert Proctor, organist and choirmaster. At the opening dedicatory service an address was given by Rev. Dr. Clay, and a sermon by Rev. J. B. Paulin, Rev. G. M. Dunn pronouncing the opening prayer. The minister and congregation jointly took part in the dedicatory vocation and the hymns included "O God of Bethel" and "Thou Whose Unmeasured Temple Stands." Mrs. Kennedy, soloist, sang "How Lovely Are Thy Dwellings."

Forks were first used in Italy in the latter part of the sixteenth century. Queen Elizabeth was the first English sovereign to use one, which was considered a great affectation. A celebrated divine even preached a sermon against them, as an insult to the Almighty, who gave us fingers for the purpose.

NOTED EVANGELISTS

REV. WILLIAM (BILLY) BLACK

Rev. William (Billy) Black and M. Lola Black are now in the city conducting an evangelistic campaign at the Pentecostal Hall, Broad Street. Mr. Black is unique both as to his preaching and singing. Mrs. Black has a rich contralto voice of rare quality. Mr. and Mrs. Black have just returned from Europe, working in the interests of evangelism. The visiting evangelists are a Fundamentalist, an ordained Baptist minister, and has held the chair of dean in a southern institution.

MARGUERITE LOLA BLACK

Rev. William (Billy) Black and M. Lola Black are now in the city conducting an evangelistic campaign at the Pentecostal Hall, Broad Street. Mr. Black is unique both as to his preaching and singing. Mrs. Black has a rich contralto voice of rare quality. Mr. and Mrs. Black have just returned from Europe, working in the interests of evangelism. THREE CHILDREN DIE IN FARMHOUSE FIRE

Upset Coal Oil Lamp Blamed For Huntoon Tragedy

Huntoon, Sask., Oct. 1.—Three children of Mr. and Mrs. William Briggs were burned to death last night when the eldest upset a lamp from a dresser near a bed in which the three had been put to bed. The fire occurred at the home of William Hutchinson, farmer of Huntoon. The dead: Bernard Briggs, two-and-one-half years old; Leslie and Lewis Briggs, twins, two months old. Bernard was in a crib near the dresser and the twins were in a double bed. It is believed Bernard pulled the dresser scarf, upsetting the coal oil lamp.

France Answers U.S. On Tariff Question

Paris, Oct. 1.—France's reply to the latest United States memorandum regarding the tariff question has been handed to Sheldon Whitehouse, the charge d'affaires, and will be forwarded to Washington to-day. The agreement between Mr. Whitehouse in behalf of the embassy and M. Bogdanowicz, representing the French Government, was that nothing would be allowed to reach the public as to the character of the reply until it has been received in Washington. It is not good that the man should be alone.—Gen. H. H.

CATHEDRAL PRETTY AT FESTIVAL TIME

Christ Church Decorated For Occasion of Special Services

Christ Church Cathedral has been prettily decorated by the Chancel Guild for the annual harvest festival to-morrow. An abundance of grain, fruits, flowers and vegetables suggest season for the thanksgiving services arranged for Sunday morning, afternoon and evening. Services of Holy Communion will be held at 8 a.m. and after shortened matins at 11 a.m. Smart's Te Deum and Maundy's communion service will be sung by the choir. The Dean will preach at the 11 a.m. service. A children's service will be conducted in the Cathedral at 3 p.m. when gifts of fruit, flowers and other articles will be brought and afterwards distributed in the parish. Rev. T. E. Howe will give the address at this service. Choral evensong, with festival procession and the Te Deum, will begin at 7:30 p.m. Current's anthem, "Praise Ye the Lord for His Goodness," will be sung by the choir. The churchwardens have asked for thank-offerings at the services to-morrow, to be devoted to the extensive work undertaken by the Cathedral parish, and as the mother-church of the diocese.

HARVEST SERVICES AT ST. SAVIOUR'S

Dean Quainton to Speak at Hall Opening Supper Oct. 11

Harvest thanksgiving services have been arranged at St. Saviour's Church, Victoria West, for Friday, October 7, at 7:30 p.m., when Rev. H. P. Allen will preach. On Sunday, October 9, the services will be: 8 a.m. holy communion; 10 a.m. children's service; 11 a.m. matins; 7 p.m. evensong. Special music is being arranged. On Tuesday, October 11, a harvest supper will be held in the church schoolroom, commencing at 6:30 o'clock. At 8:15 a musical evening will be held and the Very Rev. Dean Quainton will give an address. This will be the official opening of the hall since the new addition.

OUR SERIAL STORY

"The Wife & Co."

By LYLE HAMILTON

"To be sure," he said, patiently. "But this is of more importance than you think. Was Eton the name of your parents?"

"Yes. What of it?" Mrs. Potter's tone was severe, but her eyes were sparkling and her cheeks were flushed with excitement.

"Did they both die when you were about six months old?"

"They did. And the Deckers came up to New York looking for a baby, and they adopted me."

"Did you have a brother?"

"My folks said there was one—a year or two older than I was. I never saw him. Why?"

He arose and laid his hand on her shoulder. "My name was Eton, too, I'm your brother, Evangeline."

Mrs. Potter sat for a moment, frozen with astonishment. Then she rose to the occasion.

"Pleased to meet you," said she, offering her hand. "What are you traveling around under a false name for?"

CHAPTER XLIV

Molly and Bob—even little Swedie, pale and silent in her corner—sprang to their feet when Mr. Frazier announced that Mrs. Potter was his own sister.

Involuntarily the three compared the features of the man and woman, finding one another there.

There was no doubt of the resemblance. The strong nose and jaw of the man were reflected, more sharply, in Mrs. Potter's face. The deep-set eyes and the long-loved ears were identically a pattern.

"What's the idea," Mrs. Potter persisted, "of trying about your name?"

He sat down again. "I was adopted, too," he said. "It was a family by the name of Frazier. Poor people are more up to adopt babies than rich ones—and the Fraziers were poor. They were so poor that they had to let me go, before I was old enough to start to school. So I went to an orphanage."

"What did you do with the Fraziers after you grew up? Let 'em slide, I suppose?" Mrs. Potter began her legs and rested her elbows on the arms of the chair, the more comfortably to pursue the conversation.

"No, I didn't," he spoke with some impatience. "They're very old people now, living on a farm that I bought for them."

Molly and Bob had left their seat and had found places on the huge leather cushion, in order to be nearer to the centre of this family drama. Little Swedie, sighing, had dropped back into her own remote chair.

"How'd you find out about me?" Mrs. Potter asked.

"By accident," he said. "When I was hunting for Miss Holmquist's husband, I was in the town where you used to live, you know. The old village marshal knew I came from New York and asked me casually if I ever heard of Mrs. Bill Potter. He said you were an orphan."

"Well," she pouted, "it made no impression at the time, but later, on my way home with the young man, I got to thinking. Your manner—the way you speak, is very much like my own."

"We take the hide off," she agreed. "I remembered that," he continued, "and then I remembered that our features are a little alike."

"Worse luck!" said she.

"Yes, indeed," Mrs. Potter burst in. "What do you mean by that?"

"Nothing, my dear Evangeline—except that you are unfortunate to look like me," he explained hastily. "But I was going to say—when I was in my twenties I searched for you several years. I was beginning to be prosperous and I wanted you to share with me."

"We'd have fought like cats and dogs," said she.

"Likely enough."

"And I'd have fought with your wife and your children would have hated me and I'd have made you lend money to Bill Potter for me to spend—we'd have stopped speaking years ago," she concluded. "It's better this way."

"Anyhow, we can't go back and try it all over again," he said. "When can you leave your flat and move in here?"

"Leave my flat?" She blinked.

HERE'S A PAR FIVE

It's expensive these days to clothe a young lady from HEAD to TOES, but Letter Golf costs nothing. Par is just five.

HEAD

TOES

THE RULES

- 1.—The idea of Letter Golf is to change one word to another and do it in par, a given number of strokes. Try to change COW to HEW in three strokes. COW, HEW, HEN.
- 2.—You can change only one letter at a time.
- 3.—You must have a complete word, of common usage, for each jump. Slang words and abbreviations don't count.
- 4.—The order of letters cannot be changed.

The solution is printed on page 28.

careful, was going out to work for forty dollars a month!

"I don't believe life is just," she said to Mrs. Buck, as she laid off her coat and hat. "I declare, I feel like going out and being a wild woman!"

CHAPTER XLV

The lady writer threw up her hands, in delight. "How darling!" she exclaimed. "Molly stopped, in bewilderment."

don't see why it's darling if I feel like being a wild woman," she said.

Mrs. Buck took Molly by the arm with one hand and patted her cheek with the other. "It's just the way my heroines feel!" said she. "They start off being so good and then something happens and they become wild—oh, fearfully wild! Then at the end they're saved by the sweet love of a man, who has reformed!"

"That lets me out," Molly declared. "What I'm mad about is something different. I know a girl who positively

flirted with every man she could find, and she got into debt, and married a lousy liar and he stole every cent she could borrow. And now an old woman has just given her a thousand dollars!"

Her new employer clicked her tongue, in token of her own complete understanding. "Isn't it fiendish the way some people do?" she inquired. "But maybe I can work it into one of my stories."

"I wish I could work the thousand dollars into my pocketbook," said

Molly, discontentedly. She uncovered the typewriter that still awaited her on the table, and seated herself upon the dictionary that also had remained in place. "I never realized until lately how hard it is to get money."

Mrs. Buck brought out the manuscript that Molly was to copy. "It's harder when you're married," she agreed. "A man may make a lot of money, but he's always wanting something—clothes, or shoes, or carfare! It's a wonder that women make both ends meet."

The typing of "Her Maiden Pastion"—the newest work of Evelyn Ellis Ellison—proved as deeply interesting on the second day as on the first. Molly's lips were parted and her breath was coming hard before she had copied two pages, and from then on until five o'clock she scarcely paused.

The villain was such a cold devil—smearing in the heroine's face every time she prayed for release!—And he was so handsome in his black-eyed, dark-complexioned way, and the heroine was so helpless!

The only thing that Molly didn't care for in the story was that the heroine was a blonde. She mentioned this to Mrs. Buck, just before she left for the day.

"The girl who got the thousand dollars is a blonde and the story keeps reminding me of her," she said. "I don't think these light blondes make such good heroines. Do you?"

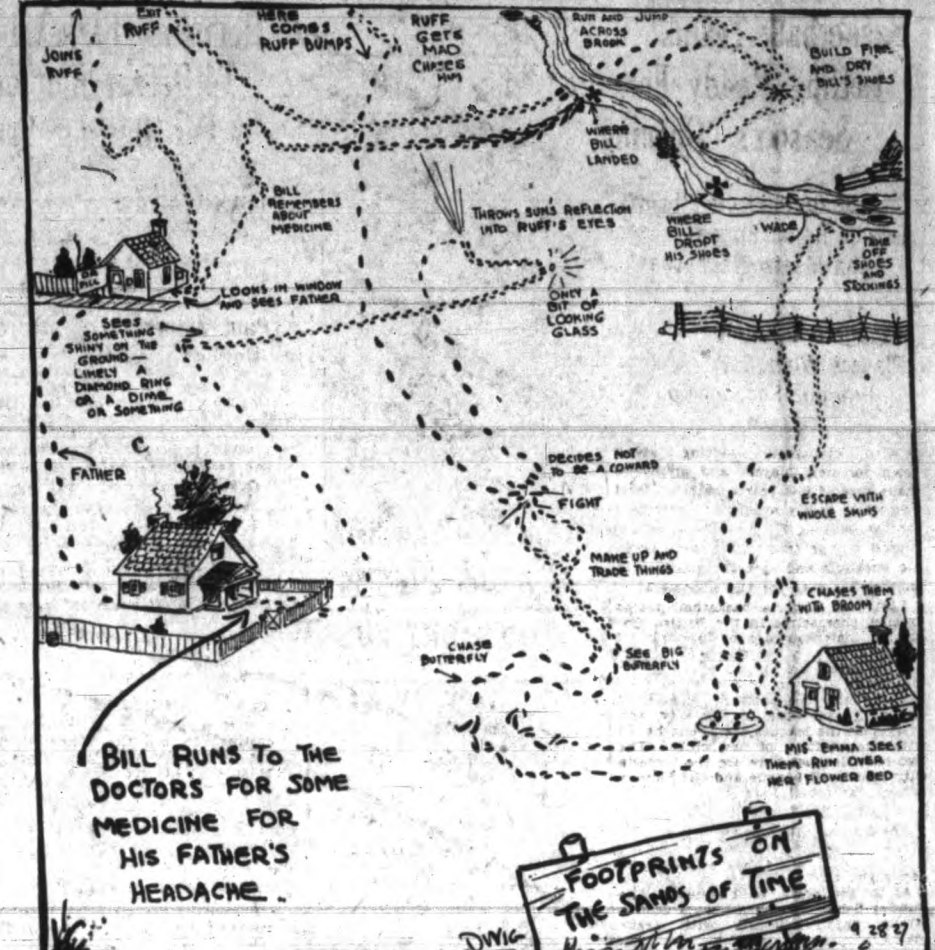

To be continued.

Basketball Teams

Getting Ready For Season's Opening

City League Elects "Scotty" Dowds Head; Sunday School Loop Meets Wednesday

Managers Scouting For New Players While Some Teams Practice For Opening

With managers scouting about town for new players and trying to make sure of last year's material, local basketball teams are being assembled for the opening of the 1927-28 season. Several of the teams have been holding workouts and everything points to another big year for the hoopers.

Last year Victoria basketball teams excelled themselves in the British Columbia championships by carrying off several titles. It was also a great year for local basketball, but officials of the leagues are looking forward to an even better time this season. Basketball has a big following in this city, and every year the leagues are strengthened with the addition of new clubs. The two main leagues here are the Victoria City Basketball League and the Sunday School Basketball League.

LEAGUES GETTING READY

The Sunday School League is making preparations for the coming season, and will hold a meeting on Wednesday night at 7:45 o'clock in the Y.M.C.A. to get down to business. The Sunday School loop has always been a strong one in Victoria with crack teams from all the churches competing. At the meeting of the City League held last night "Scotty" Dowds, well-known local athlete, was elected president to succeed Art Hole, who has held the post for the past two seasons. Gordon Woodbridge was re-elected secretary-treasurer.

ENTRIES CLOSE OCTOBER 14

Entries for the league will close on October 14, and as a number of last year's teams, along with several new ones, have signified their intention of entering, it is expected all divisions will be full and competition very keen. A committee was nominated to revise the constitution and report back to a meeting to be held October 14. All players of the City League will have to register this season, and a special form is being prepared for this purpose.

In order to obtain referees the league has requested every team entering to submit the name of a referee who will be willing to work throughout the season.

The City League decided last night to again affiliate with the provincial association.

Ladies of Oak Bay Golf Club to Start Two Competitions

The Class "A" ladies' championship of the Victoria Golf Club seventy-two-hole medal play will commence Monday, October 3, at 9 o'clock in the morning. The winner of the best gross score, and a prize will be given for the best net score. Entries must be in by 5 p.m. Friday, October 3.

Football Meeting

A meeting of the Victoria and District Football League will be held on Monday evening, October 3, in the Y.M.C.A. at 8 o'clock. It is necessary that delegates from all clubs be present.

Fifty Players Will Compete in Handicap At Colwood Course

Fifty players will tee off to-morrow morning at the Colwood Golf Club in the annual Handicap Shield Competition. Much interest is taken in this competition as the high handicap man has just as good a chance to win as the low man.

The draw for the competition is as follows:

- 9.04—H. K. Perry and J. W. Miller.
9.08—A. H. Stuart and J. V. Maston.
9.12—H. A. Hinkins and T. H. Leeming.
9.16—J. H. Stevens and C. I. Mackenzie.
9.20—W. Cathcart and B. R. Ciceri.
9.24—J. G. Cumming and George Strath.
9.28—A. D. Strath and A. Muir.
9.32—C. S. Whitting and P. Cridde.
9.36—C. Denham and H. O. Kirkham.
9.40—J. R. Richardson and J. H. Lee.
9.44—A. W. Sherret and Dr. Kenning.
9.48—Dr. George Hall and George Simpson.
9.52—A. H. MacLachlan and F. J. Hall.
9.56—C. P. W. Schwegers and W. W. Hall.
10.00—A. Christopher and G. M. Terry.
10.04—J. Matson and B. P. Schwegers.
10.08—Vincent Martin and George Brady.
10.12—Frank Thomas and E. W. Ismay.
10.16—R. J. Darcus and George Wilkinson.
10.20—Dr. Haynes and H. W. Niven.
10.24—W. Robinson and L. D. Rines.
10.28—J. W. MacIntyre and J. Scott.
2.00—T. S. MacPherson and H. Lineham.
2.04—Dr. Boyd and Comets de Sumner.
2.08—H. P. Hodges and J. N. Findlay.

SHARKEY TO FIGHT HEENEY ON NOV. 18 AT MADISON SQUARE

New York, Oct. 1.—Jack Sharkey, Boston heavyweight, and Tom Heenev, of New Zealand, heavyweight, have been matched for a twelve-round bout at Madison Square Garden, November 18, it was announced to-day.

Sharkey's last bout was with Jack Dempsey. He took the count in the seventh round. Heenev, who has fought a draw with Paulino Uzcudun, to whom he lost a decision, knocked out Jim Maloney of Boston, in the first round of their bout at the Garden last night.

Heenev is matched with Johnny Risko, Cleveland heavyweight, for a bout at Detroit October 25.

Mrs. Wilding Plays Fine Golf And Now Holds City Honors

Uplands Player Defeats Miss Schwengers by 4 and 3 in Finals For Title

Splendid Use of Iron Clubs Features Mrs. Wilding's Play Yesterday

Once again a golfer failed to win double honors in a tournament. In the finals of the women's city championship at the Uplands Golf Club yesterday afternoon, Miss Dorothy Schwengers, of the Colwood Golf Club, lost the title to Mrs. F. Wilding, of the Uplands club, by 4 and 3.

Miss Schwengers won the medal round and played good golf right through to the finals, where she lost out to a player who had wonderful control of her iron. It is very seldom that a medalist wins a title in a golf tournament and Miss Schwengers proved no exception to the old rule. Mrs. Wilding had a 44, while Miss Schwengers required three strokes more. In the six additional holes necessary to determine the championship Mrs. Wilding continued her consistent play by scoring a 37, while Miss Schwengers was four strokes behind, giving the new champion a four-hole victory.

A FINE GOLFER

Mrs. Wilding showed herself an accomplished golfer. She played a steady, straight game. She got good distance with her wooden clubs, but it was with her irons that she shone. Her putting also was good. Miss Schwengers usually had yards to spare over Mrs. Wilding with her tee shots, but was not as good in her approach.

They halved the first two holes and at the third Miss Schwengers became one up. This was the only time in the match that she had a lead. Mrs. Wilding came back at the fourth and squared the match. They halved the fifth and sixth and then Mrs. Wilding took two holes in a row. The ninth hole was halved, making Mrs. Wilding two up at the turn.

ENDED ON FIFTEENTH
Mrs. Wilding won the first two holes on the way in to become four up. She made the short eleven in two, one under par. The second hole was halved and Mrs. Wilding won another at the thirteenth. Miss Schwengers won her second hole of the match at the fourteenth and prolonged the match but when the next hole was halved in fives, Mrs. Wilding was returned the winner.

The cards were as follows:

OUT
Mrs. Wilding—5 5 6 6 5 5 6 4—46
Miss Schwengers—5 5 5 5 7 7 4—49

IN
Mrs. Wilding—4 2 6 4 5—27
Miss Schwengers—6 4 6 5 5—31

The results of the finals in other flights were as follows:

FIRST FLIGHT
Mrs. A. M. Boyd defeated Mrs. R. L. Focock, three and one.

SECOND FLIGHT
Mrs. M. Lawson defeated Miss Ruth McBride, five and four.

THIRD FLIGHT
Mrs. Cecil Eve defeated Mrs. G. C. Howell, four and three.

FOURTH FLIGHT
Mrs. M. Boyd defeated Mrs. R. L. Focock, three and one.

FIFTH FLIGHT
Mrs. M. Lawson defeated Miss Ruth McBride, five and four.

SIXTH FLIGHT
Mrs. Cecil Eve defeated Mrs. G. C. Howell, four and three.

SEVENTH FLIGHT
Mrs. M. Boyd defeated Mrs. R. L. Focock, three and one.

EIGHTH FLIGHT
Mrs. M. Lawson defeated Miss Ruth McBride, five and four.

NINTH FLIGHT
Mrs. Cecil Eve defeated Mrs. G. C. Howell, four and three.

TENTH FLIGHT
Mrs. M. Boyd defeated Mrs. R. L. Focock, three and one.

ELEVENTH FLIGHT
Mrs. M. Lawson defeated Miss Ruth McBride, five and four.

Twelfth FLIGHT
Mrs. Cecil Eve defeated Mrs. G. C. Howell, four and three.

Thirteenth FLIGHT
Mrs. M. Boyd defeated Mrs. R. L. Focock, three and one.

Fourteenth FLIGHT
Mrs. M. Lawson defeated Miss Ruth McBride, five and four.

Fifteenth FLIGHT
Mrs. Cecil Eve defeated Mrs. G. C. Howell, four and three.

Sixteenth FLIGHT
Mrs. M. Boyd defeated Mrs. R. L. Focock, three and one.

Seventeenth FLIGHT
Mrs. M. Lawson defeated Miss Ruth McBride, five and four.

Eighteenth FLIGHT
Mrs. Cecil Eve defeated Mrs. G. C. Howell, four and three.

Nineteenth FLIGHT
Mrs. M. Boyd defeated Mrs. R. L. Focock, three and one.

Twentieth FLIGHT
Mrs. M. Lawson defeated Miss Ruth McBride, five and four.

Twenty-first FLIGHT
Mrs. Cecil Eve defeated Mrs. G. C. Howell, four and three.

Twenty-second FLIGHT
Mrs. M. Boyd defeated Mrs. R. L. Focock, three and one.

Heilmann Favored To Defeat Simmons For Batting Crown

Detroit Slugger Now Within One Point of Leader and Moving Up Fast

Paul Waner, Sure Winner in National; Twenty Points Ahead of Hornsby

Chicago, Oct. 1.—While Paul Waner, the hard hitting Pittsburgh outfielder, has sealed up the National League individual batting championship for 1927, a merry contest, with the winner still in doubt, is being waged in the American circuit between Al Simmons of Philadelphia and Harry Heilmann of Detroit, the off again on again champion.

Including games of September 28, unofficial averages show that these two players are separated by the narrow margin of one point. Simmons leading with .300. The slugging Tiger outfielder, however, apparently seems destined to win the honor which he has held every other year since 1921, because of his spectacular spurt with the willow. Last week Heilmann was four points behind Simmons, who is making a great effort to become the first right-hand batter to gain the batting championship of the American League in many years.

WANER LONG IN FRONT

Pushed by the stress of Pittsburgh's pennant race, Waner is twenty points ahead of his nearest rival, Rogers Hornsby. Waner's average including games of September 28, was .302. Hornsby's was .292.

The ten leaders in the batting marathon in each league are as follows:

American League—Simmons, Philadelphia, .300; Heilmann, Detroit, .299; Gehrig, New York, .292; Fothergill, Detroit, .281; Cobb, Philadelphia, .267; Combs, New York, .272; Ruth, New York, .252; Goslin, Washington, .237; Meusel, New York, .229; Cochran, Philadelphia, .228.

National League—Waner, Pittsburgh, .302; Hornsby, New York, .292; L. Waner, Pittsburgh, .291; Stephenson, Chicago, .282; Taylor, Pittsburgh, .284; Frisch, St. Louis, .266; Hanks, Pittsburgh, .260; Hefey, St. Louis, .258; Harper, New York, .226; Terry, New York, .224.

WON TEAM BATTING HONOR

The New York Yankees, American League champions, have also won the championship for team batting, with a percentage of .306, leading the Athletics by four points. The Pirates led the National in team batting averages yesterday by the same percentage, being nine points ahead of the Giants.

White Hoyt of the Yankees, apparently has turned in the best pitching performance of the American League, winning twenty-two, losing seven, for a percentage of .309. The National League pitching championship is somewhat in doubt; Jess Haines of St. Louis, Larry Benton of New York, Grimes of New York, Gramer of Pittsburgh, are having a close race for percentage honors. Haines leading with a mark of .697.

Leading pitchers in each league follow:

National League—Haines, St. Louis, .697; Benton, New York, .696; Grimes, New York, .693; Kremer, Pittsburgh, .692; Meadows, Pittsburgh, .679; Alexander, St. Louis, .677; Hill, Pittsburgh, .676; Henry, New York, .647; Root, Chicago, .634; Pittsimmone, New York, .630.

American League—Hoyt, New York, .730; Snodgrass, New York, .739; Moore, New York, .737; Haddy, Washington, .700; Lisbee, Washington, .692; Penock, New York, .692; Ruetner, New York, .684; Grove, Philadelphia, .625; Lyons, Chicago, .600; Hudlin, Cleveland, .586.

In the National League Philadelphia and Cincinnati are tied for the team fielding averages prize, each having a percentage of .975. The Cubs are third with .973. In the American League, Chicago and Philadelphia are also tied in that department with an average of .971.

MEN'S MEDAL COMPETITION

Monthly medal and bogie competitions at the Maraulay Point Golf Club will be resumed to-morrow when a men's medal competition will be staged.

Golfers You Have Met

By Kent Strass

While ten thousand fans realized their "big thrill," Tom, unconcerned crashed the ball into the bleachers to erase his old mark of fifty-nine, set by himself in 1921 which he tied on Thursday.

Babe had been pulling for the new mark for six years. The veteran pitcher, Zachary of the Washington Senators, had the distinction of hurling the ball which made the dream come true. It happened in the eighth inning, with one strike and one ball on the Babe.

\$1,000 PER HOMER
Summing up Ruth's activities for the season, it looks like Colonel Ruppert paid more than \$1,000 for each homerun as the idol of the baseball fans rates as \$70,000 a year.

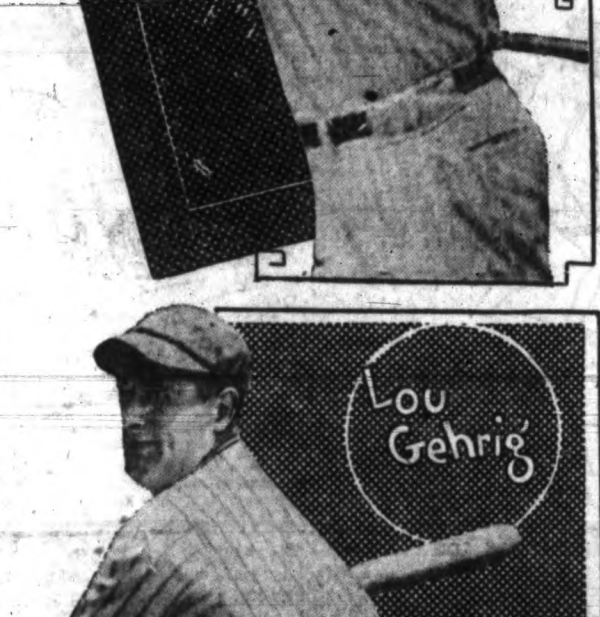

Since 1915 when he started bludgeoning with the Boston Red Sox, Ruth has hit four hundred and sixteen homeruns.

Not until 1919 did Ruth start carrying four-baggers to any great extent. He made twenty-nine in that season with Boston. With the same team he connected for four homeruns in 1915, three in 1916, two in 1917 and

NO "TRICK" HOMERUNS AT PITTSBURGH

BABE RUTH

Lou Gehrig

If the Pittsburgh Pirates win the National League pennant, and it looks almost certain that they will, Babe Ruth, the homerun king, and his able assistant, Lou Gehrig, of the New York Yankees, will find it rather hard to make circuit-swats at Forbes Field, the Pirates' home field. The seating capacity is 35,000, and this number will be augmented by 4,000 bleacher seats erected outside the field but above the level of the left field fence.

This will prevent the Yankees' slugs from dropping short flies into temporary stands, such as were built in the Pirates' field two years ago. Forbes Field is one of the largest in the major leagues, and the homerun boys will have to work hard to get their favorite wallop.

Ruth Rewarded After Seven Years' Effort

Tom Zachary, Veteran Hurler of Washington, Has the Honor of Serving Up Ball Which Bambino Nicked for New Record; Babe Has Hit 416 Homeruns Since He Started Bludgeoning With Boston in 1915

New York, Oct. 1.—Babe Ruth may hit another homerun or two, but what does it matter?

The great, heavy-hitter of the Yankees produced No. 60 yesterday, establishing a new record for homeruns in a single season.

While ten thousand fans realized their "big thrill," Tom, unconcerned crashed the ball into the bleachers to erase his old mark of fifty-nine, set by himself in 1921 which he tied on Thursday.

Babe had been pulling for the new mark for six years. The veteran pitcher, Zachary of the Washington Senators, had the distinction of hurling the ball which made the dream come true. It happened in the eighth inning, with one strike and one ball on the Babe.

\$1,000 PER HOMER
Summing up Ruth's activities for the season, it looks like Colonel Ruppert paid more than \$1,000 for each homerun as the idol of the baseball fans rates as \$70,000 a year.

Since 1915 when he started bludgeoning with the Boston Red Sox, Ruth has hit four hundred and sixteen homeruns.

Not until 1919 did Ruth start carrying four-baggers to any great extent. He made twenty-nine in that season with Boston. With the same team he connected for four homeruns in 1915, three in 1916, two in 1917 and

eleven in 1918. This is what he has done with the Yankees:

1920—Fifty-four homeruns.
1921—Fifty-nine.
1922—Thirty-five.
1923—Forty-one.
1924—Forty-six.
1925—Twenty-five.
1926—Forty-seven.
To date in 1927—Sixty.

Saw Fight Pictures And Returns Wager He Won on Tunney

Sacramento, Cal., Oct. 1.—Tom Brock, a salesman, last night returned \$500 won from Jack Burton a fellow salesman, in a wager on the recent Dempsey-Tunney fight.

"I saw the fight pictures and I can't take the money," Brock explained.

German Still Leads

Chicago, Oct. 1.—Erie Hagenicher of Germany last night strengthened his grip on Cochran's world 18.2 ball line billiard crown by winning the second block of their titular 1,500-point match, to gain a lead of 1,600 to 708.

Cincinnati Again Step In And Halt Decision In Race

Pittsburgh Beaten by Reds and so no Winner Named Yet in National League

Critt and Lucas Star Against Pirates; Giants Counted Out

Blocked in the first skirmish with the Reds from slipping into the National League championship harbor, the Pirates are still waiting with their pennant tag to breeze over the finish line.

After tossing the Cubs for four straight setbacks, the Pirates engaged in the first of a three-game series at Cincinnati yesterday and lost 2-1. Red Lucas allowed only six hits.

Pittsburgh has two games to play and needs only one victory to take the pennant even though the second place Cardinals capture two remaining contests. St. Louis did not play yesterday.

CRITZ'S DOUBLE HELPS

Aldridge started in the box for Pittsburgh against the Reds and was scored upon for all of Cincinnati's runs, retiring after the seventh inning in favor of Miljus. Singles by Allen and Ford and Critz's double gave the Reds a run in the sixth and in the next inning the deciding run crossed.

While the slants of Lucas were poison for the usually heavy hitting Pirates, Hughey Critz was also constantly annoying to the league leaders. The crack little second sacker was all over his side of the field, dashing particularly with running stops that choked off Grantham in the fourth and Aldridge in the fifth. Hughey also shone at bat.

The lone Pirate run came in the eighth when Brickell forced Harris, third on Smith's single and scored on an infield out. L. Waner forcing Smith.

GIANTS OUT OF IT

Brooklyn pushed the Giants out of the running by driving out a 10-5 victory behind the pitching of Dazzy Vance, who stopped the New Yorkers with six hits. The loss put the Giants a full game behind the second place Cardinals.

The Boston Braves defeated Philadelphia 12-2.

The Yankees turned in on victory No. 108 off the Washington Senators by four to two. Babe Ruth's sixteenth homer, with one on breaking a 3-2 tie and shattered Ruth's own record of fifty-nine homeruns in a season.

Chicago swept a doubleheader with the Detroit Tigers by 5-4 and 4-1. The St. Louis Browns split a doubleheader with the Indians, annexing the closing game by five to four, after dropping the opener by the same score.

Yesterday's results were as follows:

NATIONAL LEAGUE

Pittsburgh R. H. E.
Cincinnati 1 0 0
Batteries—Aldridge and Goeck; Lucas and Picinich.

New York R. H. E.
Brooklyn 5 6 1
Batteries—Henry and Cumming; Vance and Deberry.

Philadelphia R. H. E.
Boston 2 0 0
Batteries—Faber, Scott and Jonnard; O'Donnell, Genewich and Hogan.

AMERICAN LEAGUE

First game—R. H. E.
Detroit 4 9 2
Chicago 5 9 1
Batteries—McCurdy; Gibson and Bassler; Thomas and McCurdy.

Second game—R. H. E.
Detroit 1 0 0
Chicago 7 0 0
Batteries—Sloneker and Woodall; Faber and Crouse.

First game—R. H. E.
St. Louis 5 8 6
Cleveland 4 10 0
Batteries—Hudlin and Sewell; Blas-holder and Schang.

Second game—R. H. E.
St. Louis 9 13 2
Cleveland 7 10 0
Batteries—Underhill, Kain and Myatt; Wright and Dixon.

Washington R. H. E.
New York 2 5 0
Batteries—Zachary and Ruel; Pippas, Penneck and Bengough.

COAST LEAGUE

San Francisco R. H. E.
Oakland 2 8 3
Batteries—Ferguson, Turpin and Jolly; Delaney and Read.

Seattle R. H. E.
Holly 7 8 3
Batteries—Nance, Guillard, Borrean; McCabe, Teachout and Cook.

Los Angeles R. H. E.
Sacramento 4 10 2
Batteries—Cunningham and Hannab; Keefe and Severid.

Portland R. H. E.
Mission 8 15 3
Batteries—Hughes and Yelle; Pilleto and Baldwin.

University Women Plan Annual Ball

The University Women's Club has arranged to hold its annual ball at the Empress Hotel on Thursday, November 3. The club is already busy on preparations for this event, and they anticipate that their efforts will be crowned with both social and financial success.

Dempsey Given A GREAT RECEPTION BY NEW YORK FANS

New York, Oct. 1.—Although he failed to regain the heavyweight championship, Jack Dempsey in as popular as ever with New York fans.

Stepping into the arena at Madison Square Garden last night before the Heenev-Maloney bout, Dempsey was given thunderous applause by 15,000 admirers. Jack and his wife, Estelle Taylor, appeared at the ringside as the principals of the main bout climbed to the platform. Mrs. Dempsey watched the bout from Tex Rickard's private box.

Heenev, By His Win Over Maloney, Now A Main Contender

New Zealand Heavyweight Quickly Puts Boston Fighter Away

New York, Oct. 1.—Tom Heenev, New Zealand heavyweight, became a big factor in the heavyweight elimination series by his spectacular victory over Jim Maloney, of Boston, in the first round of their match at Madison Square Garden last night. Just one minute and seventeen seconds were required to put Maloney away.

Maloney was at one time highly touted as a champion, but he was knocked out by Jack Sharkey, of Boston, inside seven rounds. Heenev, however, polished off Maloney much quicker than Sharkey.

Two hard rights which found Maloney's uncovered jaw sent the former title contender to his knees before the bout was fairly under way. Maloney propped himself upon his hands on the count of nine, but got no further. Maloney weighed 205 and Heenev 198.

Wilkesboro, Pa., Oct. 1.—Tiger Flowers, former middleweight champion, last night battled his way to a judges' decision over Pete Latzo, of Scranton, former welterweight titleholder, in ten rounds. Latzo made his middleweight debut after surrendering his welterweight crown to Joe Dundee, of Baltimore, a few months ago.

San Francisco, Oct. 1.—Billy Adams, New Orleans welterweight, won on a foul last night in the second round of his scheduled six-round bout with Joey Silver of San Francisco at Golden Gate arena here. The boys were fighting at a fast pace, when Adams collapsed and claimed a foul. The official physician sustained his claim.

Madrid, Oct. 1.—Anoulio Ruiz, featherweight champion of Europe, successfully defended his title by outpointing Barbent, the challenger, in a ten-round bout last night.

NEARLY IMPOSSIBLE TO CUT DIVOTS IN SOUTHERN COURSES

I wrote recently about a new wrinkle I had added to my iron play at Minikahda. The characteristic feature of the new play was a smashing blow through the turf, taking rather more of a divot than had formerly been my custom. When I returned to the course, I found that the turf was so hard that it was impossible to cut a divot. This was due to the fact that the turf was so hard that it was impossible to cut a divot.

HELPFUL HINTS BY GOLFING STARS

By Special Arrangement With Golfers' Magazine, Chicago

GEORGE DUNCAN DESCRIBES HIS CLUBS

Of late there has been a good deal of discussion as to the golfer's kit—how many clubs he or she should carry, and the kind that are particularly adapted to the use of the average player.

Having been asked to set down my views on this subject, it is an almost essential prelude that I should give details of my own equipment, for, naturally, one has faith in the collection that one has evolved after many years of trial.

We know that Miss Alexa Stirling, former United States woman champion, makes a very successful play of the use of fifteen clubs, and that J. H. Kirkwood, the open champion of Australia and New Zealand, is content with seven. (These are by way of being extremes in abundance and scarcity—at any rate, in the case of golfers who are bidding for the world's highest honors on the links.)

If I may lay the flattering unction to my soul, my set of nine clubs represents the happy medium. It is constituted as follows: Driver, brassie, spoon, driving-iron, mid-iron, mashie-iron, mashie, maulie, niblick and putter.

(Copyright, 1925.)

WHAT IT COST FLINN

New York, Oct. 1.—Leo P. Flynn, manager for Jack Dempsey, said in court yesterday that he lost \$40,000 at the Chicago fight because he made two bets "on the right man but the wrong referee." His place in the money at \$20,000 to \$50,000 and \$10,000 to \$16,000.

Victoria Branch of Life Saving Society To Stage First Gala

University Women Plan Annual Ball

On Friday, October 7, the first annual swimming gala of the Victoria branch of the Royal Life Saving Society will be staged at the Crystal Gardens. Art Scott and W. T. Barret will represent Victoria against the Island aquatic team. In the ladies' division the city will be represented by Mrs. R. W. Hibberson and Mrs. E. Steel. These people won the right to represent Victoria at the elimination tests held last night.

A fine programme of water events is being arranged.

Bobby Jones On Golf

Golf Vastly Different In North and South—Bermuda Greens Difficult to Put On

To most people golf is golf and little thought is given to the important question whether the game is played in south Georgia or Pennsylvania. But there

at the top of the National League. Both of them have to wear the plate but they are very effective nevertheless.

In The Automobile World

One Child Killed Daily Traffic Lights Planned

Maxwell Street District in Chicago Is Playground for
Multitude; All Methods for Recreation Have Failed
to Save Life

Chicago, Oct. 1.—The Maxwell Street district, most densely populated district of this city, where one child is killed every day by automobiles, is soon to have a modern traffic light system installed. The lights will be installed on seven streets in the area, in an effort to save the lives of children who are forced to use the thoroughfares as playgrounds for lack of other facilities.

Maxwell Street is the great outdoor market of Chicago's ghetto. Bearded Jewish merchants, patriarchal in their heavy whiskers, long coats and ancient derby hats, sell from rickety booths built in the streets or wheeled "shops" that are put in place at dawn and kept open as long as a possible customer remains in sight.

Many of the merchants have become "squatters" and continue selling anything from clothing to bakery goods undisturbed by eviction threats, condemnation proceedings and fire hose floods.

"There are more children in one block in my section of the city than

there are in one square mile of most other sections," said Alderman A. J. Prignano.

"Maxwell Street is the rare exception," said J. H. Kinney, general manager of the Cyclone Fence Company of Waukegan, Ill., who has made long study of the playground situation. "Almost always, no matter how crowded the district, it is possible to arrange playground space, correctly laid out and carefully fenced, for the protection of the youngsters."

"In some instances the playgrounds are put on roofs, with suitable fencing and netting to protect the kids and keep a two-bagger from knocking out a pedestrian many feet below. But Maxwell Street, with its throngs of youngsters, defies all the methods with which 800 cities have established more than 10,000 separate playing places devoted to the recreation and safety of the children.

"There still are many other cities and towns, however, where children are in as great danger as ever, and where they could be made safe at very little effort and expense."

HOW'S SHE HITTING HINTS ON CAR CARE

By ISRAEL KLEIN

It's poor driving, probably, that causes the first clinking of the engine when it pulls up a hill. Later, if that isn't corrected, it turns out to be a knock that can be taken out only by the garage mechanic.

This, of course, is the most common of all engine knocks. There are a dozen of more other varieties.

The clink, clank of the engine when it's pulling hard, however, results first from the fact that the driver fails to use the spark lever properly at such times; and then from the presence of too much carbon in the cylinders.

A slight move of the spark lever, retarding the spark, usually corrects the first fault.

Retarding the spark when starting or when going up hill gives the engine a chance to pull harder and at a slower speed. It makes use of all mixture fed into the cylinders, at the proper time, and with unified results.

Failure to retard the spark when the engine gets an extra load hastens the end of that engine. Farther, it contributes to the accumulation of unwanted carbon on the pistons, around the valves and on the cylinder heads.

Carbon, too much of it, causes a knock similar to the spark knock. But this can't be controlled by retarding

the spark. The carbon has to be removed.

The cause of carbon accumulation may be too rich a mixture, poorly fitted, or loose pistons permitting the lubricating oil to be injected into the cylinders, an overheated engine, or poor crankcase oil.

Another kind of a knock that requires immediate and expert attention is the main bearing variety—a sort of deep, heavy thud—thud, while the car is going on the level. The bearings need tightening or replacement. In any case, they must be attended to immediately. In fact, at times it's unsafe even to go along until a garage is reached.

The main bearing knock will be loudest under a pull or load. If a bearing is unusually loose, it will cause the engine to vibrate excessively when it is speeded up.

There's danger of breaking the crankshaft if it isn't corrected immediately.

A light pound, or sometimes a clatter, means loose connecting rod bearings, and if they're completely burned out, they'll be heard at all times under all conditions. Usually, however, they're apparent when the car is going at about twenty to thirty miles an hour.

A knock almost similar to the carbon knock is that of piston slap, which is due to loose pistons or worn piston rings.

Lack of proper lubrication in the timing gears will cause another sort of knock, a loose fly-wheel another.

Loose cylinder nuts, connecting rods out of alignment, worn valve stems and valve guides, loose wrist pins are other engine troubles that cause knocking.

Outside of the spark knock, which can be remedied by the driver, all other forms notify the motorist of trouble that must be corrected by the garage mechanic. If it's only the carbon knock, least harmful of all, power is lost, fuel is wasted and the engine is worn down faster, until the knock is cleaned out.

KNOCKS ARE PHOTOED

A spectroscopic is being used at Mt. Holyoake College to "photograph" engine knocks. The slightest impurities are detected when artificial rainbows are created in the cylinders.

AUTO CLUB NOTES

An immediate survey of the Revelstoke-Garden Highway is urged upon the Dominion Government in a resolution passed by the recent meeting of the provincial directors of the Automobile Club of British Columbia.

Introduced by R. E. Perry, chairman of the highway committee, the resolution asks only for a survey of the route to determine the feasibility of a road through the area in question. The original resolution, prepared by Revelstoke, asked for the immediate survey and construction of the road.

Federal Aid in road construction and the matter of a non-partisan Highway Board will be taken up directly with the Minister of Public Works, it was decided at the recent provincial meeting of the Automobile Club of British Columbia.

Both these issues, which are considered of major importance by the club, have been under consideration for some time, and it was thought at the meeting that a more thorough understanding of these problems would result from a conference with the head of the department most vitally concerned.

Geo. E. Housner, president of the Automobile Club of British Columbia, has left for the East on a business trip.

The club president, who has been appointed B.C. representative on the national committee for uniformity of motor vehicle legislation, expects to call on the chairman McGregor Young, K. C., and several of the members of the committee to discuss plans for uniformity of law.

The question of speed limits and smoking regulations on the Cariboo Highway is now in committee, it is reported by the Automobile Club of British Columbia.

YOUNGSTERS ARE GOOD

More than 5,000 boys and girls from sixteen to eighteen, licensed in Connecticut under the new law, show a perfect record in driving in the last three months, the state department of motor vehicles reports.

NASH FACTORIES FORCED TO EXPAND

Expenditures For Buildings
and Additional Equipment
Total \$1,200,000

Demand for the Nash car, which since the introduction of the present new series of June 28, has been the greatest in the history of Nash Motors, makes necessary expansion at three of the company's plants, involving expenditures for building and additional equipment approximately \$1,200,000. Increased production will follow completion of the expansion programme.

Announcement of The Nash Motors Company's plans to increase production facilities to meet the demand during the 1928 season, was made to-day by C. W. Nash, President of the company. "We have found it necessary," said Mr. Nash, "to provide for greater production particularly at our Racine plant and this programme naturally involves a corresponding increase in bodies, so the Seaman Body plant at Milwaukee and the Seaman-Dunning Corporation at Pine Bluff, Arkansas, also will figure in the expansion."

At no time since July 1 has The Nash Motors Company been able to fill all orders for the Standard Six line. The programme at Racine calls for two new buildings and a large amount of additional equipment for those and for expansion in the present building at a total cost of about \$500,000.

The immense Seaman Body plant at Milwaukee will be increased in size by a new five story building 193 feet by 100 feet high, which together with the necessary additional equipment will mean an expenditure of about \$450,000.

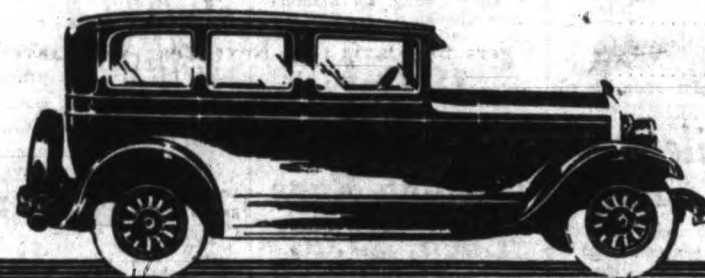

The Pine Bluff plant, which manufactures the wood parts that go into Nash enclosed bodies, will be increased by one third its present size at a cost of \$350,000. With these factory

extensions the Racine plant of The Nash Motors Company will have a capacity of from 400 to 450 cars a day. This, together with the manufacturing facilities of the Nash car plants in Kenosha and Milwaukee, is expected to place the company in a position to care for the increasing demand during the 1928 season.

4 Great Cars in 4 Great Markets

CHRYSLER cars are designed and built for people who want that extra something which makes all the difference between performance and value that are merely satisfactory and performance and value that are truly distinctive.

Pick-up, power and speed that amaze as much as they exhilarate—Instant responsiveness to steering wheel—brakes that positively

insure safety—most unusual riding comfort—marked freedom from mechanical cares—alluring smartness of line and color.

There are four great lines to meet the four great divisions of the market—"52," "62," "72" and the Imperial "80." See them. Among them you are bound to find the car that exactly fits your needs—the car that actually provides that "extra something" at a price unbelievably low.

REO FLYING CLOUD

She is the "Ideal" of the Engineers

SHE is not an eight nor a four but a six—the ideal engine, say the engineers.

—She is not 116" long, nor 126", but exactly 121"—the ideal length, say the engineers.

—She does not have a valve-in-head motor nor a sleeve valve motor, but an L-Head motor—the ideal type, say the engineers.

—She does not have cantilever springs, neither worm gear nor hypoid gear final drive, nor a four-bearing crankshaft, but she does have half-elliptic springs, spiral bevel gear final drive and a seven-bearing crankshaft—all ideal, say the engineers.

—She has none of the old and the obsolete, she does not offer you in 1927 the features of 1925, but from stem to stern, from roof to road, she is entirely new.

—No other car in the world today even approaches the Flying Cloud in its identity with the Engineers' Ideal Car.

—That is why a leading automotive paper has said that the Reo Flying Cloud is "the only feature in an otherwise colorless automobile season."

The Flying Cloud is a Pleasure Car

—She is a pleasure to see, to ride in, to drive, to own.

—She brings to motoring a thrill that mere passenger cars never had.

—She makes old cars obsolete and many of the newest dear at any price.

—Be sure to try one out. Then you'll understand why the engineers say that such a car is ideal. You'll know that a car rightly designed and built can give you more than transportation, can make traveling a pleasure at all times.

REO MOTOR CAR COMPANY.

How 150 Automotive Engineers Agreed Upon An "Ideal" Motor Car

The Metropolitan Section of the Society of Automotive Engineers held a contest in January for the design of an "Ideal Car" for the average family. 150 leading engineers competed and their specifications were synthesized into a composite set of specifications for an "Ideal Car"—that dream of all engineers.

Ask for the booklet, "They Have and You Can," which gives a detailed comparison of the Reo Flying Cloud and the "Ideal Car."

AT THE THEATRES

DAINTY DANCERS ON PLAYHOUSE BOARDS IN DOUBLE OFFERING

Appearing at the Playhouse in conjunction with the stage production, "Irish Justice," are two dainty little dancers from Miss Violet Fowkes's Dancing Academy. They each do their own individual numbers and are proving very popular with the audiences this week.

Monte Blue, star of Warner Brothers "Bitter Apples," cast in a part which gives the husky favorite a chance to be himself. Not that he cannot with equal fidelity portray the sophisticated. Those who have seen him in those subtle whimsicalities of light comedy, "The Marriage Circle," "Kiss Me Again," "The Man Upstairs" or "So This Is Paris," will vouch for his ability to portray the man of the world. But there is another uproarious

Crystal Garden—Swimming and Dancing.

knock-'em-down-pick-'em-up Monte Blue. Witness "Red Hot Tires," "Hogan's Alley," "The Limited Mail," "Wolf's Clothing" and "Across the Pacific." Blue's life has been none of the silver spoon varieties. After years in a Soldiers and Sailors' Orphanage and some time spent in a Manual Training School in his native Indiana, he set forth on his own.

DOG STARS IN COLUMBIA FILM CLOSING TO-DAY

Canyon Bridge is down! A dog rushing on trying to save hundreds of lives. The locomotive racing forward at a terrific rate of speed, its long line of cars filled with happy, careless people, with no inkling of the impending disaster. The engineer, sitting at the wide-open throttle, trying to see through the gathering dusk. Each click of the wheels seems to be screaming, "stop" but in vain.

The engineer suddenly stiffens in his seat, his hand reaches for the brake. What is that on the track? A dog carrying a red flag! The engineer jams on the brakes and the train halts within a few yards of the gaping canyon.

Ranger has saved the train. But that is only one of the many heroic deeds that this dog star does in his latest

picture, "The Outlaw Dog," now playing at the Columbia Theatre.

STAGE AND SCREEN HITS AT CAPITOL CLOSING THE WEEK

The specialties at the Capitol Theatre for this week include the Carlton Sisters and Mack in a novelty presentation, which introduces several popular melodies. Aurelio Sciacqua, the Italian tenor, who is delighting patrons with his very fine singing, and last, but not least, Syd Barnes, the comical English monologist.

SYD CHAPLIN PLAYS LEAD IN DOMINION COMEDY OFFERING

"A little more pep, there," he shouted. "Come on, once again—and treat 'em rough!" That the life of a comedian is not always as soft as the inside of a pie was proven by Syd Chaplin while making scenes for Warner Bros. "The Missing Link." A scene in which Syd is manhandled by a group of wharf rats was rehearsed and shot; but not to the satisfaction of Charles F. Reisner, the director.

Being under orders what could the supers do but hand Syd the real stuff. After a rough-and-tumble three minutes, Reisner called, "Cut," and the scene was satisfactorily completed.

When the audience had dispersed, however, Chaplin lay where he had been thrown. He was moaning. Fearing for his safety, Reisner rushed to Syd's side.

He learned that the star was moaning because he had, in fact, broken a pipe, a good English briar, which he had used constantly for ten years. In the movie trophies have to be sacrificed for the sake of realism, and the action went on from that scene. In the supporting cast of "The Missing Link" are Ruth Hiett, Tom McGuire, Crawford Kent, Sam Baker, and others.

Syd Chaplin in "The Missing Link" now at the Dominion Theatre.

HARPIST HERE MONDAY WITH SOUSA

Miss Winifred Bambrick

"CAMILLE" CAPITOL FILM PLAY COMING TO LOCAL SCREEN

"Camille," that tried and true classic that never fails to move young and old alike with its inspiring romance and better tragedy, is once again a local entertainment feature. This time it is the old, yet new, "Camille" that comes to us—for the famous love story of almost a hundred years ago, is presented in modern style.

Those lovers of the old classics who fondly insist that such tales are ever new, will find their point most admirably sustained in Norma Talmadge's modernized screen version of "Camille," which opens on Monday at the Capitol Theatre.

And those of the young generation who are not so well acquainted with Alexandre Dumas's masterpiece, will see on the screen a love tale so refreshingly up to date that it is as the work of a nineteenth century novelist. Such is the happy result of Miss Talmadge's embellishment of the celebrated romance with ultra-modern manners and customs.

Norma's conception of the "Lady of the Camellias" is undoubtedly destined to be recognized as one of the greatest historic achievements. An actress of lesser ability, unable to interpret so feelingly the tense emotional qualities of "Camille," might well have become merely a clothes-horse.

stantaneous applause. Miss Mystery says she will be taking movies of Canada. Well, judging by her present offerings the Dominion will be well represented both in movies and melodies. There is a big supporting programme.

AT THE CAPITOL

Ten-year Term For Edmondson Woman

Edmondson, Oct. 1—Ten years in Prince Albert Penitentiary was the sentence meted out to Mrs. Pearl Pesuk by Mr. Justice Boyle in criminal court here yesterday. She was found guilty of manslaughter by a jury following trial on a charge of murdering Joe Mykietovich of Savvy in the Athabasca district.

The accused woman collapsed and was unable to stand up to receive sentence.

MISS NEW MEXICO IS MUCH ALIVE—Miss Kitty Banks, former Folies girl and model for Howard Chandler Christy, went to Albuquerque, N.M., several years ago. New York newspapers once reported her dead, but now she appears to be very much alive as winner of a state beauty contest.

MANY UNIFORMS WORN BY SOUSA

Famous Director and His Band Will Appear Twice at Arena on Monday

What becomes of the old uniforms that Lieutenant-Commander John Philip Sousa must cast aside? When he appears on the band-stand with his musicians, he is always immaculate and his well pressed clothes give impression of just having arrived from the tailor. Of course there is a reason for this, for a personal attendant sees to it that every detail of the band-master's uniform is complete when he leaves his dressing room for the platform. Moreover, the uniform itself must be practically new, and that means that many a good suit is set aside before it has outlived its usefulness, even in a meticulous world of concert-giving.

When Sousa is on tour the uniform that seems a bit old is sent back home to be cared for by Mrs. Sousa, at the composer's residence at Port Washington, Long Island. There, it would probably be found, are numerous uniforms, many as good as new and probably long to be in oblivion. But just recently there was a reduction in the number of "left-overs." And an old uniform that would delight any band-master has come again into the open.

It all happened this way. Mrs. Sousa happened to be in Jamaica. It has a perfectly good Salvation Army contingent, but, unfortunately, finances were not just what they might be and John Philip, leader of the Salvation band, did the best he could with the suit he had. It covered him but, how it had faded! It was positively shabby. Mrs. Sousa bethought her. Why not? All that would have to be done was to take one of her husband's old suits, see to it that the gold braid was removed, and, lo and behold, there would be such a uniform for a Salvation Army musician as would make him truly proud.

So Mrs. Sousa told Mr. Sousa about it. He personally selected one of the best of his former concert suits and two days later John Philip, who leads the Salvation musicians at Jamaica, was proudly walking at the head of his little group, handsomer than ever! It seemed an inspiration too and the music took on some of the pep that has always been a Sousa characteristic.

Sousa and his band will appear at the Arena for two concerts on Monday, October 3.

MUSICAL NOTES

By G. J. D.

A song writer, living at Cobble Hill is another instance of the growth and development of music on this island. Mrs. Edna Bales, a resident of the Hill, has recently completed a "Song Cycle," and the good news has been conveyed to her that two of these, "I Had a Dove" and "Irish Nurse's Song," are about to be published by the G. E. Publishing Company, the proprietors of which are M. Esposito and Sir Stanley Cochran. A well-known local vocalist says: "I think Edna Bales's songs are very clever, the atmosphere and moods are splendid, and they are very singable." The distinguished London baritone, Plunkett Green, said of a setting in a poem of Bliss Carman's by her: "Very artistic writing."

A "Rush Song" by this writer has been transcribed for piano by Signor Esposito, a former pianist. Mrs. Bales herself is a brilliant pianist, and has been heard here with big success.

An organization of recent formation is the Bach Cantata Club of London, England. Its second season opens this month (October). A similar club is about to be formed in New York.

All music teachers are familiar with the G. Schirmer music publishers, one

TUNNEY-DEMPSEY CHICAGO FIGHT IS TO BE SHOWN HERE

The fight pictures of the Tunney vs. Dempsey fight for the world's championship at Soldiers Field, Chicago, on September 22, are to be shown at the Coliseum Theatre next week, starting October 3. These pictures will give the fight fans a chance to see for themselves that famous seventh round, which has caused such a lot of argument. And also they can then judge for themselves whether or not Tunney should still hold the title.

The fight fans will be able to take out their watches and find out whether Tunney did or did not get a long count. And also they can tell by the appearance of Tunney, whether he could have got up at any time as he could have. There is a lot of argument around the city about that seventh round, and participants on both sides cannot come to an agreement at all; but this picture should put an end to all this, and satisfy the fans for once and all.

According to the reports of the fight, Dempsey was slightly outclassed in the last three rounds of the fight, and was practically out on his feet. It was stated that he was groggy and that he spared a little after the bell in the final round, and had to be led to his corner. There are no reserved seats, all being open, so as to give everyone an even chance to see this attraction. In order to handle the large crowds that are expected, Manager G. L. Nichols will run a matinee every day in the week, at slightly reduced prices. The evening fare, so that it will be within reach of all to see this sensation of the age in fight circles. The doors open at 7 o'clock on Monday.

DOMINION WILL FEATURE MYSTERY GIRL AND FILMS

Everyone loves a mystery, especially if there is a woman in the case, when the woman is a talented artist who has won her way to fame entirely by her own enterprise, pluck and personal accomplishments, then curiosity is further stimulated. Britain's mystery film girl, direct from big successes throughout Great Britain, Australia and New Zealand, makes her first appearance at the Dominion next week. She came, was seen, heard and immediately won her way into the hearts of the large audiences being accorded a wonderful reception. Here you have an artist of more than ordinary ability, in addition to presenting a very novel and interesting act is doing much good for British Empire films. Pretty frocked and in a cultured speaking voice, she briefly explains her project and the reason she wears a mask. Her excellent movies are then screened and now comes a rare and unusual treat, for with a well-trained and sweet soprano voice, Miss Mystery accompanies each country with a song. To England she sang "An Old-fashioned Town"; Scotland, "Loch Lomond"; and New Zealand the "Waltz Pol," each song being rendered in a sympathetic and artistic manner and winning in-

of the oldest firms in America. It was established in 1848 and its present catalogue contains 60,000 compositions.

Deems Taylor, composer of the opera "The King's Henchman," given its premiere last season at the Metropolitan, New York, has become the editor of Musical America, a music weekly publication.

Twenty years ago the opera "Madama Butterfly," was first produced at the Metropolitan. Those who then took the title roles were Geraldine Farrar, Louise Homer, Enrico Caruso and Antonio Scotti. The composer, Giacomo Puccini, died in November, 1924.

The past year witnessed the fact that all musicians and musical organizations thought and played Beethoven. It was his centenary. The coming year will be dedicated to Schubert, and already prominent artists and societies are forming plans and programmes in honor of the Schubert centenary. This great "lieder" writer, perhaps the greatest song-writer who ever lived, was a contemporary of the master Beethoven, though he only knew the latter but slightly. Besides part songs, masses, piano sonatas, overtures, string quartets and ten symphonies among which is the glorious "Unfinished," he wrote no less than 650 songs. It is only necessary to mention such familiar titles as "Hark, Hark the Lark," "Evening," "Wanderers," "Benediction" and "Who is Sylvia?" to realize the world's debt to this composer, one of the most unusual figures in musical history.

List said he was "Le musicien à plus d'un titre." In poetic impulse and suggestion he is unsurpassed. His songs are fresh, vivid, spontaneous, full of rich color and of warm imaginative feeling, and like Mozart, nearly all his finest compositions were written in the last ten years of his life. He was inspired as if by an invisible force, and any lyric of the slightest germ of a poetic idea he at once wrote the song. Schumann declared he could set a handbill to music. Two of his most celebrated songs from Shakespeare poems, "Hark, Hark, the Lark" and "Who is Sylvia?" were written on the same day, the former at a tavern where he rested from an afternoon walk, and the latter when he returned home in the evening. Schubert's death at the early age of thirty-two from typhus, brought to an end a career which was practically had only been commenced. Everything pointed to the renewal of an activity, chiefly owing to the appearance of "Hansel's" in their enormous lyric possibilities making an especial appeal to his unique gift of spontaneity. In the Spring of 1828, he gave in Vienna the first and only time in his career a public concert of his own works. It was the master's last year of his life, and the date of this concert will be an interesting centenary date in 1928. To Schubert is owed the introduction into music of a peculiar quality of romance. Whatever his eye beheld or his hand touched, he turned to music.

For many years now Victoria has not missed a music season in the visit of some celebrated organist. Following each other have been Bonnet, Dupre, Courbourn, Dr. Hollins, Dr. Haig, Verne among others. The announcement, therefore, of the appearance here of Palmer Christian, a noted organist, will be hailed with delight by lovers of organ music especially. He will be heard at the Metropolitan organ.

The passing of Madame Rosina Burke, well-known singing teacher and pianist, is a decided loss to Vancouver music circles. Madame Burke was a brilliant woman, a staunch friend, a hard worker and a thorough teacher. Her musical knowledge was profound and her critics were always worth while. She was one of the West's noble pioneers, with artistic and high ideals, and in going to the great beyond she enters the greater glories of heaven's sublime harmonies that know no ending.

Mouskorsky, the brilliant Russian composer, was once an officer in the newly-formed Preobrazhensky Regi-

ment. His talents were so pronounced that he was persuaded to leave his crack regiment and devote himself to music. His best works are his songs, about thirty of them, and his national four-set opera, "Boris Godunov," is in the repertoire of the principal opera houses of Europe.

Chopin's earliest music master, Adelbert Zyzy, a Bohemian, was a veritable dandy. We are told that his parents and their color belonged to the eighteenth rather than the nineteenth century. His colored waistcoats were most original, and he usually wore a white muslin cravat, a smut-colored coat; his breeches were yellowish, and on his feet were long patent leather boots.

Lt.-Commander John Philip Sousa, America's greatest bandmaster, announced to give a concert with his band of eighty musicians here next week, was born at Washington D.C., Nov. 6, 1859. In his early days he played the violin in Offenbach's orchestra, and then conducted many travelling theatrical troupes. He was appointed leader of the band of the United States Marine Corps when he was twenty-four. King Edward decorated him with the Victorian Order on one of his tours of Europe. Besides his popular marches he has written several hundreds of compositions, including comic operas, and many instruction books for band instruments.

To-night, October 1, the British Columbia Teachers' Federation of Vancouver is holding its seventh annual banquet at the Hotel Georgia. A feature of the gathering will be a musical program by the Washington State Teachers' Federation. A silent tribute, too, will be paid the late Madame Rosina Burke, a keen and helpful member of the Federation.

Arts Society to Hold Annual Exhibition

The Island Arts and Crafts Society will hold its annual exhibition of original work, including paintings, drawings, designs and crafts in the Belmont Building on October 25 to 31. Members are limited to six works in each class—Oils, Watercolors, Miniatures, Pastels, and Encaustics, or specimens of any kind of craft other than photography; non-members to three in each class. All pictures must be framed.

All exhibits must be the original work of the exhibitors; but in the case of craft work the design need not be original. Whether the design is original or not must be stated. No work that has been exhibited at a previous exhibition of this society will be accepted.

Further information may be obtained from the secretary, J. S. McMillan, 201 Union Building.

U.B.C. TAKES RANK OF FOURTH COLLEGE IN CANADA

ENROLLMENT OF POINT GREY UNIVERSITY TO NUMBER 1,600 THIS YEAR

Rapid Progress in Work of British Columbia's Chief Seat of Learning Recorded by President Klinck as Students Start Fall Term; Members of Faculty Distinguish Themselves in Many Fields Here and Abroad

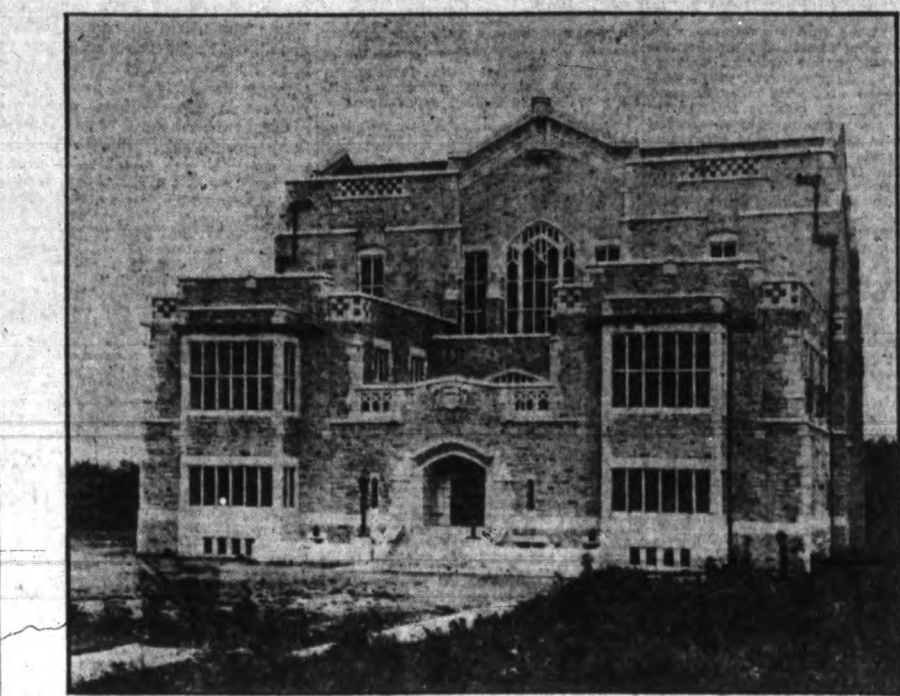

The registration of students in the University of British Columbia, when it resumed its activities on Tuesday was 1,543, seventy-two greater than in the preceding terms. It is expected that the total registration eventually will be 1,600, which makes the University of British Columbia in the number of student the fourth largest in Canada, being surpassed only by the Toronto University, McGill University and the University of Manitoba.

The progress, under various heads, made by the University of British Columbia was emphasized in an interesting address by Dr. L. S. Klinck, the president, at the opening ceremony. In this introductory remarks President Klinck particularly welcomed back to the institution members of the Faculty who had been abroad. He referred especially to Dean Brock, who had been conducting an investigation of the mineral possibilities of China for the Hongkong Government, and who also had been attending the Institute of Pacific Relations at Honolulu; Professor Sadler, who had been working with the foremost bacteriologists of England, Denmark, Sweden and Italy, and who has been appointed a member of the International Institute; Dr. Boggs, whose work has been highly appreciated by prominent American universities; particularly Leland Stanford Jr., California.

Dr. Klinck outlined work which had been done on the university grounds during the last six months, pointing out that the beautification of the area followed the plans of celebrated experts, such as Mawson of London, Laird of Philadelphia and Durley of Montreal, all being worked out in de-

DR. L. S. KLINCK, President of the University of B.C.

The B.C. University's Fine Library

tion of the Anglican and Union theological colleges on the grounds, and also service buildings, such as fire hall and workshop. He also expressed appreciation of the permanent loan collection of historical paintings of early scenes in British Columbia from the Hudson's Bay Company through Governor Sale, the Native Sons of British Columbia and John Innes, as well as the Burnett ethnological collection. The fine collection of pictures which adorned the common room was the gift of the Arts Class of '23.

On the question of student government, Dr. Klinck said:

"The year upon which we are just entering will go down in history as the one in which a new experiment, or rather a marked extension of an old experiment, became effective. By Act of Legislature the Students' Council is now recognized as official, and as having full right to exercise disciplinary powers subject only to the Faculty Council and to the Senate. Thus the

faithful discharge of the duties carried out under the relatively restricted scope of student government as constituted heretofore, has brought recognition in a larger measure of responsibility. Not only have preceding generation of students shown sound judgment in the carrying out of the rules and regulations which they themselves have approved, but they have also given abundant evidence of their ability to interpret and administer these with justice.

"In your attempt to apply rules and principles to the confused and confusing sets of circumstances which will arise in the conduct of your affairs, I need not assure you that the Faculty wish you every success. No one who has followed the development of student government from its inception into this university can have any misgivings as to the outcome of this undertaking, even though it be admittedly difficult.

"But this assembly was called, not primarily to instruct the upper classes, but rather to provide an oppor-

tunity for the freshmen to see their instructors and to listen to short addresses from the chancellor, the deans and myself. I shall, therefore, deem my remaining comments to the freshmen more particularly.

TO THE FRESHMEN

"To many before me this morning everything is new and strange. But even though you may be somewhat ill at ease for the moment, even though you may find adjustments difficult during the next few months, even though you may not know just what you are planning to do or how you proposed doing it, still there is not a man or woman on this platform who does not envy you your opportunity. To-day you are entering upon a great adventure—a great social and spiritual adventure as well as an intellectual one. Youth, enthusiasm, courage, faith and high resolve are on your side. Nowhere are more stimulating experiences likely to be yours than those which will come to you during the next four years. Nowhere will fol-

lowships be more congenial than here. Nowhere will the stimulus of active and enquiring minds be more in evidence than in these halls. Yes, we envy you and trust that you will learn quickly to understand and unreservedly to enter into the new heritage which is yours. Here in your co-operative quest for information, here where there is a fairly free interchange of ideas, there will come also the opportunity of discovering things for yourselves. This opportunity will carry with it the realization of the necessity of acquiring openness of mind, of developing penetration of insight, of cultivating keenness of discernment and of achieving breadth of intellectual interest.

"This is just another way of saying that high school days are behind you. You are now students in the university. With the transition comes changes in method, in content, in procedure, which to many of you will be nothing less than revolutionary. Lectures, texts, attendance records there will still be,

but as you progress you will discover that you must learn to use references; to become acquainted with original sources of information; to work independently, in short to do independent, yet disciplined thinking, and above all to cultivate that rarest and finest of qualities, intellectual integrity.

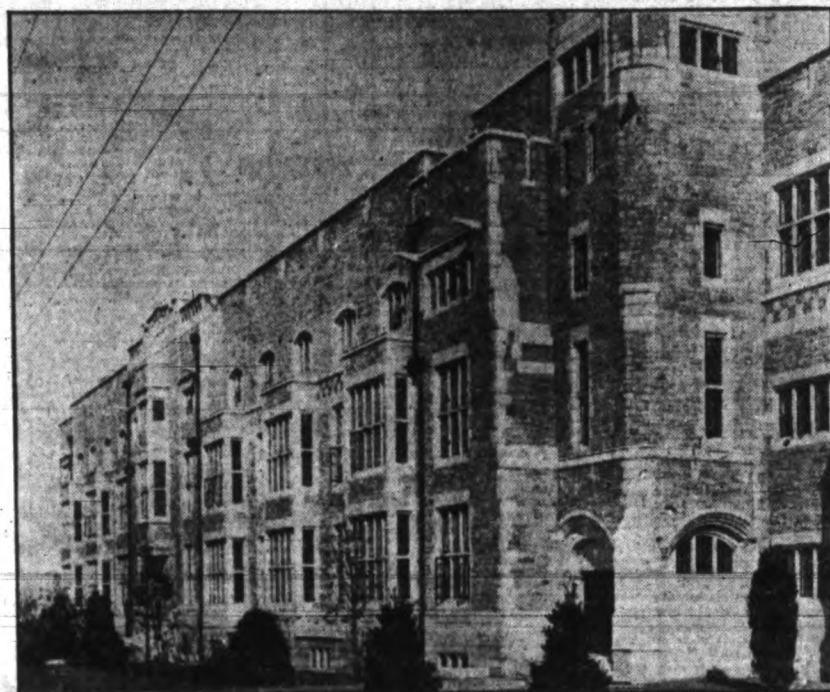

"Right thinking is the element of university life which is the most important; the one which we most wish you to recognize and appreciate thoroughly. It is the essential point which will give meaning to your university career; the consideration which will furnish the incentive and provide the dynamic to pursue your studies with resolution and success.

"Success, true success, rests with those who keep the values of life in best proportion. This morning there is not one before me who is not serious minded; not one who has not resolved to do his utmost to meet the high expectations of his parents and friend. And yet this freshman class

will be unlike any of its predecessors if some of its members do not quickly turn aside from the main purpose which dominates the life of every true student. Student life is, and should be, many-sided; but I repeat, success rests with those who keep the values of life in best proportion.

"Here, as in the world outside, every man is the architect of his own career. The university in its staff, its library and its physical equipment, has brought together men and materials from a thousand sources; but upon you, individually, rests the responsibility for utilizing these in fullest measure. All are yours. How they shall be used rests with yourself.

"Again I welcome you to the university—welcome you into that new fellowship of professors and students everywhere—welcome you into that infinitely larger fellowship of men and women of our own time, and of all time, who have devoted their lives to the discovery and promotion of those things which are true, which are lovely and of good report."

MONDAY, OCTOBER 3

8 a.m.—New York stock quotations from the B.C. Bond Corporation.

NEW MICROPHONE

The General Electric Company has devised a new and more sensitive microphone, which includes not only the mike itself, but the voice amplifier, in its construction.

MUCH ROOM FOR SETS

With only 6,000,000 sets in use, and an annual replacement market of about 2,000,000, it is believed many years will pass before saturation sets in. Total number of homes is placed at about 25,000,000.

OVER TWO OCEANS

A long distance record in radio reception is claimed by the Luke Field Radio Club in Hawaii. This amateur organization reports it talked directly with an amateur in Orleans, France, and reception was good both ways.

RADIO BURGLAR ALARM

An English firm has brought out a burglar alarm which operates by radio. When the alarm is set off, it operates a small transmitter which sends out a definite signal to receivers stationed to it. The receivers may be at any distance up to fifty miles.

RADIO PROGRAMMES TO BE REBROADCAST

Martin P. Rice Says That U.S. Listeners Will Soon Receive Foreign Entertainment

Inter-continental rebroadcasting of radio programmes is not only possible, but Canadian and American listeners soon may expect to receive entertainment from foreign countries.

This is the announcement of Martin P. Rice, manager of broadcasting for the General Electric Company, who has been experimenting for two years on the exchange of international programmes. During that time programmes broadcast from Schenectady, New York State, have been rebroadcast regularly from stations in South Africa, Australia, England, France and Cuba.

"I expect that within a short time American stations will be able to pick up and rebroadcast programme from other countries," says Mr. Rice. "I have information to such that we welcome that they expect to develop short wave transmitters which will enable American stations to pick up their programmes."

"Vagaries of weather may interfere, and transmitting sets near the receiving point may smear the received signal, but under average conditions we can predict results. It should be possible to announce in advance a rebroadcast programme and carry through that programme successfully."

Ultra-jazz Craze To Yield to Ballads, Says Irish Tenor

Radio is gradually dethroning jazz and bringing about a return to the songs of heart and home, the ballads, and story songs.

So says Allen McQuinn, popular Irish tenor of the Atwater Kent radio concerts, in the latest edition of Steven-son's Radio Magazine. McQuinn bases his opinion on thousands of letters he has received during his twenty-one recent radio concerts. The songs most frequently requested, he says, are "Mother Machree," "Absent," "I Hear You Calling Me," "Kathleen Mavourneen," "Danny Boy," "Where the River Shannon Flows," "At Dawning," "Love's Old Sweet Song," and "My Wild Irish Rose."

"Radio will in time effect the death of the present popular craze for suggestive and ultra jazz songs, Mr. McQuinn declares, though it will not do away entirely with jazz, since there has always been some similar form of syncretized music."

"Song writers have unfortunately come under the spell of the dance enthusiasts, the jazz mad crowd of youngsters throughout the country, forgetting that the great music-loving population of America is middle-aged."

"The steady increase in radio concerts by the world's greatest opera and concert stars, and the constant improvement in broadcasting generally, is marking a swing back to the kind of songs that have gone down through the ages, the old folk songs, the ballads, and the popular lyrics."

"The reason is that broadcasting stations and those sponsoring entertainment must present programmes of the broadest possible appeal, to warrant the tremendous investment."

"PICKWICK"—A SERIES OF TAPESTRIES

New York Finds It a Mighty Entertaining Old Friend: "Good News" a Splendid Musical Comedy

New York, Oct. 1.—Comfortably ensconced in an orchestra chair at the Empire Theatre, where the little Napoleon of the theatre, Charles Frohm, once offered such stars as Maude Adams, John Drew and William Gillette, we find a beautiful evening's entertainment in progress. Our old friend, "Samuel Pickwick, Esq." and his associates of the famous "Pickwick Club" are strutting the Empire stage, and the high quality of every detail of this performance is such that we welcome it into a playhouse that has known America's best theatre traditions.

"Pickwick" is not and was never intended to be a very gripping dramatic play—there is nothing gripping or dramatic in the original from which the play was taken. It is instead a series of authentic tapestries picturing in caricature the creatures of Charles Dickens's vivid imagination. Viewed as such, attendance at this play is an evening of never-to-be-forgotten enjoyment.

A CASE OF TAKING PAINS

It is said that Frank C. Reilly interviewed more than 1,000 actors in his endeavor to fill the Pickwick cast. That this is an absolutely true statement is quite believable because Mr. Reilly has done a noble piece of work in his choice of the actors.

It would be difficult to find a better Pickwick than John Cumberland or a more perfect Sam Weller than Charles McNaughton, and Bruce Winston as Sergeant Buzfuz is just as good as either of the first two named. We could go on down the cast of thirty or forty and find them all satisfactory. The costumes and stage pictures are a feast for the eyes.

And now for the milk in the week's cocoanut! It is to report that "Good

"It would be difficult to find a better Pickwick than John Cumberland."

News," at Channing's Forty-Sixth Theatre, is the best musical comedy the present reviewer ever has seen.

How they keep that thing spinning for nearly three hours is a mystery to one who has spent the greater part of his life in the theatre. This new production by Laurence Schwab and Frank Mandel will be the model or pace-setter for musical comedies for some time to come.

What Aristophanes' "The Knights" and "The Clouds" were to Athens in 414 B.C., and John Gay's "The Beggar's Opera" was to London in 1728, or

Charles Hoyt's "A Trip to Chinatown" is to New York in 1895, "Good News" is to the New York of the season 1927-28. The present indications are that this entertainment will be at Channing's Theatre for the next two years.

The fun all is woven around co-educational college life, featuring sororities and football.

It is a further pleasure to report that this company is made up of faces almost entirely new to Broadway, that the scenery was designed by Donald Oenslager, head of the scenic Design Department of Professor Baker's Drama Class of Yale University, and that the fun—which is fast and furious—is mainly in the hands of the clever John Price Jones, Gus Ely, John Sheehan, Edward Emery, Shirley Vernon, Mary Lawlor, Inez Courtney and Don Tomkins.

It may be gathered from the above hints that I liked "Good News."

The "Mr. Romeo" at Wallace's Theatre did not get away so well, even though one of its authors is Harry Wagstaff Gribble, who wrote the clever "March Hares" of several seasons ago, and J. C. Nugent of happy "Kempy" memory, plays the title role. The play tells the old routine story of the middle-aged business man—in this case he is the manager of a printing establishment—who attempts to have his fling among some chorus girls. The wife conspires with one of the girls to "teach him a lesson," etc. The play is not what we would expect from Mr. Gribble's one-half of the authorship.

"Women Go On Forever" is another case where more was expected from the author—Dahls R. Rubin—the producer, and the producers, Messrs William A. Brady Jr., and Dwight Deere Wiman. Here is a play that has a few well-written scenes but in the main is just crude and vulgar. It is a bit shocking to see Mary Boland, who will be remembered for her delightful high comedy work in "The Wife," and a very good supporting cast, wasted on such trash.

The painting of Marcus Loew has caused more sincere regret than usually is accorded to a man who had gained so much earthly power. Mr. Loew's unselfishness and other fine traits of character had endeared him to a large number of his fellow citizens.

Consolidated Fishing Trenches Mine Expansion On Coast

BIG DEPOSITS OPENED UP IN NEW PROPERTIES

Construction Programme in B.C. Planned 15 Years Ahead, L. Campbell Says

Vancouver, Oct. 1.—"During the next ten or fifteen years we shall probably never stop construction."

This remarkable statement made by Lorne A. Campbell, general manager of the West Kootenay Power and Light Company, to the members of the Empire Mining Congress at South Sloane, B.C., today, was based on the fact that the company expects to develop the expansion of the mining industry.

At present the West Kootenay has two plants in operation, Upper Bonington, yielding 32,000 h.p., and Lower Bonington, producing 60,000 h.p. Mr. Campbell spoke in the big dining hall of the construction camp at South Sloane where another unit, expected, he said, to yield 70,000 h.p., is half finished.

SOUTH SLOANE TO GIVE MORE POWER

Within a few months the South Sloane plant will be in operation, giving the company a production of 100,000 h.p.

Most of this new power, it was intimated to the mining congress, would be required for the new zinc refining plant of the Consolidated Mining and Smelting Company at Trail, the zinc plant is practically completed, but has not yet in operation because of the lack of power.

Two further developments on the Kootenay River are contemplated, Mr. Campbell said, and when the possibilities of that stream are exhausted the company has its eyes on the Pen d'Oreille, near South Sloane. He said that 150,000 h.p. was capable of being developed.

The West Kootenay Power and Light Company is a subsidiary of the Consolidated. Its primary function is to supply that company with power for the operation of its smelting plant. It sells power elsewhere, but any large construction is necessarily based on the certain knowledge of a customer for the new power to be developed. Mr. Campbell stated definitely that the expected expansion was for the mining industry, which in his opinion, means the Consolidated.

COMPANY'S MINE

The question that arose in the minds of all who heard him was—"Where is the ore to come from?" No official announcement has been made, but it reveals a probable source, but British Columbia members of the congress heard directly and indirectly of the mine at Kimberley, Nelson and Trail, that gave fairly good clues.

At present the smelter is working practically to the limit of capacity, with the exception of the new concentrator, and ninety per cent. of its concentrates, other than copper, come from the company's own Sullivan mine at Kimberley.

The mine is producing approximately 4,000 tons of ore a day, from which 1,000 tons of concentrates are derived. The Consolidated has shipped part of this concentrate to Belgium for refinement, but with the additional power from South Sloane the company will be more than capable of handling the maximum output of the Sullivan concentration plant at Kimberley.

The Consolidated is not a communicative company. Its official announcements deal usually with accomplished facts and nothing more. After leaving Kimberley, the members of the mining congress were comparing notes and indulging in much speculation as to the significance of vague reports that the company is developing a new line of attack upon the Sullivan's vast ore body. The general impression after hearing him was that the production of the Sullivan is to be increased.

POWER REQUIRED

Such an increase would require additional concentrating capacity, which in turn would necessitate procuring more power.

Rumors were also heard that the West Kootenay expects to run a power line to Kimberley shortly. The present concentrator at Kimberley is operating practically to capacity with power from the East Kootenay plant on the Elk River. West Kootenay Power and Light Co., the inference would appear to be that an additional plant is to be built on the Sullivan mine, which again confirms the suggestion of planned increase production of ore.

Even that expansion does not provide a use for 300,000 h.p., however, such as the Kootenay River and Pen d'Oreille are capable of developing.

Members of the Empire Mining Congress heard things at Trail also. By piecing together statements made to various delegates, other probabilities come to light.

One member said he had been told by a responsible official that a substantial increase in the plant at Trail is to be begun almost immediately.

Another member said he had been told by an official that the company expected to be smelting ore from its properties along the coast, the Coast Copper mine at Qualicum Sound, and Sunken near Jordan River.

Recent acquisition by the Consolidated of other coast properties, the George Copper mine and the Big Missouri, at the head of the Portland Canal, confirms the suggestion of renewed interest in this great corporation in the prospect of establishing a smelter at the coast.

WORK AT TRAIL

This, however, is not expected for some time yet. A direct inquiry at Trail by a member of the Empire Congress, elicited the statement that the present view of the company's experts was that it would be advisable to bring concentrates from the coast properties to the smelter at Trail.

That this process may be set under way in the very near future, is suggested by the visit to the Coast Cop-

per mine last week, of J. J. Warren, president of the Consolidated, together with W. M. Archibald, the company's superintendent of mines, and other engineers. On this property, known to old-timers as the "Old Sport," the Consolidated has been conducting life broad-kind of exploration work for fourteen years, and although no official statement of the results has been made, mining men generally believe that a substantial body of ore carrying good values, has been developed.

A business man who visited this remote property within the past month, stated on his return, that the foundation for a concentrator had been built during the past year and a power plant had been constructed.

At the Sunhook no work has been done for a number of years, but this property also is generally believed to be a good one.

Dispatches from Stewart published within the past two weeks, say that a crew of between sixty and seventy men is engaged in the development of the new property of the George Copper property and the road.

Taken in the lump, these facts indicate a number of directions in which mining activity in Consolidated itself may produce in the relatively near future, the ore which Mr. Campbell's statement to the Empire Mining Congress at South Sloane, B.C., says the company expects to handle at the Trail Smelter.

MINE AT MOYE

There is one other possible source, the St. Eugene Mine at Moye. The equipment of a concentrator to run through the million ton dump in Moye Lake, from the former operation, will complete its operation at the present rate of progress in about five years. A crushing plant has also been set up, which is not necessary for the material in the lake.

It is not infrequently that provision of this piece of equipment is for the purpose of handling new ore to be taken from the mine. It is argued that until the differential flotation process was worked out, only comparatively high grade ore could be handled successfully, but that the new process of flotation of low grade passed over in the former operation of the mine, may now be profitably recovered. The reduction, in the amount of ore to be mined, what the low grade ore it may be only the company, which has possession of the mine plans, is able to conjecture.

Whatever way it comes, Mr. Campbell's statement respecting the expected increase in power production, until the Consolidated shortly expects to be handling vastly more ore than it is today.

MASH INCOME SHOWS CONSIDERABLE JUMP

Total Earnings For First Nine Months of Year Amount to \$15,790,259.75

At a meeting of the directors of The Nash Motors Company held Thursday, September 22, at the company's headquarters in Vancouver, B.C., the directors declared a dividend of \$1.00 per share was declared at an extra dividend of 50c per share payable on November 1, 1927.

The company reported that for the third quarter of its fiscal year 1927, covering the months of July, August and September, the net income amounted to \$4,493,654.83, as compared with \$4,493,654.83 for the corresponding quarter of 1926. Total earnings for the nine months of the fiscal year 1927 amounted to \$15,790,259.75, against \$14,791,991.27 for the corresponding period of 1926. The earnings of the company for the nine months of 1927 have been very satisfactory.

"It might not be amiss to point out," declared President C. W. Nash, "that although our sales were the greatest in our history following the introduction of our new models, we still might have done an even larger volume of business had our production capacity been greater, as both July and August ended with more orders for immediate deliveries on our books than we were able to fill."

In referring to the future of the Company and the business outlook, President Nash said, "I am prepared to believe that the future is bright for this Company which will continue to enjoy its full share of business as the year goes forward. Our new line has been received with exceptional favor by the public and in view of general sound commercial and industrial conditions that prevail throughout the country as a whole, and the satisfactory crop reported in most sections, I see no reason not to anticipate continuation of normal good business."

James Stewart Again Heads Alberta Pacific

Calgary, Oct. 1.—At the annual general meeting of the Alberta Pacific Railway Limited, held yesterday afternoon, the shareholders re-elected the directors, consisting of James Stewart, chairman, and J. W. Riddell, George J. C. Gage, William A. C. Michael, William J. Leland, secretary, and Alexander Cameron, treasurer.

In his report to the shareholders the president stated that the company's harvest weather in 1926 and the consequent difficulty of handling an off-year crop, resulted in a net loss for the year 1926 of \$62,221.

MANT LOSE LICENSES

New York state's motor vehicle commission has revoked more than 2,000 drivers' licenses up to August 1 this year, most of them because the owners were convicted of driving while intoxicated or for reckless driving.

BIG DISPLAY AT SHOW

Nearly 2,000 receivers ranging in cost from \$55 to \$8,000 were on display at the New York radio show this fall. Value of radio accessories alone amounted to \$500,000.

Why Market Reactions Are Brief And Recoveries Rapid In New York

Wall Street Authority Gives Solution of One of Stock Exchanges Great Mysteries

New York Oct. 1.—In checking the reason why market reactions are brief and recoveries are rapid, Roscoe P. Gresham, writing in the forthcoming issue of The Magazine of Wall Street, gives, as his opinion, that it is a question of "technical position," which can take place only after a substantial amount of stock, has been removed from the market.

The article reads in part: "Perhaps the most striking feature of the stock market for many months past has been the extreme brevity of reactions affecting all parts of the list and the rapidity with which recoveries take place. The latter, particularly in the case of the general upward trend, it is well worth while inquiring into the causes back of this characteristic, which is almost a constant feature of the market. It would not be so remarkable in the early or middle stages of a rising market when bad news and other unfavorable developments are habitually overlooked, but coming after several years of consistent strength, it presents a different aspect from what has been the case in the past. Under similar circumstances an established upward movement was accompanied by intermittent tendencies of fairly sizable duration in the reverse direction.

A VITAL FACTOR

There is one factor to be taken into consideration in this connection, although hardly of sufficient weight to account for the great resiliency manifested by the market. It is the enormous increase in the number of listed issues and the rapid movements affecting all parts of the list appreciably more difficult. Strength among the market leaders is likely to obscure unfavorable trends in particular groups of stocks, but it is in the action of the leaders that we are especially interested in the case of the market as a whole.

CONSOLIDATED PASSES TENTH YEAR OF B.C. REVENUE

Great Mining Corporation Contributes \$2,000,000 a Year in Taxes

Annual Freight Bill Amounts to \$3,600,000; Supports

Nelson, Oct. 1.—Ten per cent. of the total revenue of the Province of British Columbia consists of the \$2,000,000 taxes paid annually by the Consolidated Mining and Smelting Company, one of the Ministers from Victoria was informed recently by the speaker for Nelson Board of Trade delegation asking for road expansion in the country where the Consolidated operates.

Such a fact as that reveals the important position that this great subsidiary of the Consolidated has in the province. There are other ways of approaching an estimate of its greatness, to which members of the Empire Mining and Metallurgical Congress testified freely after visiting its operations.

The city of Trail and the municipality of Tadanac, with a population of 6,000, consists entirely of employees of the Consolidated and its subsidiaries, and of merchants selling the company and its employees their ordinary supplies, food, clothing, insurance, building materials, etc.

Rosland, with 1,500 population, consists of miners producing ore for the smelter.

Kimberley's 6,000 inhabitants are employees of the same company's Sullivan mine and concentration plant, together with the usual subsidiary business population who derive their custom from the employees.

Throughout the Kootenay country generally are being carried on 170 mining operations which would be impossible if it were not for the existence of the Trail smelter to treat the ore which more than 100 of them periodically or steadily produce, and which the other hope to produce when their development reaches that happy stage.

Communities like Kago, Sloane, Bonquo and others are almost entirely dependent on the mining operations.

MAKES PROSPERITY

Nelson, the Queen City of the Kootenay, has about 6,000 population, a few of whom are employed in canning and lumber mills which do an outside business. As a result, the city is a prosperous one, however, is the wholesaler of supplies to the mining centres round about.

One hardware firm has to do \$1,000 worth of business a day to maintain its stock. This gives an idea of the extent of the wholesaling activity in Nelson.

Throughout various parts of the Kootenay are fertile agricultural valleys and stock raising country. As a result, these industries have some small export trade, by far the greater proportion of what they produce is consumed by the Kootenay people.

Two great power companies exist mainly to supply the Consolidated. The West Kootenay Power and Light Company, and the Kootenay Power and Light Company, which are both subsidiaries of the Consolidated.

The Kootenay Power and Light Company, which is a subsidiary of the Consolidated, has a third well on the way to completion, providing current for operation of the smelter, and the Kootenay Power and Light Company, which is a subsidiary of the Consolidated, has a third well on the way to completion, providing current for operation of the smelter.

PROVIDES POWER

The West Kootenay Power Company's development on the Elk River near Fernie provides the power for the Sullivan concentrator. Necessity of developing power for the uses of the Consolidated, the company has been able to make available to other industrial activities all of which again contributes to the general prosperity of the Kootenay.

There is an extensive railway mileage of it maintained almost exclusively by ore tonnage proceedings to and from the Consolidated. A large part of the freight is handled entirely by the Consolidated's own freight cars, which are used for the transportation of ore and concentrates.

The annual freight bill paid directly by the Consolidated Company is \$3,600,000 or one per cent. of the total freight bill of the province.

The railway company giving this service and collecting this revenue is a large employer of labor and a large consumer of all kinds of supplies and materials. The company's freight bill is \$3,600,000 or one per cent. of the total freight bill of the province.

INDIAN VEGETABLES

The American Indian left us eight vegetable which now make up a greater part of the entire American crop, despite the fact that we have learned to cultivate twenty-four foreign crops, in addition.

FIFTH TO TAXES

Director J. C. Kendall of the University of New Hampshire Extension Service estimates that twenty per cent. of the farmers' labor incomes in the last eight years went to local property taxes.

Following are details of the 1926 output: Lead, 248,800,000 pounds, \$18,700,000; zinc, 128,200,000 pounds, \$10,200,000; copper, 1,700,000 pounds, \$8,000,000.

Canadian Bank Stocks Low Compared With U.S. Banks; Yield Here Nearly Double

COEUR D'ALENE GIVES ANOTHER SENSATIONAL MINING

Spokane, Oct. 1.—During the forty-two years that have intervened since the discovery of the great Bunker Hill and Sullivan Mine, the Coeur d'Alene district of Idaho has been the scene of many sensational discoveries and developments. It is doubtful, however, if any of these finds ever proved more sensational than has the development of Golconda Lead Mines during the past year.

The property now owned and operated by the Golconda Company was long known as the Hector. Its early development proved disappointing, and for many years it was permitted to lie idle. Just about a year ago a syndicate of successful mine operators, all partners in the famous Sheridan lease on the Morning Mine at Mullan, acquired it under a lease and bond and proceeded to reopen and extend its old deep level workings. Their efforts were almost immediately crowned with success and to-day the property is universally recognized as covering a mine of the highest grade. Coeur d'Alene producer. That this opinion is not confined to local residents is demonstrated by the fact that following a recent intensive examination, H. C. Wilcox, E. M. A. distinguished geologist and engineer of Los Angeles, recently summarized his opinion of Golconda in the phrase "it should develop into one of the other notable discoveries mentioned by Umphey."

What has rendered the development of Golconda so deeply interesting, aside from the sudden revelation of local sentiment regarding the discovery of the strike so quickly made by its new owners, is the fact that the ore body was first tapped at a depth below the outcrop of between 1,000 and 1,100 feet. This circumstance, taken in connection with the extent of the company's holdings, which consist of several claims covering a mile on the strike, and the fact that the ore body was found in the same fluted zone and under the same geological conditions as the nearby Morning and Star Mines, indicates most strongly that its ore bodies will persist to equally tremendous depths. In addition to this in the immediate future, the ore from the 4,0

IN MEMORIAM
FOULTON—In loving memory of William Foulton, died Sept. 30, 1923.

"Days of sadness still come o'er us.
Sacred tears do often flow.
But memory keeps him ever near us.
Though he died some years ago."

No one knows how much we miss him.
Only those who have lost him can tell
Of the grief that is borne in silence
For him we loved so well.

As we loved him so we miss him.
In our memory he is dear.
Loved, remembered, thought of always,
Often wishing he were here.

Oh how sweet it will be in that beautiful
land,
So free from all sorrow and pain.
With songs on our lips and harps in our
hands.
To meet one another again.

—Inserted by his sister Dorothy and
brother-in-law Laurie Ramsay.

HEALTH CENTRE COSTS CREATE COUNCIL TREMORS

Larger Staff Sought by
Medical Officer Dr. Berman
Councillors Defer Action on
Staff Reorganization Until
Year's End

Health Centre affairs came under discussion at last night's session of the Saanich Council, when Dr. David Berman, medical health officer, in his first report, asked for one full time nurse additional to the three now employed, one clerk stenographer, a full time janitor, a new Ford car, retention of Mrs. Lucas as nurse-superintendent, additional office equipment and repairs to the Health Centre. In addition, Dr. Berman requested refund of \$137 transportation from West Virginia.

IS NON-RESIDENT
Reeve Crouch stated that Dr. Berman has taken up residence in Victoria, and voiced objection as contrary to an understanding that the incumbent of the amalgamated posts of schools and municipal medical health officer should reside in a central Saanich location, preferably at the health centre. He stated that the health centre is not a residential area, and that Dr. Berman's residence outside Saanich was approved.

Councillors Hagan and Milne recalled that co-operation of the school board in the reorganization of the health administration of Saanich had been attained on a basis which had contemplated changes in personnel, and Reeve Crouch obtained assent when he construed these remarks as "you mean the removal of Mrs. Lucas."

DR. BERMAN RESPONSIBLE
The council decided that Dr. Berman must personally take charge of the Health Centre buildings and staff, refusing his recommendation that Mrs. Lucas continue responsible.

The request for an additional nurse and a clerk, was laid over for attention at the close of the year. Committees will investigate the request for a new car, office furniture, and repairs to the Health Centre. The request for a whole time janitor was refused, and the account for transportation of Dr. Berman from West Virginia was also denied.

"CERTAINLY A SHOCK"
Councillor Milne, is chairman of the health committee, expressed disappointment with the first report of Dr. Berman. He recalled that literature from the Rockefeller Institute estimated that adequate nursing service requires one nurse or more to each 10,000 people resident in the area served, while the cost is stated by the institute to average 50 cents per person. "It is certainly a shock to find that Saanich requires four nurses and a whole time medical officer," he remarked.

Councillor Hagan protested action tending to increase the charges levied upon land owners, while expressing favor of health work paid for by the residents benefited.

Councillor Milne feared that continuation of the methods initiated by Dr. Berman would antagonize the school board and cause withdrawal of their financial aid.

Councillor Milne remarked that health experts "do not consider taxpayers for one minute, they are just out for everything they can get."

IMPERIAL STUBBIES
Reeve Crouch urged caution and delay in drastic action to obtain reorganization of the Health Centre

**MADAME SANDERSON
TALKS TO HISTORY
CLUB AUDIENCE**

Delivers Interesting Address
Under Auspices of High
School Body

Under the auspices of the Modern History Club of the Victoria High School, Madame Sanderson-Monaghan delivered the first lecture of her series last night at the Victoria High School. She chose as her subject "Some Episodes in French History," explaining that she must of necessity be brief and tell only a very few of the most interesting of the stories.

"I shall begin at the beginning," said Madame Sanderson, "and take you up to the first of the nineteenth century, when I shall only deal with what is romantic, picturesque and fascinating. What has happened since then is not romantic, or does not appear so to us. Perhaps given the proper perspective it too will become picturesque, but we are too close to it at present to see it in that way."

With the aid of slides, copies of some of the beautiful and celebrated paintings, Madame Sanderson then proceeded to tell the story of some of the heroes and heroines of her country. She began with the splendid figure of Veronique, and told of his brave stand against the Romans. St. Genevieve, the patron saint of Paris, was shown; Clovis, the first Christian King of France, and then Charlemagne and so on until she reached the magnificent drama of Joan of Arc.

Here the speaker went into picturesque detail, and showed some remarkably beautiful slides. The massacre of St. Bartholomew was told with graphic detail. Then followed the romance of Henry of Navarre.

A brief account was given of the influence of the two great cardinals of French history, Richelieu and Mazarin, and the influence of the French court depicted the beautiful costumes of the period and the grandeur of the King's court.

Events which led up to the Revolution were described, and the speaker told briefly something of that time.

The library where the lecture was given was filled to capacity. The president, Herbert Manson, introduced the speaker, and Miss Shields and Miss McParlane moved and seconded the vote of thanks. Madame Sanderson-Monaghan was the recipient of a beautiful bouquet of pink roses.

The next meeting will be held on October 14, when Inspector Albert Sullivan will speak on "Transatlantic Flights."

RANGES IMPROVED, CATTLE INCREASED BY SUCCESS OF PATTULLO GRAZING POLICY

General improvement and development in the livestock and sheep industries of British Columbia is indicated by a survey conducted by officials of the Land Department. Results of this survey, as made public by Hon. T. D. Pattullo, Minister of Lands, outlined the improvement of cattle range conditions all over the Province in the last ten years, and more particularly in the last year or two as follows:

When the Government took over the active administration of the public grazing lands of the Province in 1918 at the urgent request of the cattle and sheep men provision was at once made to remedy the growing chaotic conditions of range areas.

RANGES DIVIDED
The division of the ranges into communities and districts was undertaken and the communities organized. The improvement of the ranges was commenced and efforts were expended in:

1.—The location and fencing of dangerous bogs that were taking a heavy annual toll of cattle.
2.—The construction of trails and bridges opening up new range.
3.—The erection of fences to control breeding cattle during the breeding season.
4.—The discovery, reservation and improvement of springs and other sources of water supply on the range.
5.—The elimination of wild horses from range areas.

Over \$40,000 has been expended in useful works of this kind. The fencing of 108 bogholes to date saves annually approximately 540 head of cattle to the range livestock industry.

WILD HORSES REDUCED
The removal of 3,500 head of wild horses from the ranges in the past three years is of immense value to the stockman and farmer of the range country in the saving and improvement of his Spring, Fall and Winter ranges.

A comparative survey made by the Government in 1925 of stock raising and grazing conditions in British Columbia and in the four adjoining states of the United States, in order to demonstrate the opportunities in range development in British Columbia, showed that 160,000 acres of open and timbered lands in British Columbia were available for grazing. The remaining unused grazing lands are in part potential agricultural lands, which are being rapidly settled.

SETTLEMENT INCREASES
The study of the increase in farm population showed that British Columbia, as the last frontier of the West, separated as it is from the prairies by the Rocky Mountains and from the south by the international boundary, is now beginning to absorb the overflow from the east and south. The present active advertising and road development work is attracting settlers and the wonderful possibilities of the range have become more widely known during the past few years than ever before.

In 1918 the number of farms in British Columbia totaled less than 17,000. In 1926 the number had increased to 22,000. The area of grazing ranges used by old and new settlers with dairy and range cattle and sheep is rapidly increasing.

STOCK GROWING
The numbers of livestock in British Columbia has increased as follows:

	Horses	Cattle	Sheep
1918	44,131	246,225	45,291
1919	61,158	336,244	102,853

Increase in cattle claimed as range cattle, other than cows and yearlings kept for dairy purposes and exclusive of bulls since 1919, is 72,957 head.

The annual beef bull sale at Kamloops inaugurated in 1919 distributed each year an increasing number of registered bulls throughout the province, thereby increasing the number, quality and value of beef animals marketed.

In this respect it is believed that British Columbia will compare very favorably with adjoining provinces. It may be noted that the percentages of cattle commanding the highest prices and marketed on the Calgary market for example: During the period September 16 to 21, 1927, reported September 22, out of 370 head of steers market thirteen only brought the highest price and fifty head only the next highest.

MARKETING BEST GRADES
Livestock and agricultural marketing legislation recently enacted is leading to the production of high grade products and is facilitating efforts to successfully market the best as well as the inferior grades.

A large part of the unused and sparsely used areas of grazing lands scattered over the Province are potential summer grazing grounds for flocks of range sheep.

During the past four years effort has been successfully expended in stimulating the range as well as the sheep industry. This success is indicated by the fact that since 1921 the number of sheep in the Province has increased from 51,457 head to 102,853 in 1926.

Many large range flocks now occupy the high and heretofore unused summer ranges and the success of these ventures is encouraging others to invest.

SHEEP INDUSTRY BOOMING
The sheep promotion committee of British Columbia has during the past four years held many meetings throughout the Province, giving practical demonstrations in farm flock management. One result of the committee's work was the Sheep Fair held at Duncan, September 16 and 17, the first of its kind ever held in British Columbia. The prize list included prizes for the best purebred rams and ewes as well as the best grade breeding ewes and lambs.

It was an unqualified success and

various provinces is being assured, and that the tremendous growth of the Dominion's eight billion dollar basic industry will be shown in all its varied phases.

The Royal Winter Fair at Toronto, which opens on November 16 and continues until November 24, has been selected as the scene of the celebration of the epoch-making agricultural event.

Hon. Mr. Motherwell in a statement issued to-day said that he is greatly encouraged by the interest of farmers from one end of the Dominion to the other and feels assured that agriculture will at last come into its own in recognition by the mass of the people of the country the vital factor in our national prosperity.

"I feel," said the Minister, "that Canada's jubilee will stand as a citadel of this great Dominion and to the world at large just what is the basic industry of our national greatness. In this sixtieth year of the Confederation of the provinces it seems to me but fitting that the industry which has

made the nation great should have this recognition."

John L. Sullivan, held the heavyweight boxing championship longer than any other fighter—from 1882 to 1892.

Sooke

Sooke, Oct. 1.—A thanksgiving service will be held at Holy Trinity Church on Sunday, October 2, at 3 p.m. On Wednesday Mr. and Mrs. Walter Duke entertained their friends at a whist party. There were sixteen guests present and a most enjoyable evening was passed.

The monthly meeting of the women's guild of Holy Trinity Church was held at the home of Mrs. J. C. Cooke, the following were present: Mrs. McBride, Mrs. Throp, Mrs. Hawkins, Mrs. J. C. Cooke, Mrs. Locke, Mrs. Hewer, Mrs. Butler, Mrs. Stacey, Miss Throp, The Rev. H. Bolton was present.

TAX SALES

VICTORIA ASSESSMENT DISTRICT

HEREBY GIVE NOTICE that, on Wednesday, the 12th day of October, 1927, at the hour of 10 a.m., at my office, Government Buildings Annex, corner Government and Superior Streets, Victoria, B.C., I will sell at public auction the lands in the list hereinafter set out, of the persons in said list hereinafter set out, for delinquent taxes unpaid by said persons on the 30th day of June, 1927, and for interest, costs, and expenses, including the cost of advertising said sale, if the total amount due for the period ended December 31st, 1925, is not sooner paid.

VICTORIA, B.C., SATURDAY, OCTOBER 1, 1927

Invisible Artifice Brought To Light

A Chemical Warfare of Ink and Writing, Cryptic Painting, and an Annihilating Pencil

By CHARLES LUCIETO of the French Secret Service

Illustrated by J. NORMAN LYND

A half-burnt pencil stub in the ashes of a factory that was engaged in the production of war materials.

Last week M. Lucieto, in his notable series of articles recounting the adventures of secret service operatives in the War, told how the Allies were saved on the sea by the use of mysterious "Q-boats"—armed vessels disguised as freighters, manned by British officers of high rank disguised as tramp sailors—and how this expedient enabled the British to sink a large number of submarines to turn the tide in the crisis.

M. Lucieto also explained the real reason behind the German order to sink neutral as well as Allied ships without trace—this, he set forth, was in order to obtain the passports and identification papers of passengers and members of crews for the use of German agents in impersonating neutrals in the Allied countries. Additional experiences of M. Lucieto may be found in his book "On Special Missions."

IN Counter-Espionage there is one axiom the truth of which is constantly being demonstrated—the improbable is often probable. Take, for example, a 420 shell, the most colossal thing achieved by the Austro-German artillery manufacturers, and the average Frenchman will say: "As a weapon of destruction, this is perfect. Nothing could be better!" Yet the Germans made something much better! The glass-blowers in Thuringen far outdid Krupp, Skoda, and their corps of engineers!

Thanks to these glass-blowers, German agents in foreign countries possessed an infernal machine that, to judge from results, was a hundred times more destructive than even the 420's. And you could carry it in your pocket! It weighed exactly fifty grammes! But it could, if the enemy so desired, blow up a factory, a canal (some of these were vitally important to us), a powder factory, a ship, or a munition dump. It—it was a pencil!

You know as well as I do that a pencil doesn't take up much room. You can leave it anywhere . . . even in a pocket, when that pocket isn't yours, or in a brief-case . . . when the brief-case doesn't belong to you! It was unfortunate that those pencils were always turning up—sometimes they were discovered in a consignment of cotton, sometimes in the middle of a munition dump! Certainly those were strange pencils . . . pencils!

The spy's drawing. What could appear more harmless? On the drawing at the right will be seen what was hidden underneath.

The Baffling Fate of Many Factories—An Innocent-looking Detail—Socks and Shoelaces—Unlaunched Handkerchiefs—An Adventure With the "Polish" Artist at Croisic

type of bomb would have blown up the Italian hydro-electric plants, especially those in the Simplon-Mont Cenis district. They would be most destructive if dropped into a canal."

AN EXCITED COMMUNITY

Soon after this I received an official telegram ordering me to report to Captain R., head of our counter-espionage in the Chantilly district. I proceeded to that town and found that my arrival was eagerly awaited. They turned over to me documents that seemed to point to the existence of a group of people—not necessarily spies—who were systematically spreading false gossip of a nature to alarm the population. There was one curious coincidence. Wherever these people had been, an epidemic of mysterious fires had broken out.

I got copies of the various documents and retired to my room to study them. All of them—or almost all—said nothing about the origin of the fires. However, three of the reports contained clues that were useful as points of departure.

In the first of these was this observation: "A quarter of an hour after the automobilists had left town a fire broke out without apparent cause among some bales of cotton that were piled on the wharf."

The second stated that: "The fire could have been started only by the people in question, as they were the only ones to have approached the field containing the hay stacks. However, the sentinel did not see them do anything suspicious. . . . The fire, according to the sentinel, broke out about twenty minutes after their departure. No one observed either the make or the licence number of their automobile."

A KEY TO THE SOLUTION

In the third one I read this: "As soon as the fire was out, we rummaged about in the ashes but found nothing suspicious. Nevertheless, several half-burnt bundles had an acid smell. A half-burnt pencil stub that was found on the ground smelled very strongly of the same acid. . . ."

Further this report states: "No suspicious-looking strangers were seen in the district. Four automobilists did stop for lunch at the Commerce Restaurant. There is no reason to suspect them, however, as the fire did not break out until they had left."

Three facts seemed worth remembering: (1) The presence of automobilists each time; (2) The fire never started before they left town; (3) The discovery of a half-burnt pencil stub in the ashes of a munitions factory.

It was little enough. I felt, however, that it was a key to the solution of the problem. I thought of the article in the Gazette de Lausanne, and I asked myself this question, "Taking into consideration the mentality of the German General Staff, why shouldn't they make use of the same weapons in France as in Italy—and equip their agents with machines like those found at Lausanne?"

COMPONENTS OF THE PENCIL

Passing over the thousand and one steps that were necessary before I could get to the bottom of the affair, exactly eighteen days after the opening of the inquiry, six of the incendiaries fell into our hands. Each of them was equipped with these explosive pencils; each was made to expiate his crime. . . .

I shall quote only one passage from the report establishing their guilt before the court martial:

"In outward appearance the pencil resembles any other pencil that may be sharpened by unwinding a strip of paper that exposes the lead and serves the same purpose as the wood of an ordinary pencil. A little way up, the lead—which is either red or blue—serves as a stopper for a tiny glass tube that contains a combustible fluid of tremendous strength. When a certain portion of the pencil is unraveled, air is let into the glass tube and in fifteen or twenty minutes it reaches the chemicals; this automatically produces a heat of incredible intensity and the fire spreads with a speed impossible to describe."

The report closes with these words: "This kind of crime is especially loathsome because its perpetrator, the criminal, runs almost no risk. He may pretend to eat as he strolls along. One bite is enough to break the point of the pencil which he has previously hidden in a slice of bread. He leaves the bit

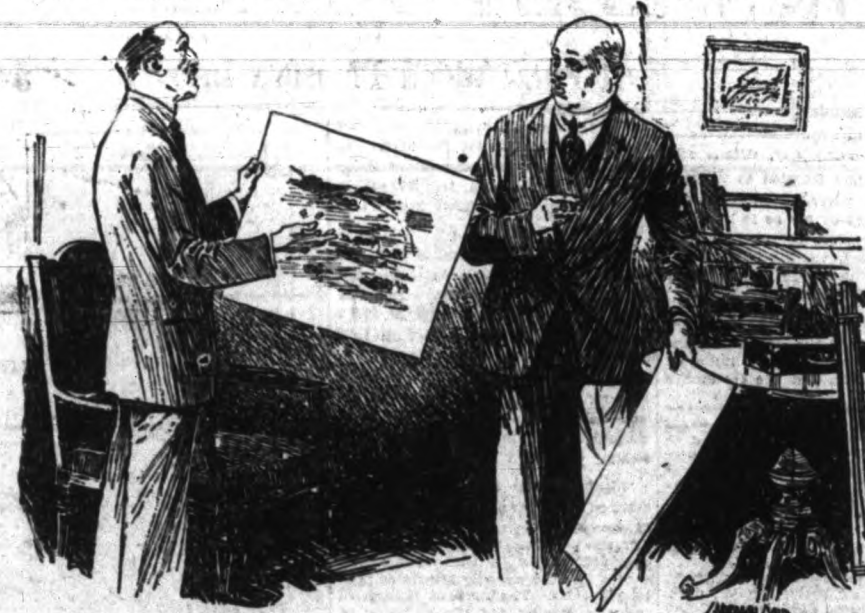

of bread wherever he is to start the fire—on a pile of cotton, in a factory, on the wharves of a port—then he peacefully strolls off. . . ."

The Journal Officiel of the Swiss Republic in its issue of November 16, 1918, publishes a report of the findings of the Grand Jury of Zurich. There one may read the following statement:

"The inquiry into the bomb affair has brought out the fact that German diplomatic representatives in Switzerland employed messengers to carry bombs and explosives . . . into this country which were destined for Italy. . . ."

WHAT THE ENEMY MUST NOT GUESS

During the war great use was made of secret correspondence. It often happened that such information was of use only if the enemy did not know that it had been discovered. Take, for example, the document printed on this page. It is the type of report sent by a resident German spy in Paris to his chief. It tells him that 15,000 men have been sent to the Italian front.

I pretended to be enthusiastic over the picture and asked him to allow me to copy it.

From this news the German General Staff must decide: (1) To what part of the Italian front? (2) Are they shock troops? If so, in what section will a drive take place?

By referring to the various maps of the front and by piecing together various bits of information that bear on the same point—they are able by the process of deduction to decide, without any chance of error, the exact point to which these troops will be sent.

Now let us suppose—as really happened—that this report, instead of going straight to its destination, falls into the hands of a member of the French counter-espionage system. First of all, he should inform the commanding officer of his discovery. Then he should deliver the letter in such a manner that the enemy will never guess that one of his sources of information has been discovered.

Once a spy is "scorched," there is nothing more to fear from him. It then becomes the business of those whose job it is to thwart him, not to arrest, but to watch him. A "mouse-trap" is set. In it are caught all who get in touch with him, either in person or by correspondence.

A LITTLE TIP ON SOAP

At the outbreak of hostilities, the Germans did not use invisible ink. They used, as the case might be, onion, or lemon juice, saliva, or other solutions. These liquids, whose properties were physical rather than chemical, might be made visible either by iodine vapors or by coloring baths.

When they discovered that their secret correspondence was constantly coming to light, they called in the aid of their scientists and early in 1915 chemical inks began to appear. From that time on the composition of invisible inks became more and more scientific. Just the same, by means of certain analyzed reagents we always succeeded in translating seized documents.

The Germans were never able to discover why at this time a considerable number of their agents were arrested and sent to the dungeons at Vincennes. They attributed these arrests to treason within their own ranks. Will they kindly allow me to inform them that those

arrests were solely due to the clumsiness of their chemists? When you send a spy into a foreign country, you should not equip him with soap made of potassium ferrocyanide or toilet water that contains lead acetate.

When most of their agents had been arrested, the Germans finally realized that their invisible ink held no secrets for us. Then they began the use of solutions of organic silver compounds and, when possible, proteinates (Protargol). We had quite a job finding a suitable means of revealing these. We did it, however, by using nitrate of silver (mixed with a solvent). There was soon a new slaughter of German agents.

INCREDIBLE CONVEYANCES

And yet those gentlemen took admirable plans to protect themselves. Neither on their persons nor in their luggage was found anything that had the slightest resemblance to a vial of ink.

Then it was that M. Bayle—one of the great chemists of the age and head of the laboratory of criminal identification—succeeded

Monsieur

je vous serais obligé

commande du mois
dernier.

The spy's letter. A perfectly ordinary letter. There are apparently no suspicious characteristics.

Allied naval aeroplane station. This man claimed to be a painter and was living in grand style.

Before leaving Paris, I had quietly investigated him. He claimed to be a Pole, but at the Polish legation his name had never been mentioned. It was time some light was thrown on his case, as soon as possible.

Disguised as an amateur painter, one fine morning I got off the train at Croisic and put up at the Hotel M—. This painter was also staying there. A glance at the hotel register confirmed the fact.

I went down to the dining-room and I had just got settled when P— came in and sat down at a table near mine. He was a large, red-faced man, of husky build. His blue eyes, bristling mustache, and bald head would not have looked at all out of place at the head of a platoon of white-coated cuirassiers.

Although the lunch bell had not yet rung, he called one of the waitresses and in excellent French, spoken without accent, he ordered lunch. He went over the menu with the air of a man who denies himself nothing. He stowed away what was put before him with a voraciousness that in itself would have revealed his nationality. From time to time he would glance at me out of the corner of his eye, trying, no doubt, to make me out. His eyes were unusually alert and piercing.

As the room began slowly to fill up, his attention was drawn to the other guests. Suddenly I saw a shiver pass through his body. His eyes rapidly hardened and were fixed on a gentleman who had nonchalantly sat near a window. From that position, without appearing to do so, he could keep track of everyone who entered or left the room. If P—'s eyes had been pistols, I would have given little for that gentleman's life. He was—I should keep it from you no longer—an agent attached to the Special Commission at Saint-Nazaire. P— by now was gobbling his dessert, his head almost touching the table-cloth.

COMPANIONS IN CULTURE

When I had finished lunch, I started towards the wharves. P— had left the room when I did. Noticing my painter's paraphernalia, he courteously asked:

"Have I had the luck to have stuck upon a colleague?"

I nodded and he introduced himself.

"M. P—, a Polish sculptor and painter."

It was now up to me to introduce myself. I did so in a gibberish, half-French, half-Italian.

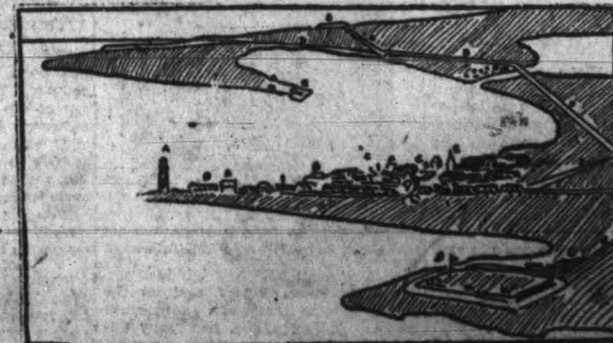

"I am," I replied, "Monssu Campanella, a Neapolitan painter."

With the introductions out of the way, P— and I lost no time in becoming the closest of friends, although he continually cracked jokes about my accent.

Within a few days we were not only eating at the same table, but I had even obtained a room with a door that opened directly into P—'s. As far as I could make out, he was of pure German blood. But he was a clever fellow and not to be caught napping.

Each morning he would pack his materials

(Concluded on page 3)

Map of a French naval base. This is what was underneath the Camouflaged drawing reproduced at the left.

IS TOMLINSON TO BE CONRAD'S SUCCESSOR?

Arnold Bennett Says That "Gallions Reach," This English Writer's First Novel, Has Descriptions Which the Author of "Lord Jim" Would Have Been Proud to Own

By PROF. W. T. ALLISON

Are you "sealed of the tribe" of the one and only H. M. Tomlinson? Or, to put it in more modern phrasing, have you read with delight the travel essays of this English writer who has made far voyages up the Amazon and through the devious jungle rivers of Malaya? If you are not familiar with such books as "Tide Marks" and "Gifts of Fortune," do not hesitate to order them from your bookseller; if you are already a Tomlinson admirer, rejoice because he has at least broken away from the descriptive essay to write a novel entitled "Gallions Reach" (The Muses Book Company, Toronto). As might be expected, this story is no more like the conventional romance than the Tomlinson essay resembles the Squire's essay. "Nothing," if not original, seems to be this English style's motto. Hence "Gallions Reach" is vastly different from the novel that a written according to the popular formula. For this story no sooner are we introduced to the attractive Helen, whom we confidently expect to be about to listen to a proposal from Jimmie Colet, than she vanishes into thin air; the business of the story moves quickly along and we see her no more. And the hero never even seems to remember that there was such a girl. Nor must it be supposed that Helen's image was supplanted by that of a successful rival in Jimmie's heart. As a matter of fact he goes girl-free clean through this romance.

JIMMIE KILLS HIS EMPLOYER

Another unusual feature of this novel is its dramatic beginning and unexpectedly tame ending. The hero, Jimmie Colet, often felt that although he had worked his way upward to a

comfortable position in the offices of Perrian Limited, a big shipping firm in London, he was condemned to a dull round of ungenial toil, month after month, year after year. Youth was slipping from him, and soon he would have no spirit left with which to follow the bright eyes of danger into the great beckoning world. Even the samples which littered his desk disturbed his subconscious mind. Names of importations caught his fancy—mace, tumeric, myrabolans, cinnamon, benzoin, inc, gambir, annatto. But he never saw the ships which brought to London these articles of trade which warned him of a life and beauty beyond. And he might never have escaped from his net of office drudgery had two things not happened. First, his men at the warehouse demanded shorter hours and he was ordered by old Perrian to sack the lot of them. Second, in a stormy session with the great-faced old despot, the head of the firm, who thought he owned his office manager body and soul, Colet, stung by insulting words, saw red. "He saw Perrian's near mask, as the front of all arrogant swinishness. He struck it. Perrian fell over as though he had no bones, did not move, lay as if dead, was dead. Colet, horrified at the unexpected result of his single blow, left the office (it was in the evening, after office hours, when the interview between himself and the head of the firm took place), in the confused intention to escape from Perrian, to get help, to think it over, to call the police.

RECEIVES A NUDGE FROM DESTINY

We need not review with any de-

tail Colet's wanderings through London streets that night, beyond saying that at dawn he wound up at a little hotel in Gallions, a locality adjacent to the London docks, eight or nine miles from the heart of the city. And at breakfast the next morning the office manager of Perrian Limited met several strangers, one of whom proved to be Captain Hale, who was about to join his ship, the Altair. The quiet little captain and Jimmie found that they had something in common, a love of Chinese ware. The captain had a statue of Kuan-yin, a Chinese goddess which Colet admired very much because he had a smaller figure of the goddess in his office. Captain Hale explained that his statue was a bit of a nuisance because he had to go back to the city. His ship was at Woolwich buoys and he could not join her until the afternoon. His problem was what to do with Kuan-yin. Prompted by a sudden impulse, the nudge of destiny although he knew it not at the time, Colet offered to take Kuan-yin down to Woolwich himself and see her safely aboard the captain's ship. Although the young man was an entire stranger to the sea-captain, he gladly entrusted his treasure to him, asking him to introduce himself to his chief officer, a Mr. Sinclair, and to wait aboard the ship until he could be reached. Postponing his surrender to the police therefore, Jimmie Colet, boarded the ship Altair. A sudden friendship struck with Sinclair and his relation of the trouble he was in to both the chief officer and the captain, gave Colet the opportunity to stay on the ship as purser on a voyage to China.

TOMLINSON AN ENGLISH CONRAD

It is with the voyage of the Altair, her officers and crew, that the reader will encounter the heart of the story. What precedes it, even including the killing of Perrian, and what follows the founding of the ship, even the prospecting tour of Colet through Malaya forests, will seem insignificant, although in another novel they might be rather large. But for the moment that Colet is made an officer of the

ship to the time that he and other members of the crew are rescued by a big liner from the ship's boats adrift upon the Indian Ocean, we are held in the grip of a most absorbing narrative. Considered from any point of view—description, character portrayal, action, feeling, atmosphere—this is a great piece of writing, equal to Conrad in its verisimilitude and spiritual power. No less a critic than Arnold Bennett calls Tomlinson an English Conrad and such praise is no exaggeration as far as magnificent pictorial effects and delineation of character are concerned. Conrad, however, is much better than Tomlinson in structural power; the plot of "Gallions Reach" has serious defects, being specially weak in its diffuse beginning and inconsequential and altogether unsatisfying ending. Imagine an author telling his readers that the hero is about to go from the Malay Islands to London to make a belated confession to the police, that he had killed his employer and then stopping short in the story, refusing to give us the slightest inkling of this storm-tossed Jonah's fate. No, Mr. Tomlinson, this will never do; you must have more respect for your reader's curiosity than this or you will never be a popular novelist.

IN A PENANG BEDROOM

It is in the latter part of the story, where the Malay Islands form the background, that Mr. Tomlinson pictures a country which he has actually visited. In the chapter in which he describes the odors and insects in his bedroom in a Penang hotel on a hot night, we get a good idea of the author's brilliant style and also form a resolution never to visit the Malay country. "An unusual bedroom," he writes, "dreams were there before you slept. A place of torment for Cimmerian eccentricities, a cockpit for boggiars and kobolds. He was sure now that something was in that cupboard, and he wondered, while the floor boards were clear for the journey, how long it would take to get under the most-quickly-netting once the lamp was blown out. A loud voice addressed him from the wooden beams of the ceiling; a clear whistling cluck. He could make out a brief slender shadow up there, which was cast by no visible object; and, anyhow, it was too small for so much good confidence. It was motionless. It was a mistake, that reptilian mark. It was a stain in the

CAPTAIN HALE, SLIGHT BUT SPLENDID

For my part, however, I am willing to forgive Mr. Tomlinson for this and other sins, if for no other reason than that he has introduced me to one of the most unpretentious and, at the same time, one of the most admirable Englishmen I have ever met. I refer to Captain Hale. With forty years' experience of sea-going he was free from any trace of the bully; but, gild-mannered as he was, this little man was as brave as a lion. We see his slight figure on the bridge in the height of the terrible storm. The author depicts him "standing in profile so watchful of vague and immense powers, and so undisturbed by

their onrush like a token of quiet faith, unshaken by nightfall and overthrow. . . . He did not move. He was timing the Indian Ocean, that little man. Colet felt he would as soon be there as anywhere." But in spite of the captain's serenity the roaring seas were too much for the old Altair. First the rudder was ripped off, then a bulk-head was stove in, and at last the vessel began to founder, settling slowly by the head. The boats were manned and all got off safely except the captain who, either by accident or by intent, went down with his ship. This last scene is briefly but vividly described by Mr. Tomlinson who writes with such fullness of knowledge and life-likeness as would almost persuade he had been present at such a tragedy of the sea.

IN A PENANG BEDROOM

It is in the latter part of the story, where the Malay Islands form the background, that Mr. Tomlinson pictures a country which he has actually visited. In the chapter in which he describes the odors and insects in his bedroom in a Penang hotel on a hot night, we get a good idea of the author's brilliant style and also form a resolution never to visit the Malay country. "An unusual bedroom," he writes, "dreams were there before you slept. A place of torment for Cimmerian eccentricities, a cockpit for boggiars and kobolds. He was sure now that something was in that cupboard, and he wondered, while the floor boards were clear for the journey, how long it would take to get under the most-quickly-netting once the lamp was blown out. A loud voice addressed him from the wooden beams of the ceiling; a clear whistling cluck. He could make out a brief slender shadow up there, which was cast by no visible object; and, anyhow, it was too small for so much good confidence. It was motionless. It was a mistake, that reptilian mark. It was a stain in the

wood. The voice spoke again aloft, chee-chak, chee-chak; not an unpleasant sound; rather like shameless and noisy kissing. The little shadow writhed forward a yard as though the lamp had been shifted quietly, and that prompted similar shadows to move above, though the lamp remained still; abrupt divergent wriggles of creatures upside down. The ceiling was populated with lizards; one fell to the floor, rather solidly. That smacked knocked the stuffing out of it. No. It was off—going to get into his bed, most likely. A close night. . . .

"Did anyone ever manage to sleep through a tropic night? Not likely. You turned over, and then found that that side was hotter than the other. You turned over again. Not a sound. The lizards had ceased to kiss aloud, now the light was out. But a swift slithering passed over the boards beneath the bed. The silence was the heat. The heat was the silence. The silence was soft and hot, but heavy. It could not be pushed away. The darkness outside the curtains was waiting. For what? He was waiting, too, for sleep, but it was no good waiting for that when the unseen was waiting for something else. The idea of that boiler beside him was to keep him cool, but it was an imbecile lump. He pushed it off, with petulance.

Literary Notes

A roar of wrath is ascending from Italy these days because an inquiring historian, Dr. Ulloa, the venerable director of the National Library in Lima, Peru, declares that Christopher Columbus was not an Italian, not a native of Genoa, but a Spaniard, who belonged to the province of Catalonia. He also asserts that it was the solid financiers of Catalonia, rather than Queen Isabella, who provided the discoverer of America with the necessary money backing. Dr. Ulloa has discovered the copy of a letter written in the Catalonia language from Columbus to one of these backers, Luis de San-

tangel. Moreover this Lima researcher has built up a long argument to prove that the real name of America's discoverer was Colon, not Columbus, and his Christian name was not Christopher, but Joan (in English meaning John Dove).

Finally, and this made the Italians angrier than anything the Lima iconoclast has set forth, the Peruvian says, "I succeeded in finding among sixteenth century documents a sort of confession of the Italian Columbus on behalf of the Catalonian Columbus." Surely Mussolini will come to the rescue of Christopher Colombo of Genoa!

What next? That is the question which is always associated in the popular mind with the name Bernard Shaw. It was with a gasp of surprise that the public learned that he had written a play with Joan of Arc as the heroine. And perhaps even more astonishing is the news that Oliver Cromwell, the subject of his next drama, and that he will not speak badly of England in this play. If Shaw can discover good qualities in a typical Puritan like Cromwell, he will have boxed the compass. The only point in which the Irish dramatist approaches the Puritan is in his devotion to a vegetarian diet. "Shaw is so much opposed to the killing of animals to provide mankind with food that he will not even eat the yolk of an egg. He will eat the white but not the yolk, the centre of life. He would have been at home on fast days in Puritan England, but he would never have endured hour prayers and longer sermons. It will be extremely interesting to see what he makes of sturdy old Noll.

During the war the Germans had no fiercer opponent, than Rudyard Kipling. Several of his stories represent the plus ultra of impression of the Boche. It is therefore amusing to wonder what he has been saying of late on hearing the news that a Liep-

zig publishing house is bringing out a complete edition of his works in German. Benvenuto Hauptmann, the son of the famous German dramatist, is quite a Kipling enthusiast and is engaged just now in a translation of "The Jungle Book." Will Kipling refuse to receive royalties from the German publishers of his books? Will his hatred of the Teuton go that far? Or will the German publisher ever offer any royalties? If not, the vitriolic pen of Rudyard will sweep to its revenge.

English authors seem to be very careless in the handling of their manuscripts. Col. Lawrence of Arabian fame parked the first manuscript version of "Revolt in the Desert" on a station platform one day and went off to buy a glass of milk and a bun. When he returned his precious bundle was missing and he never recovered it. If the thief still has it, he possesses something more precious than rubies, but it is doubtful whether he would be aware of the fact. And now comes the news that another careless writer, M. P. Shiel, an English novelist, was hurriedly leaving a train in Rome took another person's club bag by mistake, the other fellow took his with the manuscript of a new Shiel novel inside. Shiel, like Lawrence, advertised his loss, but to no avail; for a long time he could not summon up the vital force necessary to rewrite the novel, but at last brought himself to it. It was a queer title, "How the Old Woman Got Home."

A little poem that has been justly praised for its conciseness of phrase and for the felicitous metaphor in the third line is Walter Savage Landor's "On His Seventy-fifth Birthday":

I strove with none, for none was worth my strife.
Nature I loved, and next to Nature,
Art;
I warmed both hands before the fire
of life.
It sinks, and I am ready to depart.
W. T. A.

NEW BOOKS

By MARY GRAHAM BONNER

Author of "A Parent's Guide to Children's Reading," etc.

EVERY mother of active young people dreads a rainy day, dreads still more two rainy days and is well-nigh nervous and frazzled at the end of three rainy days. Yet the elements do not take parents' problems into consideration. And something should be done about it as far as is humanly possible.

Not long ago I spent several rainy days by the sea, visiting in a household where two boys, beautifully healthy on fine days and distractingly healthy on rainy days, made up the younger members of the household.

TOO WET TO SWIM

It was too cold and too rough and, paradoxically enough, too wet for swimming. The voices of the boys drowned the roar of the ocean and the conversation of the family until a new book was opened—"The Gnome of Oz," by Ruth Plumly Thompson, founded on and continuing the Oz stories of L. Frank Baum.

In this latest volume (illustrated by John R. Neill), the author takes Peter and Ruggedo to the Emerald City and other parts of those sections of the imaginative world where adventures are to be had. It was a fine achievement when the first author, who died a few years ago, created Oz and its odd inhabitants, but it has been greatly to the credit of the present author for carrying on the work so admirably.

FACILE NARRATOR

Without diminishing praise due Mr. Baum for inventing so clever a story, Miss Thompson tells a story with more facility than he ever tells the interest slacken. When it was finished he turned to previous volumes to discover characters and happenings. We practically lived in Oz those days—and found it an entertaining place in which to reside.

How we enjoyed the cottage owner, son of a wizard who practiced magic in the Zamogochie Country. He was a "some-sparshly" person.

CONVENIENT

"Being constructed as I am as extremely convenient," he explained earnestly, "I am never tired or rushed about as ordinary Oz folk are. If I

wish to pick the peaches in my orchard, I send my hands to attend to the matter and while they are busy at work I rest myself comfortably at home. If my body is tired and I desire to be amused, I send my head to the nearest village for news and I can often help my less fortunate neighbors by lending them a hand or foot when they are in trouble.

There is a great deal of sentiment against series of books these days. Often they become dull, their authors weary of their characters and humor and invention lapse into negligibility. But it is not an inviolate rule that series are to be condemned. Children grow to love characters as friends. They want to continue hearing about them—and after all, the points of view of children are worth a little consideration!

DESERVED GRATITUDE

And when, as in the case of "The Gnome of Oz," the story-teller, the jollity, the succession of events, all continue to be so vigorously alive, the author deserves naught but praise—and parents of healthy young boys on rainy days will be so grateful to her!

Wants Americans Portrayed As Boobs and Hicks In Books

By HORTENSE SAUNDERS

Europe welcomes money and jazz, but hangs out no welcome sign to American literature, according to Alfred A. Knopf, New York publisher, who has just returned from a survey of the foreign book market.

"Europe is not looking for anything good from us in books, and does not want to have anything thrust at her," he said. "Europe seems to consider us better qualified for the production of skyscrapers and machinery.

ENGLAND'S SMUGNESS SHAKEN

"England, until the war, was inclined to be mildly amused by American attempts to crash into world literature. We were children printing on dates. The English feeling was and is that nothing good artistically could possibly come out of this country. That the English are now frankly antagonistic to our books is a good sign, since it implies a defensive attitude. Their sense of superiority is a bit shaken.

"More American books have been translated into German than any other foreign tongue, and on the whole Germans are less prejudiced against us than the rest of Europe—which does not mean Germany is not highly critical and often highly asquid at our efforts."

"Europe likes to believe Americans are Hicks and Boobs," says Alfred A. Knopf.

Sinclair Lewis, Knopf said, is the most popular American author in Europe. Mencken, too, has many admirers.

THEIR SATIRE RELISHED

"They are popular because they

LET'S TAKE A WALK!

It Puts Added Pleasure Into Motoring, Says Foot Expert

Don't forget to sandwich in some walking in your motor journeys. It will increase the pleasure of the automobile, diminish the tedium of a long journey and refresh body and mind.

"Too few motorists realize that the greatest physical and mental benefits of motoring are lost through constant and excessive driving," says Dr. William M. Schell, noted expert on foot hygiene. Dr. Schell urges people to return to the time-honored custom of walking as a cure for a host of ills which follow in the wake of continued physical inactivity and mental strain.

"Many persons feel completely exhausted after a day or several days of constant motoring," says Dr. Schell. "This is particularly true of the driver, although others in the car are also apt to feel the wearing effects of prolonged rides. The nervous tension of constant driving and the necessity of remaining in a sitting position over long periods are particularly trying.

"The body is constantly generating poisons, which are thrown off by the exercise and deep breathing which produce such invigorating results in brisk walking. This is apt to produce a measure of auto-intoxication with resultant weariness of body and mind.

"Persons thus affected often experience a feeling of mental depression and discouragement and the journey which should be stimulating proves merely an addition to the mental and physical strain which they have been endeavoring to escape.

"If you are going on a long automobile journey, do not ride all day. Walk briskly for half an hour before lunch when you make your midway

Break up a long ride with a brisk walk, says Dr. William M. Schell, foot specialist.

stop. You will then continue your journey refreshed and treble the pleasure of the ride.

"It is inadvisable to partake of a heavy meal immediately after a long drive when both body and brain are weary. Rest up a bit. Relax and invigorate your muscles, clear up your brain and you will be a safer driver."

Lack of sufficient walking coupled with the heat of many foot defects, the

specialist adds. Constant stepping on the gas has been known to injure the delicate metatarsal arch in the forward part of the foot.

"Mind, I am not advising you to give up your automobile," he advises. "It is the greatest boon of the age. Do not let riding become a strain. Use your feet and legs, too.

"I walk eight miles regularly every day, and I never enjoyed an automobile so much as now."

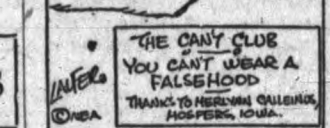

In Europe. To be a best seller in America is the European author's dream.

BUT IT'S MUTUAL

"But American authors are just as keen for European favor," Knopf conceded. "They value that prestige, scant as it may be, as much as the European values the dollars. You can hardly keep them from giving away the foreign rights to their books, because they are so eager to win European readers.

"We could learn much from Europe about the production and distribution of books. Germany is far ahead of us. The price of labor, of course, has much to do with it. Europe reads more than we do, and book publishing and selling are better established than here."

Knopf attended the international book exhibition in Leipzig.

Knopf attended the international book exhibition in Leipzig.

The Minstrel-Boy to the war has gone. In the ranks of death you'll find him. His father's sword he has fired on. And his wild hair stands behind him. "Land of song," said the warrior-bard, "Though all the world betrays thee, One sword, at least, thy rights shall guard. One faithful harp shall praise thee!"

The Minstrel fell. But the woman's chain Could not bring him proud rot and stain. For he tore his chords asunder, And the harp he loved he cast away. "Thou soul of love and bravery! Thy songs were made for the pure and free, Thy shall never sound in slavery!" —Thomas Moore: The Minstrel-Boy.

Books and Authors BIOGRAPHY GALORE

Noteworthy of All the Ages Are Being Done Over Nowadays

Books for Fall, coming from the press like the proverbial hot cakes, reflect the vogue here and in Europe of biography, served plain or buttered and sweetened with fiction, according to the author's taste.

Donald Douglas, a Missourian, and descendant of the famous Scottish hero, the Black Douglas, has delved into the family records, traveled and researched in Scotland, and developed the historical background for a swash-buckling tale, "The Black Douglas." He has told the tale with flare and flavor, and the publisher naively asserts that it is almost all true.

A NEWCOMER OF PROMISE

A nineteen-year-old Columbia undergraduate, Byron Steel, has written a delightful book, "O Rare Ben Jonson," with a mellowness of touch that many an author twice his age might envy. Steel, I understood, was in Professor Erskine's class in Elizabethan literature at Columbia, and found the red-headed, hard-fisted, hard-drinking Elizabethan poet such a fascinating character he was inspired to a first novel.

Against a background of taverns, court pageants, rowdies and royalty, he draws a convincing and human character who left a record of sixty-four years of sublime selfishness and hilarious generosity, ribald adventure and peaceful domesticity, extravagant wealth and contemptible poverty, glorious conceit and political self-abnegation, and who was much more important himself than anything he accomplished to leave as a legacy to posterity. This very excellent book leaves us anticipating much from this particular youngster in the literary field.

"The Life of Queen Mary," by Kathleen Woodward, published with the approval of the queen herself, leaves us made interested in the factory girl who wrote it than in the Queen herself. Miss Woodward eulogizes the Queen who opens orphanages and sets an example to the nation, the splendid mother, the perfect wife, the meticulous housekeeper and the paragon of all substantial virtues. But the narrative is too guarded and has too few really human relations.

The picture of the Queen in her kimono and house slippers, however, probably would not be approved by the Queen and hence would not be published.

VICTORIA

Another revelation of court life in England is "Letters of Lady Augusta Stanley," edited—too thoroughly, also—by the Dean of Windsor and Hector Bolitho. An explanatory blurb promises that Queen Victoria will emerge as a woman human and witty, alive to art and an enemy to the very "Mid-Victorianism" which has taken its name from the epoch she dominated. Well, she doesn't thus emerge. The dean was careful there should be no less majesty. Everything is dear, charming, delightful, and as it should be. Consequently we must return to Lytton Strachey for a more comprehensive view of the period.

Francis Carco depicts the vagabond

They're Taking The Trouser-skirt Seriously

Brown velvet street suit with divided skirt (left) and the "prohibition skirt" with quart pockets and beaver-trimmed jacket.

Women, it seems, are determined to "wear the trousers."

Culottes or skirts? That seems to be the question this Fall, with the bifurcated skirt in the lead.

London and Paris have accepted the new trouser-skirt. America seems about to. Certainly the pyjama pad on beach and veranda this Summer pointed to this and Autumn styles prove that there's a real leaning towards this type of netter garment.

These are no tight, mannish, trouser-like affairs, these new divided skirts. Rather, they take almost double the material of the former, straight or wrap-around skirt, and they demand a master hand to cut them.

In clever, subtle ways, they conceal the division with a panel, a drape, a sash or gorgeous fringe, and all one notes is a graceful skirt while the wearer rejoices in absolute freedom of motion. Smart daytime dresses, sports frocks and even evening gowns sponsor the culotte.

Lavinia, Worth, Chanel, Caret and other Paris designers have adapted the

poet of France in "The Romance of Villon." Don't expect similarity to Barrymore's version of Villon in the films. Carco makes him a scoundrel who happened, too, to be a poet. He introduces us to the drag of Paris, with gangs, low gambling joints, and women of the streets. But he evolves a poet who lived a unique life, and makes him strangely authentic. Incidentally, this book contains some of Villon's best poetry—bound to be the best thing in the book.

culotte to evening use and an amazing array of gleaming, shimmering, gorgeous creations in chiffons, transparent velvets and laces, all with divided skirts, have resulted.

Worth, foremost among those sponsoring the new style in skirts, has fashioned many of his velvet suits and dresses with culottes. A brown velvet street suit has divided skirt, but so cleverly do they pleat into the waist that they look like a skirt.

Newest of the divided skirts is the "prohibition skirt," which serves double duty of giving freedom to its wearer and at the same time aiding her to maintain personal freedom by riding liquor within its folds. Four pockets, one on the front and back of each trouser, yawn for a bottle each. This skirt is said to be tremendously popular with Americans about to embark for home.

Whatever the future of the culotte, suffice it that it holds high popularity right this minute. It may eventually suffer the fate of the obsolete shanty gown. But in the boudoir, for house wear, for sports, the street and the dance, the divided skirt right now gains standing each day.

Charles was thirsty for knowledge, and was always collecting interesting facts. "I read to-day," he said to Michael, "of the wonderful progress made in aviation. Men can now do anything—absolutely anything—a bird can do."

But Michael was tired of wonders; he was more matter-of-fact. "Is that so," he answered. "Well, when you see an airman fast asleep, hanging on to the branch of a tree with one foot, I'll come and have a look!"

Connell Tells Story of Historic Window In Christ Church

Around It Is Woven the History of Sir James Douglas and the Douglas Family, and Running Back to the Death of the Good Lord James

By ROBERT CONNELL

SET in the old gray wooden walls of Christ Church Cathedral there is a stained glass window, which in spite of its rich color is comparatively hidden from the eye of the worshipper. Yet this window is historically endowed both in purpose and associations. It not only links the present cathedral with its predecessor on the same site and the life of Victoria and Vancouver Island with the men who laid the foundations of their life-to-day; it takes the spectator back to the reign of the second Charles and, still further back, to Scotland's stirring fight for freedom. As such it is well worthy of a special visit and inspection of its pictured glass.

The window was placed in its situation on the south side of the sanctuary about twenty-one years ago, the exact date I cannot recall. It was erected as a memorial to those officers of the Hudson's Bay Company who were associated with the old Victoria District Church. This church was destroyed by fire in 1869, and the present Christ Church replaced it.

The centre of the window is occupied by a large figure of the patriarch Abraham who holds in his hands a stone altar. He is thus set forth as the "patron" of pioneers whose custom of "setting up an altar" to his different encampments is thus related to the foundation of Christ Church by the Hudson's Bay officers. Above the figure of the patriarch is a smaller figure of the great Hebrew pioneer in the coat of arms of the company with its legend, "Pro pelle cutem," "skin for a skin." On each side of the centre-piece the names of the officers commemorated are placed in narrow oblongs. At the bottom of the window is the coat of arms of the Douglas family, commemorating Sir James Douglas, who as chief factor of the Company on the Island and as governor of the infant colony brought to the

administration of both offices wisdom, energy, tenacity, and dignity.

There are thus brought together within the compass of the window three streams of romantic adventure; the wanderings of the Hebrew prince whose figure looms up across the centuries as the very type of perilous faith, the long succession of adventurers who from the courtiers of St. James to the men of the Orkneys and Hebrides and Western Isles penetrated the "great lone land" of North America, and still another colorful tale which coming up out of Scotland's past links itself with Sir James Douglas.

SIR JAMES DOUGLAS

Of James Douglas's career the story may be read in the pages of Parkman and other historians. He came as a youth of sixteen to Canada where he entered the service of the old North West Company, that Montreal rival of the Hudson's Bay Company and product of Scottish capital and French-Canadian skill. Seven years before he entered upon the Canadian scene, another of the house of Douglas, Thomas, Earl of Selkirk, had landed on the banks of the Red River his first handful of settlers, precursors of the men whose wheatfields stretch today to the foothills of the Rockies and to the waters of the Peace. James Douglas had been with the North West two years when the long strife between the rival companies came to an end with their amalgamation, and thenceforth his name is identified with the Hudson's Bay Company, until the eventful day upon which he became first Governor of British Columbia and Vancouver Island. By 1840, at the age of thirty-seven, he had risen to the office of Chief Factor.

Working under that redoubtable old

chief, Dr. John McLoughlin, he eventually succeeded to his power, and he was still in his early forties when he held in his hand the destinies of the Company on the North Pacific. It was a life full of adventure not unmingled with danger which he with his fellow-officers lived. Through the later trend of political affairs the lands of Oregon and Washington became separated from those of Britain now included in the Canadian commonwealth, and with the separation that romantic past across whose stage move so many figures of men of British blood and allegiance has become discovered from the common stock. Yet the history of those trading-pegs is in reality so bound up with the story of our own beginnings and development that the disavowal works injury to both. In truth our historical sense must overlap the 40th parallel in its demand for continuity just as the geographer must ask the Columbia as it pushes across the boundary, and follow it till it passes westward between Oregon and Washington to the ocean.

In 1843 Douglas founded Fort Camosun or, as it was later called, Fort Victoria. There was another Fort Victoria, still in existence some thirty years ago, on the North Saskatchewan near the top of the great bend northeast of Edmonton. It was as I knew it a stockaded square with factor's house and store buildings of whitewashed upright logs, but in spite of its beautiful situation it was a pigmy compared with the Fort Victoria which first took the place of Fort Vancouver in the south, and then gave way to our present city. With its high cedar palisade and its gun-mounted bastions, it looked what it was, the chief centre of the Company's operations on the coast. Three years after the establishment of Fort Victoria, the expected event took place: Washington and Oregon were ceded by treaty to the United States. In other words the Columbia ceased to be the international boundary south of parallel 49.

This was in 1846, and in 1849 Vancouver Island became a colony of the Hudson's Bay Company. Blanshard was the first governor, but a few months' experience led him to resign,

and in 1851 Douglas took the vacant post. In 1850, the year of the first gold-rush, he was made governor of the mainland and of Vancouver Island. As might be expected his rule in the early days was largely a benevolent autocracy. His training in the Company's service combined with his own natural dignity, sense of justice, and inflexible determination, fitted him for the business of governing the large area over which he presided, and holding in control the conflicting elements of its swift increase of population. To hold the scales of justice with firm and unwavering hand in face of settler, miner, merchant and Indian was no light task and required a great spirit to undertake and accomplish it. In 1864 he retired from the governorship and received the honor of knighthood as an acknowledgment of his services to the Crown. He died in 1877. Two memorials of him are conspicuous: one the granite obelisk in front of the Parliament Buildings on Belleville Street, the other the noble Mount Douglas Park with its commanding view of land and sea, its wild life of forest and cliff, and its geological records of bygone ages.

THE DOUGLAS FAMILY

James Douglas was a scion of one of the most celebrated of Scottish families. It emerges from the dim light of Border history towards the end of the twelfth century in certain signatures appended to charters of the period. Its members appear to have shared freely in the wild, lawless life of the dalesmen, and we hear of such exploits on the part of one as the robbing of the Melrose monks and sundry conflicts with the authorities. It was this Douglas, known as William, the Hardy, who threw in his lot with William Wallace and identified his family with the war of Scottish independence. The ancestral home in Douglasdale where the waters of the Douglas enter the Clyde near Bonnington Falls, is the Castle Dangerous of Sir Walter Scott, and the great novelist's last Scottish expedition was made to the Castle of Douglas and to "the

Kirk of St. Bride of Douglas, the patron-saint of that great family."

Sir William's son, James, was one of the most celebrated of Robert the Bruce's captains, and shared in the Highland wanderings of that monarch. The generosity of disposition which afterwards won him the name of "the Good Lord Douglas" made him in that little band of women who, with the Queen, were in the party. On their return to the Lowlands the skill of Douglas became evident in the conflict with Edward and the English troops. His own castle of Douglas was in the hands of the Southrons, but he succeeded by combined craft and courage in killing three successive commanders as well as working havoc among the soldiery. The castle was in consequence left alone thereafter by the English. All of which may be read at length in "Castle Dangerous." The interest of Scott in the Black Douglas, as James was also called, is seen also in the pages of "Tales of a Grandfather," where many stories of his prowess occur. It is related that at the battle of Bannockburn Douglas showed his bravery or disposition to "play the game" under the following circumstances. Sir Thomas Randolph, the Bruce's nephew, was Douglas's rival in deeds of daring. During the battle his somewhat quicker temper was touched by a remark of the king, and he set off with little thought and few men after a much larger picked force of Lord Clifford. Douglas who was by the king's side saw the danger and pressed to be allowed to go to the aid of Randolph, but was at first restrained by the king. On permission being at last given he dashed forward, but "long before they had reached the place of combat they saw the English horses galloping off, many with empty saddles." Thereupon Douglas halted his men with the words: "Since we were not soon enough to help him in the battle, do not let us lessen his glory by approaching the field." But his most famous action I shall leave for the moment.

There were many other celebrated men in the Douglas family which two centuries after the days of the Bruce we find divided into two, the Black Douglas and the Red. They were all brave men, though it was not possible to say of all of them what was said of Gavin Douglas whose life has been described as "one of the most adventurous in Scottish history; one who in all the actions of his life discovered a gentle and merciful disposition, regulating the warlike and heroic spirit of his family by the excellent laws of the Christian religion." It was probably their force of character as much as their "warlike spirit" which made the Douglases almost as great as the reigning Bruses and Stewarts, and one can only conjecture what might have been the outcome, had the strong men of their race come to the throne. As it was the rivalry between the sovereigns and their great subjects issued very unhappily.

A KING'S LEGACY

In the lower part of the cathedral window glows in the Douglas arms a bloody heart. Its story is this. In those far-off days men of war often turned their eyes towards the Holy Land where the Sepulchre of their Lord lay in the hands of the Turks, or Saracens. In fighting for its deliverance and restoration to Christian hands these soldiers sought to make atonement for their violence, or at least for some special occasion of it. So King Robert the Bruce had hoped that when Scotland was once more a free country and at peace he might be able to cross the lands and seas, and if need should be, die fighting for the Tomb of Christ. He particularly felt that he ought to make in some such way expiation for the killing of his rival, John of Badenoch, the Red Comyn in a Kirk of Dumfries. But the hand of mortal sickness was hard upon him when the peaceful days came. He had spent too many years of his manhood upon the mountain and moor, with the heater for his bed and little other covering from the night air. He had known hunger and thirst in the long days of waiting till the time was ripe to strike. It is said that he had leprosy; it is possible that it was some form of scurvy resulting from scanty and improper food. He was but fifty-

four years of age. Death was near at hand when he called to his bedside his friends and comrades of many a hard-fought field. In that solemn assembly he committed a sacred charge to the Good Lord James. It was none other than the bearing of his heart to the sacred City and the deposition of it in the Sepulchre. The brave Douglas broke down and wept as he pledged his fulfilment of his king's desire.

DEATH OF THE GOOD LORD JAMES

At Cardross, almost opposite where Port Glasgow's noisy hammers ring on the hulls of ocean liners, the Bruce died on a day in June, 1329, and immediately after Douglas set about the performance of his trust. The king's heart was enclosed in a casket of silver, and thenceforth till the hour of his death the Good Lord James wore it round his neck. With a small company of chosen knights he set sail for Palestine, but never reached him that the Spanish king, Alfonso, was being attacked by the Moorish king of Granada, and as the Moors were of the same race and religion as the Saracens whom he expected to fight against in Syria he disembarked at Sivas in Flanders and went to the assistance of Alfonso. In a battle fought on the borders of Andalusia the Scots displayed their accustomed courage and dash, but in their eagerness they fell victims to a ruse of the Moors. Feigning flight and thus drawing the pursuing Scots on, the Moors suddenly wheeled and with the battle-cry of Mahomet overwhelmed the little Scottish force. Douglas in the thick of the ensuing fight went to the help of Sir William St. Clair of Rosslyn who was engaged in a hand-to-hand fight with a large number of Moors. But hard pressed himself in turn, he had recourse to a last desperate measure. Unfastening from his neck the silver casket he threw it with all his might into the midst of the enemy, crying, "Tradition says: 'Pass first in fight as thou wert wont to do, and Douglas will follow thee or die.' Pressing on he reached at length the place where the casket fell, and there his dead body was found after the fight, lying above the heart of Bruce. His surviving comrades bore his body back to Scotland and with it the casket. The bones of

Douglas were interred in the Kirk of St. Bride, Douglas, and the heart of King Robert the Bruce was laid in the Abbey of Melrose below the high altar. Of it was well said, "Living that heart had been for all Scotland, and none but Scottish earth could be its meet resting-place." Since then the Douglas family have borne on their escutcheon a bloody heart surmounted by a crown. Ayton's "The Heart of the Bruce" in his "Days of the Scottish Cavaliers" is a stirring version of the story. It ends thus:

"We lifted thence the good Lord James
And the priceless heart he bore;
And heavily we steered our ship
Towards the Scottish shore.
No welcome greeted our return,
Nor clasp of martial tread;
But all were dumb and hushed as death,
Before the mighty dead:
We laid our chief in Douglas Kirk,
The heart in fair Melrose;
And woeft men were we that day;
God grant their souls repose!"

Among the other tales of the Douglas family is that of the Earl of Angus popularly known as "Bell-the-Cat." On the eve of Flodden the old soldier warned James, and at a contemptuous remark of the king he left the camp. But "his two sons remained, and fell in the fatal battle" with two hundred of the name of Douglas.

I have thus called the attention of my readers to the Cathedral window and its representations in the belief that the associations which they suggest add to the interest and significance of our Province's past, and that they show us, too, how the courage and determination, honor and integrity, which marked our own Sir James Douglas and his associates linked them and us with the past history of our race and suggest that in no small degree they were the fruit of a consciousness of that history.

May I add that the Douglas fir has no connection with Sir James but bears the name of another Douglas, David, the Scottish botanist, who was a pioneer of his science on these shores more than a century ago?

At 80, "Little Buttercup" Seeks Youth Again

To Write Memoirs and Pay Bills, Carry King Wants a Second Voronoff Operation

By JULIA BLANSHARD

Carrie King, famous in the '20's as "Little Buttercup" in the original production of Gilbert and Sullivan's "H. M. S. Pinafore," wants to undergo her second rejuvenation operation at eighty years of age!

A battered, weak little woman, uncomplainingly bed-ridden in a modest hotel room in New York's "Roaring Forties," she longs for her old home in Paris:

"I want to go back so that I can have another gland operation. I need my strength to write my memoirs and pay my bills."

REFRESHED YOUTH

Carrie King is said to have been the first patient of Dr. Serge Voronoff, the noted Viennese gland surgeon. Though an arduous ordeal, she says it gave her renewed strength for a while. Her friends remarked her freshened looks as she strolled the Parisian boulevards, a jeweled monkey on her hat as a talisman.

Paris had been her home for years, ever since she left her husband, Charles King. Her little Parisian home was the Mecca for celebrities—the late Lillian Russell, who was her life-long friend; Mary Garden, Ganna Walaka, Nat Goodwin and others. In Paris, she was called "The Angel of Comfort-Parasutur" for the help she gave needy artists.

CAME ADVERSITY

Two years ago she came back to America for a catarrh of the lungs, following it was an accident which has kept her bed-ridden for fifteen long months, and which consequently has exhausted her funds. She sold her fur coat and other good clothes. She pawned her jewels, and when discovered recently by an old friend, was penniless, half-starved, worried sick by her unpaid hotel bill.

CARRIE KING
A'S
"LITTLE
BUTTERCUP"

As
LONDON
knew her
in 1879

"a battered, weak little woman"—
CARRIE KING TODAY

"How could I ask my friends for money? I have always paid my own way!" is her answer to the suggestion that she might have got in touch with some of the many she has befriended.

There's a certain twinkle in Carrie King's big, hazel eyes. And there's youthful vanity in the pink ribbon tied around her bobbed white hair. A dozen empty lotion bottles on her

dresser testify to meticulous grooming before adversity came.

"Of course my hair is bobbed," she says, matter-of-factly. "Just because it is white it doesn't mean I'm aged either. I've always been white-headed, and married, too, for that matter. Both happened before I was sixteen."

SHE AND LIL RUSSELL

"After I quit the stage, I wrote for a New York newspaper from Paris, all about interesting actors, actresses and the latest music. Those were the days when Lillian Russell was writing beauty stories for the press and an editor kept telling her to 'cut out the philosophy and give more beauty' and she would answer, 'How can you tell them apart?'"

"I remember when handsome Charles R. Thorne joined our Union Square Opera Company in New York. Girls used to write mad notes to Charles. He was so handsome, he said to me, 'Carrie do open those notes and read them to me. Then I can tell my wife 'No, dear, I haven't seen a one.'"

REMINISCENCES

"Of all the handsome men that ever stepped upon the stage, Robert Mantel was the best looking. Otis Skinner was marked for success the day he started with us as a very young man. Old Fred Ward I remember well, in the 90's it must have been. I saw John Barrymore a few years ago and he was good. But his father, Maurice, was a genuine. One of the tragedies of my life was when I visited him at Amityville a few years ago and he didn't remember me. I cried all the way home."

"Oh, I've plenty of old friends glad to help me out," she added modestly. "Only I can't bear to have them know my situation. If I can just get enough money together to get back to Paris I'll be all right. I'll get strong there. I have a contract to write my memoirs and I won't be satisfied now until I get back there, have another operation and get to work."

Brain Concussion Calls For Close Examination

When a human being is hit on the head, if the blow is not too hard, he usually recovers. Perhaps a week or so later he will begin to develop peculiar symptoms which may be the result of actual damage to the brain, or which may be purely a mental disturbance.

Occasionally the blow results in a wound of the scalp, but not always. In a few instances there may be an actual cracking of the bones of the skull, but even this may not be associated

with serious symptoms.

STUDY OF 100 CASES

Recently 100 cases of persons who had been hit on the head were studied. Some of them had fallen while at work, some had been struck down by automobiles, and a few struck with weapons.

If the brain is injured, there are invariably symptoms of incoherence, sometimes due to bleeding into the brain, sometimes to mild inflammation.

In every case a person who has received a severe blow on the head and who suffers with any secondary symptoms such as dizziness, ringing in the ears, disturbance of vision, headache, drowsiness, pains in the eyes, inability to sleep, convulsions or vomiting, should have a most careful examination by a competent specialist in diseases of the nervous system.

Sometimes the symptoms of severe infections of the nervous system, particularly of the brain, resembles those resulting from a blow on the skull.

INVISIBLE ARTIFICE BROUGHT TO LIGHT

(Continued from page 1)

for painting into an auto and set out. Toward eleven he would return with a sketch that he would smugly show me.

There was really nothing suspicious about him. He never did things secretly; he received no suspicious callers, no compromising messages. He himself wrote very little.

It was in writing letters, however, that I noted the fact that all the letters he wrote—eight a month—were addressed to the same person, a Madame H—M—Bernie, Switzerland. It was to this same lady, who, he said, was a dealer both in old masters and in modern paintings, that he sent all his sketches, water colors, and oils. After all, it might have been true, and I had no way of disproving it.

WHAT MET THE EYE

That was the situation when one fine day I was examining a landscape done in pencil that he had just held up for my inspection. It seemed to me that some of the perspective in it was not quite right. It was out of drawing. It had about it a certain heaviness entirely out of keeping with P—'s usual style, which was passably good.

Of course I said nothing about my observations. I pretended to be enthusiastic over the picture and asked him to allow me to copy it. He hesitated for a moment, but I was so insistent and overwhelmed him with such praise that he finally agreed to let me have it until that evening. As soon as he had left, I set to work and by means of a special process I quickly discovered a second sketch beneath the pencil drawing. As may readily be seen from the illustration, underneath the sketch was a

map of one of our submarine bases!

The notes that went with the sketch proved the case beyond doubt. The windmill covered a light-house (A); the clumps of trees were fortifications, trenches, and a semaphore station (B); the groups of buildings were sketched in (C); strategic railway lines were indicated by the letter (D); the belfry of the church were marked by a letter (E).

It was imperative to place the man at once where he could do no more harm. It was accomplished that day. And it was done so quietly that no one even at the Hotel M—suspected anything. (Copyright, 1927, Metropolitan Newspaper Service, New York; Arrangement with Robert M. McBride & Co.)

NEXT WEEK: Military Messages in Bars of Music.

SHARK INDUSTRY TO BE TRIED OUT IN SOUTHERN SEAS

Reuter's Special to The Victoria Times

London, Oct. 1.—A new British industry has been found in the preparation of leather from shark skin.

The St. Isaac, at present lying in the East India dock, which has been outfit to demonstrate the discoveries of Dr. Alfred Ehrenreich, has just returned from an experimental cruise of Western Australia. Dr. Ehrenreich has studied the habits of the shark in most of the oceans of the world, and is regarded as the greatest living authority on its migration and general habits. The main product is the leather, many forms of which are made from shark skins.

Here the discovery lies in the removing of the denticles (the teeth in the skin) commonly called shagreen, before and after tanning. The tanning itself can be accomplished in anything from ten to twenty-four hours after immersing the skins in the tanning solution. Companies will be formed in Ceylon and India (where the religious prejudice against wearing cowhide shoes is expected to provide a rich market), Australia, South Africa and other Dominions.

Among the inventions may be mentioned the removing of the hides of all

Grave of Hamlet Found in England

London, Oct. 1.—On an ancient stone in his churchyard is an inscription which the Rev. L. G. Hunt, rector of Munsley, near Hereford, has deciphered as meaning Hamlet Khethi, the Danish prince, who was the Hamlet of Shakespeare's play.

The rector is convinced that Hamlet is buried in the churchyard or in the church itself, but says he is not anxious that the church should be made a show place for visitors.

plagiostome fish mechanically. A patent deals with the engines, which are used in tanning and may also be used for the production of insulin, which is supposed to be an absolute cure for diabetes. Pigments are produced from the gall; glue, meal and fertilizer from the refuse, and from the embryos too small to be tanned a silk is drawn which is superior to silk in its tensile strength.

The latest discovery is the desodorization of shark liver oil, which is used for medicinal purposes. The large and small white fins and large and small black fins are all popular with gourmets throughout China and the Far East; and brined, salted, fried, smoked or pickled shark's meat is a favorite dish in China.

Personal Playing Cards Introduced in England

London, Oct. 1.—Personal playing cards are the latest invention here and seem likely to become popular.

Edmund Dulac, an artist, introduced the fad. He has made for Sir Edmund Davis, art collector, a special design for the backs of the cards to be used at Chillingham Castle, Sir Edmund's seat near Canterbury. The towers of the castle and two of the deer that roam on the beautiful estate appear in the design.

Teacher—"Willie, can you tell me how matches are made?" Willie—"No, ma'am, but I don't blame you for wanting to find out!" Teacher—"Why, what do you mean?" Willie—"Mother says you have been trying to make one for years."

The hair-line in the latest bob is as irregular as the season's hemlines in dress. If your hair doesn't curl, at least it should be bobbed unevenly.

A PAGE FOR THE CHILDREN

OCTOBER 15 IS FINAL DAY IN FOREST FIRE PREVENTION CONTEST

Entries From Rangers and Lookouts of Times Fire Safety Club Must Be In By That Date

Rangers and Lookouts of The Times Fire Safety Club, who are attending the closing contest to decide the winners of \$25 in cash prizes or the right to a place on an outing under the guidance of Forestry Officers, have until Oct. 15 to prepare their entries.

Repeated this week so that all members of the club will be sure to see them, are the conditions and the few simple rules of the contest. Here is what to do and how to do it:

Write a letter in your own words, as you would to a school chum, telling what you learned during the course of the Summer holidays about fire prevention in the woods; how to build camp fires and look after them properly; describe as nearly as you can what happens when the forest takes fire, and what damage results. Include any personal experiences you may have had this year in camping parties, and explain about the pledge you took when you became a member of this club.

Your letter should give your imaginary chum a clear picture in words of your duties as Ranger, or Lookout, in The Times Fire Safety Club. And so that all letters will be uniform, imagine this companion to whom you will write to have the same Christian name or nickname as your best friend, and write as if you were indeed writing to your chosen companion.

The rules are few and simple. Write in pencil or ink on one side of the paper only. Do not put your name on the letter, but place your name and address on a separate sheet of paper to attach to your letter when complete. Address your letter to "Children's Editor, The Times, Victoria, B. C." and post it so that it will arrive in Victoria not later than October 15, 1927.

Of course, we want you to do the best you can, but this is not an essay contest, and it is what you know about forest fire prevention that will count chiefly in the judging of your entry. Do not forget to use your own words, and write as if you were writing to a chum. Short or long, your entry will be judged on the knowledge it shows of the need for care with fire in the woods. Do not quote from anything you have read, but use your own words throughout.

The sum of \$25 in cash prizes, or an outing under the guidance of the B.C. Forest Branch will go to winners in the contest. Say on the sheet containing your name and address if you will be available for the outing, to start from Victoria, or if you would rather compete for the cash prizes. Naturally some members would find it difficult to come to Victoria while the school term is on, so prizes for the winners have been arranged in two forms with that in view.

HIS SQUIRREL PLAYMATES

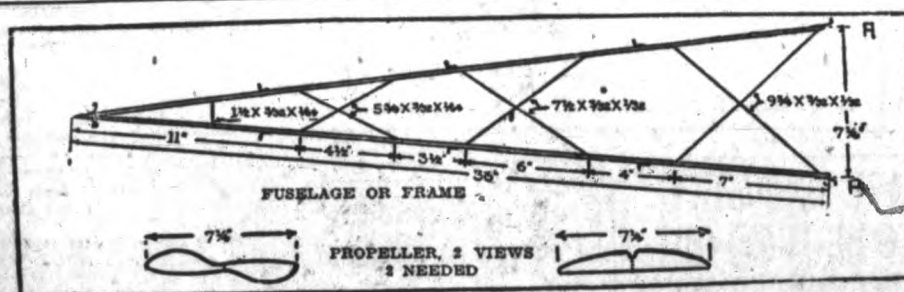

Some folks in Western used to call "Rags" a nut because of his dog-like playfulness. And it offended "Rags" sober collier citizen that he is. So he called in "Miles" and "Ike," his friends from a nearby oak tree, just to set the gossip at rest. And they didn't even bark at him!

Waste Causes Heavy Losses

Through burning coal instead of smokeless fuel, Britain is losing millions of pounds a year. Forty million tons of coal are burnt annually in households alone, and this presents a loss estimated at two and a half million pounds according to Professor J. B. Cohen, of Leeds University.

The amount lost on industrial consumption in solid fuels is about three millions. Inefficient heating appliances cause a yearly loss of anything between twenty and thirty million tons, while the amount of money wasted on account of washing due to smoke is incredible. In Manchester the amount expended on extra washing approaches a quarter of a million pounds a year. Coke, gas, and electricity, all cleaner and more efficient, were suggested by Professor Cohen as substitutes for coal.

BUILD THIS TWIN-MOTORED MODEL.

One motor was enough for Colonel Lindbergh in his flight across the ocean, but Commander Byrd and his three associates who flew across in a giant Fokker relied on three motors. Previous articles have told you how to build a single motor model and now complete instructions for building a model with two motors will be given. This model is called a pusher, because the two propellers are located on the rear, push it through the air. Because this model is more complicated than the others described in previous articles, the instructions will be given in two articles.

To-day you are told how to construct the fuselage and the motor. Next week we shall build the wings and elevator and assemble the plane. The following material is needed for the fuselage or frame, and the motors:

FUSELAGE OR FRAME:
2 pieces balsam or pine, 36-in. x 1 1/2-in. x 3/32-in. for longitudinal.
2 pieces bamboo 3/4-in. x 3/32-in. x 1-3/32-in. for rear X brace.
2 pieces bamboo 7/16-in. x 3/32-in. x 1-3/32-in. for middle X brace.
2 pieces bamboo 5/16-in. x 3/32-in. x 1-3/32-in. for front X brace.
1 piece bamboo 1 1/2-in. x 3/32-in. x 1-3/32-in. for front X brace.

1-64-in. for front brace.
2 ball bearings for propellers.
6 cans or rubber guides.
1 nose hook.

MOTORS:
2 propellers 7/16-in. in diameter 1-in. wide, 1/4-in. thick.
2 shafts, plain.
2 "S" hooks, safety.
4 No. 16 washers.
24 feet of rubber, 1/4-in. flat thread.

THE FUSELAGE
Always in the construction of a wedge-shaped or "A" frame, the best procedure is to lay out the shape of the frame full size on a large piece of paper, and lay the material directly over this plan while putting it together. This insures correct placement and true construction.

Having done this, cut the front of the two longitudinal into a wedge shape and amble them together. The wedges should have such slant that the rear ends will be 7/16-in. apart, as shown. Next bind the nose hook in place. All of the fittings such as nose hook, cans, etc., were described in detail in the fourth article of this series. Next insert the braces in the proper places as shown on the plan.

These are fastened by sharpening their ends to a flat chisel-like point and pushing these points into the side of the longitudinal, and amble them in place. The braces should be inserted beginning at the apex and continuing toward the rear. When all are in, line up the fuselage and make sure that the sides are straight.

Trim off any portion of the braces which may protrude through the longitudinal and proceed to attach the cans and bearings in their proper places. This frame can be somewhat strengthened by painting it with "dope" or banana oil.

MOTORS
The propellers are cut to the plan and profile shown as explained in article on propellers. When finished the shafts are inserted, and passed through the ball bearings using the washers for reducing friction. The rubber thread is divided into two equal lengths, and each of these looped into four strands, each 3/16-in. long. An "S" hook is fastened in each hank and the rubber is passed through the cans and attached to the propellers. The "S" hooks being fastened to the nose hook. The propellers are placed at the points of the fuselage marked "A" and "B" in the drawing above.

Out of the bushes stalked the Bear

hill and dale on his way to see what might happen. He kept thinking of lemons, oranges and grape fruit so he would not forget to pick plenty of sour grass to go in the pickled carrots.

Perhaps you may not know what sour grass is so I shall tell you. In the woods and fields grow what is called sorrel. Some sorrel has fine green leaves, like tiny clovers, and this is called sheep sorrel. It has a pleasant, sour flavor and is not bad to eat raw, but it is very pucker like persimmons.

Then there is another kind of sour grass called horse sorrel, with larger, darker green and stronger leaves. It is shaped like a spear head. This is also good, but sheep sorrel is better. After hopping around for quite a while and finding no adventure, Uncle Wiggily saw a little toy store where the monkey gentleman who kept it also had bottles of glue for sale.

"So many children break their toys,"

Jack Lockwill's Hidden Enemy

By GILBERT PATTEN

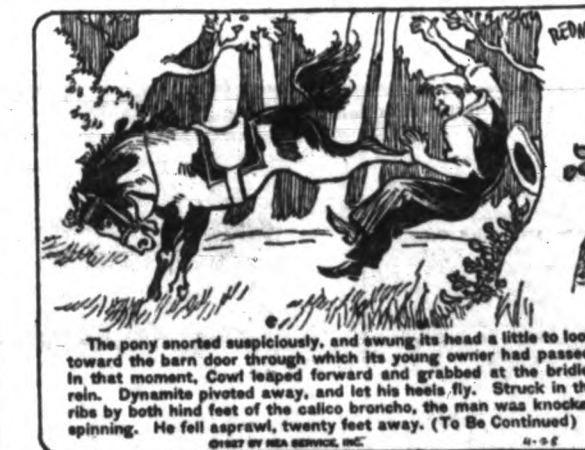

Outside the barn, Abel Cowl listened a while, with his ear against the door that he had closed and fastened. He could hear sounds of the struggle that was taking place within, and his unpleasant face wore an expression of anxiety. Presently all was still. With unsteady hands, the farmer unlocked the door and opened it a little. "Have ye got him?" he asked in a whisper.

"You bet!" came the answer. "I've got him, and I'm 'nibbling' him up now." Once more closing the door, Abel Cowl turned away and moved toward the pory.

"Good! Good!" said the farmer, holding out his hand as though offering Dynamite something. "Just let me get hold of ye once more!"

The pony snorted suspiciously, and swung his head a little to look toward the barn door through which his young owner had passed. In that moment, Cowl leaped forward and grabbed at the bridle-rein. Dynamite pivoted away, and let his heels fly. Struck in the ribs by both hind feet of the calico broncho, the man was knocked spinning. He fell asprawl, twenty feet away. (To Be Continued)

HOW PHOTOGRAPHS CAN BE BUILT UP

The snapshots are often disappointed with the prints made from his negatives of pretty landscapes, and is puzzled to know why. In nine cases out of ten he will find that it is the absence of the clouds that were present when he made the exposure. More often than not it is the beautiful clouds that attract him when he looks at a landscape and decides to make a record of the scene.

The experienced photographer continues a winter in Tit Bits, is not caught in that way. He studies his chances of retaining the clouds on his negative, and, if he is in doubt, considers how the photograph would look without clouds. Often he will decide that it is not worth taking.

Having taken such a picture it is not a difficult matter to print clouds in if the subject is considered to be worth while. To do this we need cloud negatives, and a good deal of judiciously exposed will provide us with half-a-dozen in as many minutes or a day when there is a little wind moving overhead. The camera should be set at F22 and the shutter at one-fiftieth second.

The set of cloud negatives having been obtained, one that will suit the details of the landscape are bright and sharp. With a pair of scissors or the point of a razor-sharp knife the print is cut in halves, following the skyline as carefully as possible. The two pieces are now placed in the sun, where they will rapidly darken until you cannot see light through them.

The next proceeding is to put the sky portion of the divided print over the negative where the clouds should be, and over that a full sheet of the printing paper. Print until the landscape is right. The result will be a landscape with a clear sky.

Now put a cloud negative in the printing frame and over it place the other portion of the cut of print, covering up the landscape or bottom part of the picture. The darkened paper will shield the print of the landscape while the printing of the clouds goes on. When the printing of the clouds is complete the print may be taken out of the frame and fixed, or if desired it can be copied, in which case a new negative containing both clouds and landscape will be obtained.

If the join of the clouds print and the landscape is too obvious in the print the outline may be softened during printing by the simple expedient of laying pieces of cotton-wool on the negative while printing is proceeding, placing it so that it lies just over the edge of the join. One or two attempts will soon bring proficiency at this interesting work.

MODERN WAYS NOT SO NEW AFTER ALL

Those who declare there is nothing new under the sun are guilty of too sweeping a statement. If, however, they had said that much that we think is new is really very old, they would have spoken the truth. And they might have given examples that would startle Search the Patent Office records, continues a writer in Tit Bits, and you will discover the specifications of the safety-pin, New's No. 10. Go to the British Museum and you will see safety-pins thousands of years old.

To-day a good many cycle tyres bear either a distinctive pattern or the name of the maker of tyre on the tread. Rubber-soled shoes, too, have patterns. New? No. In the Museum there is a girl's shoe, thousands of years old, which left the message "Follow Me!" Many of the soles of "B.C." Grecian shoes have studs that formed words in the sand or soft ground when the wearers went a-walking.

The fashion, launched a few years ago, of having initials in gold or silver on the backs of brushes, and so on, is at least 4,000 years old. Beautiful examples can be seen in the Museum.

Every girl now carries a bag. But neither her mother or her grandmother did. So vanity bags are modern? No. Grecian women had them. There are plenty in the Museum.

The women of B.C. times used powder and cosmetics, and preserved in the Museum are not only the receptacles but the remains of the actual powders and so on.

Wireless development is new, but its basic principle—that vibrations would travel in definite waves through the air and could be "picked up" again—was known long before the tribes in Central Africa. They had their crude transmitters and receivers and cut "wave-ways" through the forests.

Some day oil, gas, and electricity, as illuminants, may be superseded by "boxed sunlight," and that will be hailed as the most marvellous discovery of modern times. But it will be but a rediscovery. The Peruvians had the secret. For years scientists have been trying to track it, but without success.

The invention of ball-bearings revolutionized machinery, but the invention was not new. The axles of ancient carts had little rollers of hard wood, like sections of a pencil, to take the wear and cause easier turning.

What exactly is learned from the exhibits in museums is not trumpet on the world, but mixed with the visitors who merely go to look are others who go to study. A toilet article about to be put on the market is but an improved copy of a specimen, 3,000 years old, in a museum case. It came from an excavated tomb in Egypt.

FAIRYLAND IS BUILT WITH SMILES AND KIND DEEDS IN DAILY LIFE

Of Course It Was All a Dream, But to Betty the Visit of Silver Wings Seemed Wonderful

Betty knew that she had only to rub her eyes and she would be awake; yet, strangely enough, when she did try rubbing the fairy did not disappear. Instead the little creature seemed to stay right there on her knee, and to be motioning to her with a little silver wand.

The little girl had curled up in a cosy chair after supper, and it was when she laid down a book about the fairies that she felt a light touch on her knee; and there stood a real fairy!

The little girl gazed fascinated by the sight. The fairy was not quite two inches tall, and was dressed in silver from head to toe. Two little wings fluttered at her back, much like Betty had noticed on the quick darting humming birds that used to hover over the flower boxes in Summer. The wand was a tiny affair, too, but, small as it was, it seemed to sparkle and flash with light as the fairy waved it to and fro before the astonished eyes of the little girl.

When she was really convinced it was a fairy, the little girl was quite concerned, for, to tell the truth, she had not been so good that day as she could have been. There had been things her Mother wanted her to do that remained undone. There had been messages to run and chores to accomplish that had only got themselves done with tardy steps and a very lagging grace. Why had the fairy come to her wondering the little girl.

The fairy did not leave her long in doubt. Afterwards Betty could not tell how it happened, but it must have been the magic wand, for all at once she found that she could understand what the fairy was saying. The conversation that followed left no doubt in her mind as to what she was to do.

"The fairies would like you to visit them at their home in the woods," said the little messenger with the silver wings.

"Oh, are you really and truly a fairy, and may I go with you now?" asked Betty, round eyed and wondering.

For answer the fairy nodded, smiling, and touched Betty with her wand. It must have been a magic wand, for Betty found herself growing smaller and smaller, until the chair in which she sat looked like a huge mountain. The fairy was now the same size as the girl.

Taking Betty by the hand the fairy flew up into the air, and the little girl found herself flying along beside her companion without effort. Out through the living-room, and across the garden flew the two creatures, Silver Wings leading the way.

It was a wonderful experience. Flowers now looked as big to her as houses had done before. A tree that she well remembered by the garden gate seemed like an immense expanse of red and glossy field. She could even see other fairies sitting on the petals, and these waved to her as they flew on and on into the woods.

So it has all been a dream, she mused; yet there were some parts of the dream that seemed too real to have been imagined. Dream or not, Betty next day was the biggest help her Mother ever had, and strange to say, she found more fun in that than anyone could ever have suspected who has not tried the plan.

KIDDIES AND COSTUMES

Two young celebrities these, vacationing at the beach. In her striped bathing suit is little Jewell Davis, daughter of the United States Secretary of Labor and Mrs. Davis. Below is Tommy Milton Jr., son of the retired auto racing driver.

EATS UP MILES

PAULINE ELIZABETH JOHNSON of Rocky Mount, is only seven years old but she can run two miles in 27 minutes 45 seconds. The girl is ambitious to become a marathon star some day, and before she was five years old had run two miles every morning.

Communists Rebuffed; Tendency Now Towards Industrial Peace

Reuter's Special to The Victoria Times
London, Oct. 1.—There was a time just after the war when the Trades Union Congress claimed to be as important a body as the House of Commons, and there was a good deal of loose talk about the shifting of the balance of power from Westminster to whatever place might be chosen for the meeting of the Congress.

Nothing is now heard of any such suggestion, and the Trades Union Congress is now a very ordinary affair, although it affords very interesting indications of the trend of labor opinion.

The Congress can never be a definite authority in labor matters owing to the absurd system of card voting. Resolutions are passed, or rejected, by millions of votes but that merely means that the delegate from a union attends the Congress with so many votes in his pocket, and these votes which he hands in are formally registered as the opinions of so many voters in his union.

At the meetings immediately after the war the miners were the predominant influence. So dominating, in fact, that an aggrieved trades unionist sang out from the back of the hall on one occasion, "There's too much miner about this show." All that now is changing, and possibly the union which occupies the commanding position to-day is the N.U.R.

On the whole, this recent meeting is making for peace in industry. The minority movements and the Communists have received a severe rebuff, and it is becoming more and more evident that the average British trades unionist is much more concerned with the affairs of his own union than with any of the international affiliations.

As one of the delegates said, "It is more than likely that when some far-sighted apostle of international action has been holding forth to a British trade unionist on the advantages which would accrue, he would be met with the awkward question, 'What are the funeral benefits of the Third International?'"

Mr. Baldwin has been vigorously denounced, but all the same, the president of the Congress seemed inclined to give practical effect to some of the suggestions thrown out by the Prime Minister.

FAMED 'OLD VIC' BEING RESTORED AFTER 100 YEARS

Reuter's Special to The Victoria Times
London, Oct. 1.—Reconstruction of the "Old Vic" Theatre has turned out to be a bigger job than was anticipated. It cannot be completed before December, and the management are doubtful whether there will be any possibility of staging plays there before the Christmas production.

The famous old building in the Waterloo Bridge Road has been standing for over a century, at least so far as the outer walls are concerned, and when the workmen got busy they found what is now generally found in London buildings of much age—the mortar between the bricks had perished. This makes necessary reconstruction of the outer walls as well as the interior.

Since the weakness existed it is well that it has been discovered in good time, but the expansion of the reconstruction seems to mean that the "Old Vic" will retain very little of its former characteristics, and it remains to be seen whether the old traditions which flourished as well in a new shell as they did in a shell where the shabbiness and inconveniences gave them a curious nourishment.

The players of the "Old Vic" just now are keeping themselves fresh by giving performances at various suburban theatres. When the time for reopening their home arrives they will be very fully occupied, because plans for the immediate future are concerned entirely with dramatic plays, and opera is to be omitted.

This is not quite what one has been taught to expect at the "Old Vic," but it accords with a policy deliberately thought out.

Meanwhile at the Elephant and Castle Theatre, crowded audience, both local and from the West End, are being drawn by real old-fashioned melodrama, and once again "Maria Martin or the Murder in the Red Barn" and her untimely end are thrilling people who thought that melodrama was dead.

Play Censor Tells of Tennyson's Joke

Reuter's Special to The Victoria Times
London, Oct. 1.—A good story is told by the late Charles Brookfield, a former censor of plays, and well-known actor, in his "Reminiscences" published here.

"My father," he said, "was dining with Tennyson at the Oxford and Cambridge Club in Pall Mall. After the meal the poet insisted on putting his feet on the table and tilting his chair back.

"You're making yourself a laughing stock," said his host. "Oh, I'm quite comfortable," Tennyson remarked. "Alfred," urged my father, "people will think you are Longfellow." Down went the feet.

The Free State's Big Three

Ringleaders in Irish politics, these. They are the geniuses of three Free State factions battling for control of the Dail and, through the Dail, of the Irish presidency. At the upper left is W. T. Cosgrave, the president's incumbent. At the right is Thomas Johnson, whom the Laborites would install in Cosgrave's post. At the lower left is Eamon de Valera, who heads the Fianna Fail party, also opposed to the present regime.

THE WAY YOU LOOK AT IT DEPENDS ON WHAT YOU HAVE

By MILTON BRONNER

London, Oct. 1.—Those of us who attended the first assembly of the League of Nations well remember that M. Tittoni, head of the Italian delegation, was always yammering that countries like Britain, United States, Germany and France had control of most of the raw materials of the earth.

His thesis was that these should not belong to those nations, but held in trust for all. In other words the title of his theme was—

AN ANCIENT TALE

"Italy without raw materials!" This much of a preface is necessary for a new variation of an old and favorite European story. A rich man, fond of science, offered a big prize to the person who would write the best book about elephants.

An Englishman, with the sporting proclivities of his race, organized a big expedition and spent a year hunting elephants both in the African and Indian jungles. When he returned he wrote a book about the habitat of the elephants and told just how to hunt them.

94,000,000 MICE AND RATS COST BRITAIN £100,000,000 ANNUALLY

Reuter's Special to The Victoria Times

London, Oct. 1.—Estimates of the ravages of insect and other pests put the cost to this country at about £125,000,000. Rats and mice between them account for £100,000,000 of this sum.

Slums are such prolific breeding grounds for vermin that it would pay the country to burn down all slum areas and build new houses for the inhabitants.

These striking facts were mentioned by A. Moore Hogarth, chairman of the College of Pestology, which has just celebrated its twentieth anniversary.

In connection with this celebration, a pestology exhibition and conference is to be held in London. Sir Ronald Ross will perform the opening ceremony, and many famous medical and scientific men and women will take part in the proceedings.

"The men in the street are only just beginning to realize the vast scale on which the insect world wages war on mankind," declared Moore Hogarth.

Scoring Criticized In County Cricket

Reuter's Special to The Victoria Times

London, Oct. 1.—The close of the cricket season has given rise to criticism of the method of awarding points in the County Championship competition. Under the present rules it would appear that eleven out of "brighter" cricket by taking sporting chances are severely penalized, while teams playing a "safe" game get the rewards. The chief grievance is that the number of points given for a victory on the first innings is too high.

them. It was not very literary, but it was a workmanlike volume.

A Frenchman went out to the Paris zoo, watched the elephants for a few minutes, spoke to the keeper for about a quarter of an hour and then wrote in beautiful and melodious French a book on "The Manners and Morals of Elephants."

THE GERMAN WAY

A German spent his entire year in his library reading everything that had ever been written about the elephant. At the end of that time he produced the first of what were to be five volumes on "The Psychology of Elephants."

A Pole thought a few minutes and then sat down and produced a book on "The Elephant and the Polish Question."

But the Italian did not have to take time to think at all. He knew perfectly well what his country's grievances were. All the jungle countries where elephants live at large belong either to Great Britain or France. Hence his thrilling book—

"Italy Without Elephants!"

DARWIN'S HOME TO BE SAVED AS NATIONAL SHRINE

Reuter's Special to The Victoria Times
London, Oct. 1.—Sir Arthur Keith, an announcement that the British Association is about to initiate a fund to purchase Darwin's house as a shrine for the nation is cordially welcomed in London, and has given the liveliest satisfaction to the great scientist's descendants.

A Darwin, the great-grandson, still lives with his father in the neighborhood of the ancestral home at Down, and expressed his delight when he heard of the project. Down House, which is now used as a school, is but little changed since Charles Darwin's days, though the neighborhood has undergone some expansion.

It was in the autumn of 1842 that Darwin moved into Kent, and settled at the little village of Down—the rural retreat that was destined to be his home for a period of forty years. He described the village as "a place where newcomers are seldom seen, and where the names occurring in the old church registers are still borne by the villagers."

When Darwin went to Down to escape the strain of London life the village contained only a few hundred inhabitants. It lies in a retired spot between the main roads to Westerham and Sevenoaks, to the north of the great chalk escarpment above the Weald.

"Its chief merit," he wrote to his cousin, W. D. Fox, "is its extreme rurality. I think I never was in a more perfectly quiet country."

From the very first Darwin regarded it as his settled home for life. The

PRINCE TO MOVE INTO NEW HOME IN NOVEMBER

Historic Marlborough House to be His Quarters; Sentries to be Posted

Heir Appears as Movie Star in Patriotic Film to Aid Disabled Soldiers

Reuter's Special to The Victoria Times
London, Oct. 1.—The Prince of Wales will not occupy Marlborough House until November, and, when he does move the 200 or 300 yards further east, he will do so with a good deal of reluctance. He has grown very fond of "York House." It has been quite large enough for his bachelor parties, and the cost of its maintenance is not half what is involved in the upkeep of Marlborough House, which was King Edward's home from his marriage in 1902 to 1902, and in which his grandchildren used to play from that date until 1910.

RELIEF SENTRIES

Although an infantry of the line regiment is doing relief sentry at Buckingham Palace, the Guards are still in possession of St. James's Palace, the King's official address. Marlborough House is still without sentries, but preparation for their return are being made in the new coats of paint on the boxes flanking the gates. As a royal residence it ought—according to the strict letter of custom—to have perpetual sentries. But after Queen Alexandra's death, Marlborough House was left untenanted, and the King saw no reason why a house without a resident should be treated as though it was occupied, and, so after sixty-two years of regular duty, the guard was withdrawn. It will not be reformed until the Prince goes to live at Marlborough House.

A PATRIOTIC FILM

"Remembrance," a new British film presents the most distinguished cast yet seen in any theatre. The Prince of Wales is the star. He appears in the act of writing a letter to Earl Haig, hoping that the next Poppy Day will break all records. The Prince submitted to the indignity of make-up for this picture, and called Colonel Crossfield to see the result. His Royal Highness was apparently not too sure about the result, because he invited Colonel Crossfield to make up also and play in support. Colonel Crossfield, however, successfully begged off, saying that the presence of the Prince in this picture would in itself be worth £2,000 on the result.

HELPING DISABLED MEN

It is a very fine thing to find the Prince of Wales giving his support to a picture which so eloquently as "Remembrance" shows the work being done for the disabled ex-servicemen. Earl Haig is seen receiving the letter written by the Prince of Wales.

There is also in "Remembrance" the most effective representation yet made of the Two Minutes' Silence on Armistice Day, and many other features which make this the most sincere of all war pictures yet made.

The cast includes Rex Davis, who, by his speeches to film audiences, has done more for British pictures than any other individual, and Frederick Cooper, who, like Rex Davis, won a Military Cross in the Great War. Air Goddard and Gladys Hamer, all proved cinema stars.

False Counter Trick of Peer Worked Again

Reuter's Special to The Victoria Times
London, Oct. 1.—A proposal to the appearance of forged counters at Ostend the Evening Standard is reminded that years ago a certain venerable and none too scrupulous marquis in the English peerage, long since dead, took, also to Ostend, £5,000 worth of forged counters.

In those days the Ostend counters were of two sorts, white and pink, with the initials of the Kurland worked on them in a sort of filigree work by no means easy to imitate. Lord brought to England one of each denomination—100fr., 1,000fr.

house was by no means picturesque—"Good, but very ugly," he said, "with a rather bleak garden"—but it was quiet and restful; and when in a few years the walls became mantled with creepers and the garden sheltered by banks of evergreen shrubbery, he thought it the sweetest place for his seclusion.

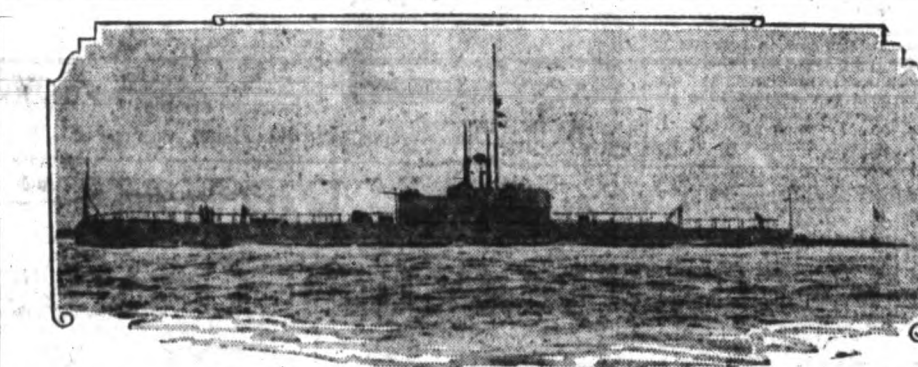

It was in his early days at Down he made the chief friendship of his life—that of Sir Joseph Hooker. Here he was often visited by Hooker, Sir Charles Lyell, Professor Ruxley, Dr. Asa Gray and other friends with whom he shared his ideas while working out his momentous work on the "Origin of Species," and subsequently "The Descent of Man."

ANOTHER ROYAL FAMILY

A remarkable study in royal faces is presented in this photo of the boy king Michael of Roumania and his mother and grandmother. They are sober faces save for a faint trace of a smile framed by Queen Marie's mourning veil (left). The mother, Princess Helen (right), appears anything but joyous over the high estate to which her son recently was raised. Michael's dad, Prince Carol, still is in Paris, an exile from the land he once expected to rule.

Great Britain's New War-dog of the Seas

This picture represents the newest note in submarine construction. It is a view of the recently completed British super-submarine Oberon, as it entered the harbor at Portsmouth, England.

Machine Guns Rattle, Troops March, Planes Soar, Along Quiet Countryside

Reuter's Special to The Victoria Times

London, Oct. 1.—Along the peaceful banks of the Thames between Reading and Oxford, and over ground rendered historic by the struggling factions which took part in the Civil War, masses of soldiers have again been contenting for supremacy.

Troops from the Aldershot command numbering upwards of 30,000 took possession of the famous battle areas of South Oxfordshire, Berkshire and Buckinghamshire, and from early morning until long after dusk winding leafy lanes have resounded with the clatter of horses' hoofs and the brisk step of infantry.

Across the open country lines of men in battle order swept forward to an objective, while near by tanks rattled and snorted and cavalry dashed forward in thrilling charges.

The realism of war has been further reproduced by the passing of aeroplanes on reconnaissance work and the rat-lap of machine guns disputing possession of some "vantage point."

A mere glance at the men engaged is sufficient to assure even the gloomiest of pessimists that the army to-day is all right. Well-built and healthy-looking, they were more than atone for any lack of campaigning experience by their keenness, and high military authorities are thoroughly justified in their confidence in the class of recruit flocking to the colors. It is an army of young soldiers most of whom have never seen active service, but an army that in a few months' time will compare favorably with their brave predecessors who stepped into the breach and stemmed the German onslaught.

The operations have formed but a preliminary to the more strenuous work to follow, when division opposes division, but, nevertheless, some interesting exercises have been carried out by individual units and brigades.

(plaques), and so forth had them copied, and took them back to Belgium. He bought at the Casino £100 worth of genuine counters as a piece of "window dressing," pointed about for an hour or so, cashed in the lot, real and false, and returned to England by the next boat. He was wise enough not to repeat the proceeding.

Family Holidays In Aeroplane Taxi
Reuter's Special to The Victoria Times
London, Oct. 1.—In an aeroplane taxi and a motor-car a London business man and his family have just completed a novel holiday. Their "taxi-man" was Lord Ossulston, eldest son and heir of the Earl of Tankerville.

With his Moth aeroplane, which he hires out at £5. 2d. a mile, he picked up his fare first at Glenageary. "I landed on a field quite close to Glenageary Hotel," he said, "and started on a tour during which I have covered about 900 miles. The father, daughter and son took it in turns to travel either with me in the aeroplane or in the motor-car in which they traveled north. And there was keen competition among them to be in the aeroplane."

Berwick, Catterick, Sheffield, Maidenhead and Ascot were among the places visited, and in every case the aeroplane landed near where the fare wished to go.

KING AND QUEEN ENJOY FLOWERS IN THE NORTH

Balmoral Gardens are in Fullness For Late September Holiday

Duke and Duchess of York Shoot and Fish With Relatives at Speyside

Reuter's Special to The Victoria Times
London, Oct. 1.—As is the case in other Highland sporting estates, the gardens at Balmoral are arranged to be in fullness of glory during September, and the King and Queen have been enjoying a second summer.

Things flower very much later in the North, and there are summer blooms, as well as those of early autumn, in the royal gardens now. The Queen spends a good deal of time there and holds serious conferences with the head gardener, who is one of the most competent of his nation, and Scottish gardeners are the best in the world.

In the same way, vegetables and fruit at their Majesties' Deeside home are cared for and regulated so that they will be at their best and most plentiful throughout September. The staff kept at Balmoral in the absence of the King and Queen is comparatively small.

Speyside, where the Duke and Duchess of York have been spending a few days with the latter's brother-in-law and sister, Lord and Lady Eipinstone, for shooting and fishing, is seeing royal visitors for the first time since pre-war days.

King Edward had an especially warm corner in his heart for Strathpey, and used to enjoy nothing better than the holiday he took annually with Mr. and Mrs. Arthur Basson at Tulchan Lodge. His most favored friends used to be invited and life went very well indeed, for Mrs. Arthur Basson, a handsome and charming hostess, knew, none better, how to provide the right environment for her illustrious guest.

The hostess at Pitlochry Lodge, Lady Eipinstone, is eldest child of the Earl and Countess of Strathmore, and a slender, pretty woman, with the same bright happy vivaciousness of expression that marks so potent an appeal in the case of her youngest sister. Her delicacy of appearance unfortunately means corresponding delicacy of health and of recent days she has not played much active part in social life.

Swearing Under Ban At Archery Contest Like Ye Olden Days

Reuter's Special to The Victoria Times
London, Oct. 1.—Wearing plus-fours or white tennis flannels that would have puzzled Robin Hood, a group of North Lancashire sportsmen took part in the 24th annual competition for "The Ancient Scorton Arrow," the oldest archery contest in England, which dates from the year 1673.

This year the contest was brought for the first time from Yorkshire, where it has always been held, into Lancashire. Using bows made of yew wood and hemp string, the archers shot their arrows a distance of 100 yards across a field at targets with bright gold centres.

With his eleventh arrow Colonel J. A. Turner, of Overton, a member of the North Lancashire and John O'Gaunt club, won the chief trophy, "The Ancient Scorton Arrow," which is so called because it was the prize shot for every year by the archers who met at Scorton, in the West Riding of Yorkshire.

The trophy was given by Roger Ascham, Queen Elizabeth's tutor in Latin and Greek, for competition among the archers of his birthplace, Kirby Wiske.

A series of archers on May 14, 1673, agreed at Scorton upon articles "for the regulating of the annual exercise of shooting at targets for a silver arrow." One of the articles quaintly provides that any archer heard to "curse or swear in the hearing of the company" should pay a fine of a shilling "proportionately for every oath."

Arthur Hardy, of Bishop's Waltham, Hampshire, and a member of the John O'Gaunt (Lancaster) bowmen, won the silver bugle—a blast on which summoned the archers to their sport—for the second best shot. One of the archers was Sir Laurence Sanderson, of Lancaster, who tells us that bow-and-arrow shooting, so far from declining, has strengthened its hold in the North since the war.

bed think it not inconsistent with the reputation of the British Army to restrain their men from desecrating the countryside with litter? After two days the sight is dreadful, and where halls have taken place cigarette wrappers and greasy paper evidence a want of discipline and self-respect. What will our lanes be like in three weeks' time, and are these fine young fellows being trained as soldiers and citizens?

It is worth recalling that, during the war, troops in training were given very explicit instructions on the subject of clearing up their litter after them, and a good many commanding officers were vividly insistent on those instructions being carried out.

WANT A PET? HERE ARE IDEAS FOR NEW ONES

Reuter's Special to The Victoria Times
London, Oct. 1.—Quaint pets that can be kept in a London flat are shown at the first exhibition of the British Aquarists Association at the Chelsea Polytechnic, S.W.

Anyone with a small heated conservatory may keep a six foot python in a small cage with comfort, or a family of baby alligators, lizards, chameleons, bull-frogs, balloon frogs or other strange pets that might find a place in a flat.

One of the exhibits that attracted most attention was the Gecko, a small lizard about four inches in length which was found in a crate of bananas at a West End store. Its present owner explained that the Gecko is a nocturnal animal, with pads on its feet that enable it to stick wherever it pleases. It is especially fond of bananas.

SOME QUEER FISH

Queer fish on show include the "bubble" fishes that build bubble-nurseries for the breeding of their young, but are too shy to do it in public; and the "mouthbreeders," who carry not only their eggs but the small fry in their mouths, ejecting them from time to time to take a swim round. The "Millions" fish, so-called because of their numbers, eat the larvae of mosquitoes, and were on that account transferred in large quantities to Greece.

Twenty thousand aquatic plants have been loaned to furnish these quarters, which contained 30,000 gallons of water and eight hundredweight of shingle.

Agony Column Wails As Manoeuvre Troops Litter Countryside

Reuter's Special to The Victoria Times
London, Oct. 1.—The Autumn manoeuvres have evoked this appeal in an agony column: "Would the officers and gentlemen in charge of the troops around Nettle-

Fall Brings Back the "Wear-like-iron" Serge

Durability Of Its Heavier Weave Recalls Stout Cloths Of Old

For those given to stoutness—the two-button, single-breasted blue serge.

Here's the three-button, double-breasted serge—best for slim chaps

By CURTIS WOOD

Whenever and wherever men gather to talk over the latest fashions in haberdashery, the cut of the new club member's suit and the price of putty or prunes in Peru you hear an old-timer orate about the "good old days."

Back in the good old days, it seems, these gents wore a suit, "and a darn good one, too" for high onto seven years or more without any parts replacement or the addition of sundry accessories.

But there is more than a passing fancy in the belief that suits did wear longer years ago than they do now. The answer lies in the weight of the cloth.

BACK AGAIN

This writer has acquired this knowledge simultaneously with the news that the old seventeen-ounce serge is once again on the market.

The old blue serge suit wore "like iron" chiefly because there was greater body and more substantialness to the cloth. The nearest approach to this

is the seventeen-ounce blue serge. Park Avenue these hazy Fall afternoons is dotted here and there with a blue serge set off by a white or blue polka dot breast handkerchief, which, if you ask this writer, is a mighty hard combination to beat for all-around wear.

Blue serge looks good on almost everybody. It is a "dressy" bit of tailoring and is ideal for semi-formal as well as business wear.

A good heavy blue serge suit ought to be in every man's wardrobe.

There are three outstanding models for the 1927 Fall wear that you can select for your own personal requirements.

If you are at all stout select the single-breasted, two-button model with flowing lines, wide pockets, a high breast pocket and full trousers.

THEY'RE ALL CUFFLESS

None of the models have cuffs this season.

If you do not particularly care for this type and wish to go more for the

English trend there is a three-button sack coat, high button effect, with smaller lapels. This though will look well only on young business men or collegiates.

If you are a trifle slim you can carry well the new double-breasted six-button model. Two of the lower buttons only are used and the only caution one must remember is to have the trousers full enough as a small trouser leg will spoil the entire ensemble in this layout.

BLACK SHOES, NOT TAN

An added tip: Black Oxfords somehow always look better with blue serge than tan and you cannot beat a pearl grey hat to set off the whole outfit.

There is a mistaken impression that a keynote of blue if carried all the way down the line is harmonious, such as a blue shirt, blue tie, blue cuff links, blue socks and so on. Somehow the combinations fail to "click." A tasteful contrast is to be preferred.

Household Hints

Mottled Walls

A novel way to treat the walls of the work room or study is to paint them with a sponge. It gives a pleasing mottled effect.

Careful Drainage

All drainage pipes should be cared for scrupulously in summer. The ice box pipe, the toilet and sink should all be washed weekly with lye.

Gingham Spreads

Taffeta spreads, curtains and chair cushions, replaced by inexpensive gingham for summer time, will change a room delightfully and will make it easier to keep clean.

Morning Sunlight

If your bedroom faces east and the

early morning light wakes you too early, a second shade of black sateen, removable in the daytime, will suffice to protect you. Of course awnings are a good investment.

Fruit Tarts

Pie crust, baked lightly over the bottom of muffin tins, filled first with a little custard, then any kind of fresh fruit, covered with sugar and baked ten minutes, makes delectable tarts.

Lindberg Dressing

A new Lindbergh salad dressing features a decided flavor of mint, secured by adding powdered mint leaves to French dressing made with lemon.

Raw Vegetables

Finely shredded carrots, small diced cucumbers, chopped cabbage and a bit of Bermuda onion make an unusual salad when served with French dressing with a dash of Roquefort cheese.

Radio's Music Makers

The opera, at first a laughing stock, became elevated into the supreme form of artistic expression which it is today through the mastery of Christoph Willibald Gluck, Viennese composer who lived from 1714 to 1787. But it took Gluck more than thirty years to awaken to this change. Starting early as a musical prodigy of an Austrian noble, he developed unusual talent on several instruments. At one time he earned a living by playing at popular dances, but he soon was sent to Italy where for twenty years he composed Italian operas. He awoke, however, to the finer influence of Rameau and Handel and soon adopted the prettier and more emotional type of opera for which he afterward became famous. Through him, thereafter, the overture became part of the opera itself, the actors no longer appeared and sang apart from the entire piece, and the orchestra lent its tones to help express the emotions of the actors. Some of Gluck's works even to-day stand out as masterpieces, comparable with those of Beethoven, Wagner and others.

South Coast Islands Treasured by Rich As Little Kingdoms

Reuter's Special to The Victoria Times

London, Oct. 1.—Brownsea Island which has just been sold to a lady for £125,000, is the latest deal in one of the little "kingdoms" which swarm round our coasts. There are many of these miniature realms, and practically all are inhabited and ruled over by some person of rank or wealth—monarchs of all they survey.

Situated in Poole Harbor, the possessor of two beautiful little lakes, an historical castle, and a panorama of infinite beauty—Brownsea Island is one of the most coveted marine properties off the South Coast. Prior to the Norman Conquest the island was in possession of Cerne Abbey, founded by St. Augustine in the sixth century. At one time, it was also occupied by the Romans, who left behind them many interesting remains, including a well-preserved Roman bath. During the sixteenth and seventeenth centuries it was a favorite resort of smugglers and pirates, traces of whom are still to be seen in the many underground passages and caves spread over the island.

Jethou Island, the beautiful home of Compton Mackenzie, is one of the prettiest of the Channel Islands. Masses of sub-tropical flowers bloom there the greater part of the year, which, together with its charming sylvan scenery, makes it a charming hermitage. Even in the winter, when intercourse with the mainland is often impossible for days on end, its wildness and grandeur are of unsurpassing beauty.

One of the most romantic of these islands is Lundy Island, in the Bristol Channel, which, for many years, was governed by the autocratic Rev. Hudson Cross, who died some years ago at the age of ninety. Like Brownsea Island, it has been the favorite rendezvous of pirates and smugglers, who used to bury their plunder there.

Shoe Shelves

If pressed for room, paint a crate, turn on end, put at one side of closet and you will have an ideal double shelf for shoes.

Green corn, cut from the cob, green peppers and celery, makes a delicious salad served with mayonnaise, with cheese grated over the top.

Feathered Facts and Fancies

CEDAR WAXWING.

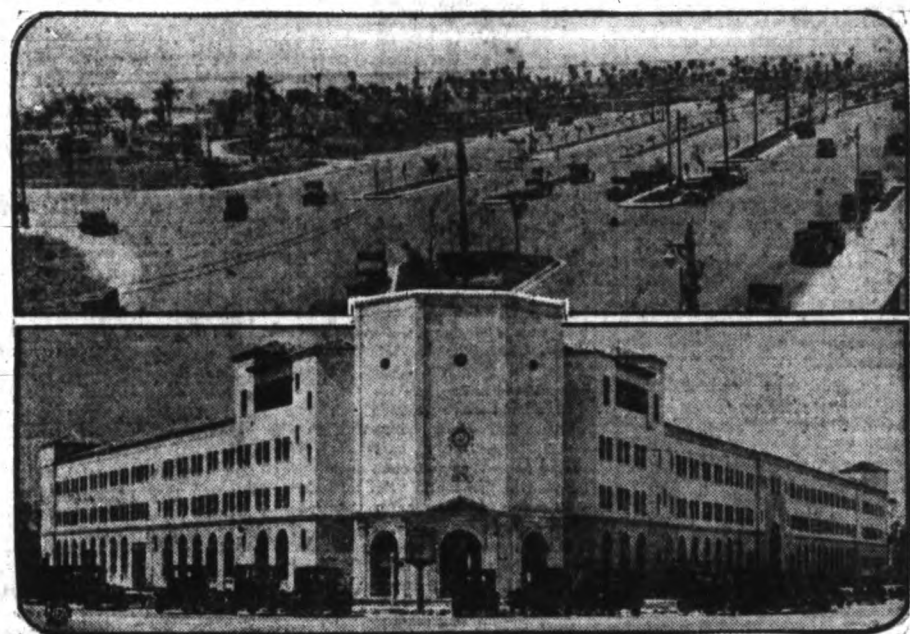

LENGTH 7 TO 8 INCHES. UPPER PARTS RICH GRAYISH BROWN, WITH PLUM-COLORED TINTS SHOWING THROUGH ON CREST, THROAT, WINGS, BREAST, AND TAIL. BLACK LINE THROUGH EYE AND BACK OF CREST. BRILLIANT RED WAX-LIKE TIPS ON SECONDARIES. TIP OF TAIL YELLOW.

INSTEAD OF CROUCHING TO MAKE HIMSELF INCONSPICUOUS WHEN APPROACHED, THE WAXWING STRAIGHTENS UP STIFF, AND RIGID, THEREBY RESEMBLING A SHORT LIMB OR KNOT ON THE TREE. AT THE RIGHT YOU SEE A PICTURE OF EITHER A CEDAR WAXWING OR A KNOT. WE AREN'T SURE WHICH. IT EITHER IS OR IT'S NOT.

Miami Does Heroic Comeback; A Year After Finds All Hurricane Signs Erased

A portion of Miami's \$8,000,000 Biscayne Boulevard, now completed, is shown in the upper photo. It's one of the world's finest streets. Below is one of the first buildings of the new University of Miami.

Miami, Fla., Oct. 1.—Florida's pride, Miami, has lived down the hurricane which flattened much of the city just a year ago this month.

September 18 last year, Miami reeled under the worst tropical storm that ever swept down this part of the Atlantic Coast. In its wake the storm left a wide swath of destruction.

To-day all traces of the damage have disappeared. Beauty spots, fine buildings and public improvements are in evidence that before the hurricane were not to be seen.

The collapse of the Florida boom came along with the storm, but Miami has lived that down, too. The first thing Miami did after the hurricane was clean up. Then it hastily got ready for the winter tourist season.

son, which brought "business as usual." The newest University of Miami, established as a seat of intellectual exchange between the United States and Latin America, as well as a general culture center, opened on time.

Work on the magnificent Biscayne Boulevard, the city's most pretentious thoroughfare, went right ahead to completion. This included cutting through thirty-three business and residential blocks. Royal palms now are being planted its entire length.

A causeway costing \$680,000 is being built to connect the boulevard with the northern end of Miami Beach, across Biscayne Bay.

A census revealed that Miami now has a permanent population of 131,286. In 1900 the population was 1,600, and in 1910 it was only 15,592.

Among the municipal improvements this year are forty-three miles of new paving, new sewers, and a bridge across the Miami River at Twelfth Street.

Harbor improvements and the building of a twenty-eight story county courthouse and municipal building are under way. The Tamiami trail to Tampa, which was begun in 1913 but delayed because of the war, is being improved at a cost exceeding \$14,000,000.

Miami expects to protect from overflows an area of more than a thousand acres of Everglades immediately adjacent. Dykes encircling this expanse are almost completed. The development of this fertile territory together with Miami's extensive port facilities is expected to create much future activity.

A Chart to Measure the Normal Child's Health Behavior

By DR. MORRIS FISHER

Editor Journal of the American Medical Association and of Hygiene, the Health Magazine.

Dr. Thomas D. Wood, professor of health education in the Teachers College of Columbia University, and Marion Lerrigo have developed a scale for determining whether the behavior of a child in relation to its health is normal and similar to the behavior of other children of its age.

The scales also permit a decision relative to the child's success in health understanding from year to year. Safety habits should naturally have been established by the time boys and girls have completed the sixth grade. Cer-

tainly the child should understand early in life the importance of sleep and rest, of proper diet, of fresh air and sunshine, of cleanliness, of the care of the teeth, the ears and the eyes.

As a child grows older, it will have to consider the problems of temperance in relation to stimulants of all kinds and perhaps learn something about first-aid and home nursing. In developing these functions in the child, both the school and the home will have a significant part.

The distinguished educators feel that a child should, before it enters kindergarten, have learned to drink a quart of milk daily in addition to other foods, to drink water several times daily, to eat at regular times, to eat slowly and chew food well, to wash the hands before eating, to use only an individual drinking cup or bubbling fountain, and not to exchange food with other children, or eat it after picking it up from the ground, the floor, or the street.

It should expect to eat what is set before it without fussing, and to expect to have set before it only the

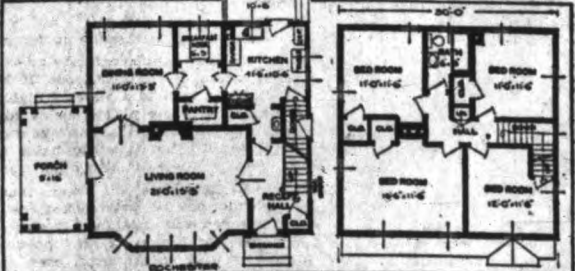

things that are known as good foods for children.

A healthful child knows at this time how to play with other children and is willing to take turns in games of all kinds. It can stand erect, sit straight, use the feet alternately in going up and down stairs, throw and catch a ball, lift, carry or pile blocks, carry a small pail of water without spilling, and play happily. It should not be afraid to sleep in the dark and should know the importance of having the windows open.

If its mentality is right, it will be relatively obedient to its parents, attend to its bodily functions without undue curiosity or hesitancy and be considerate toward babies, pets and weaker living things. It will have enough of a vocabulary to express its needs.

Dark Floors. If you prefer dark to light hardwood floors, instead of varnishing stain the bare boards a dark tone and when thoroughly dry wax without varnishing.

AN IDEAL HOME FOR CHILDREN

Taking its cue from "the city of homes" for which it was named, "The Rochester" is eminently the kind of a house that parents like for rearing their children.

In the first place there is something inescapably homelike about a white house with green roof and blinds. Witness the President's home, the original "White House." In the second place, there is something friendly about a sunny bay window in the living-room and a porch opening off this "room of rooms."

"The Rochester" has all these. In addition, it features a kitchen arrangement designed to keep home-making an interesting and not too tiring a task. There's a cozy breakfast nook looking out into a green back yard, a pantry large enough to roll out cookies and make Thanksgiving pies at the same time, a kitchen cabinet for utensils and supplies and a nice back porch for rest when the work's done or the pie is baking.

Pleasing, too, is the central hall between the bedroom upstairs. And almost best of all is the big, airy attic that can do triple duty—as store room, children's play room and mother's sewing and general work room. The cost of "The Rochester" runs from \$6,500 to \$7,250, according to locality.

SHE RIDES TO ADVENTURE ON BRIDLE BYWAYS

Mlle. Dorange, France's "Most Beautiful Equestrienne," Finds Flying "Wearisome"

By MINOTT SAUNDERS

Paris, Oct. 1.—In these days when many adventurous women are taking to the air for thrills, Mlle. Dorange, known as the "most beautiful horsewoman in France," prefers to go back to the good old days. She finds her adventure galloping along lonely roads.

FLYING WEARISOME

"Flying is wearisome and motorizing is monotonous," she says. "I would rather ride a horse than do either. Riding provides plenty of action and romance if you only go after them. I like roaming about, taking long rides across country in the good old way."

Mlle. Dorange has just completed a horseback ride from Paris to Berlin. She made the entire journey alone with her thoroughbred Arab steed, La Huppe, in what she describes as leisurely laps of from twenty-five to forty miles a day. Her route took her through Spa, Brussels and The Hague.

ANOTHER "WE"

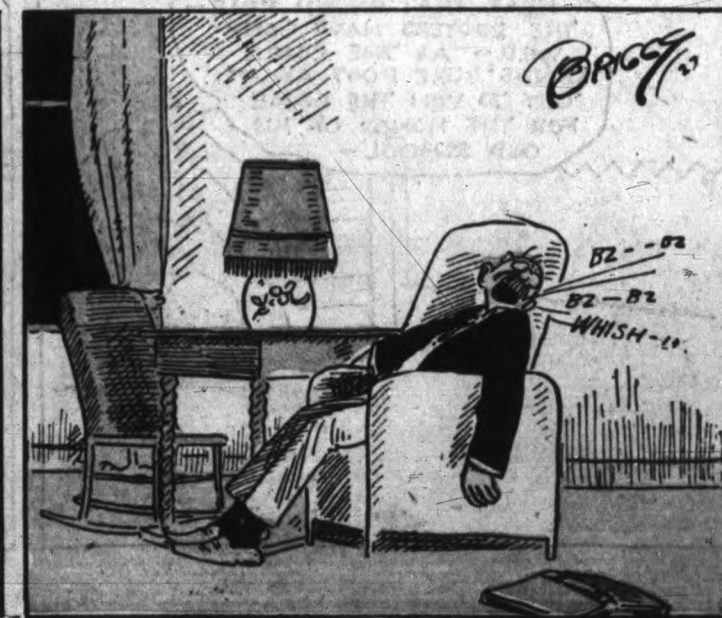

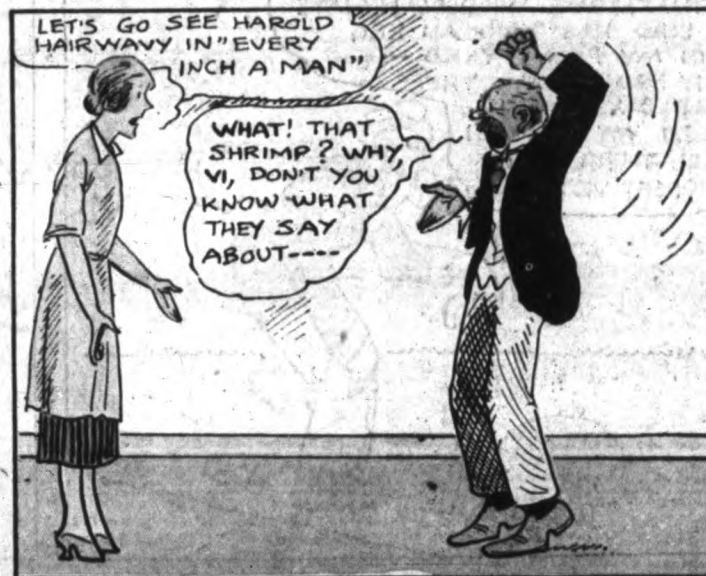

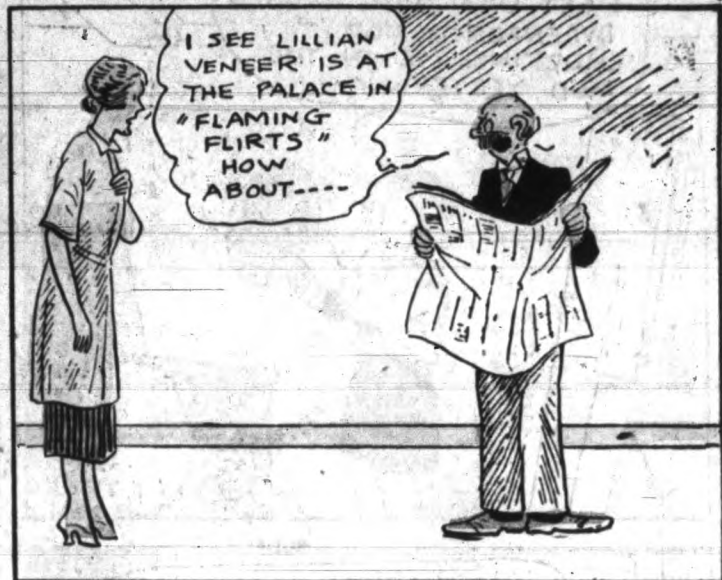

Mlle. Dorange uses the Lindbergh "we," saying, "We just jogged along as we pleased, stopped where we wished and were blissfully happy together in the open country with the beauty and fragrance of nature."

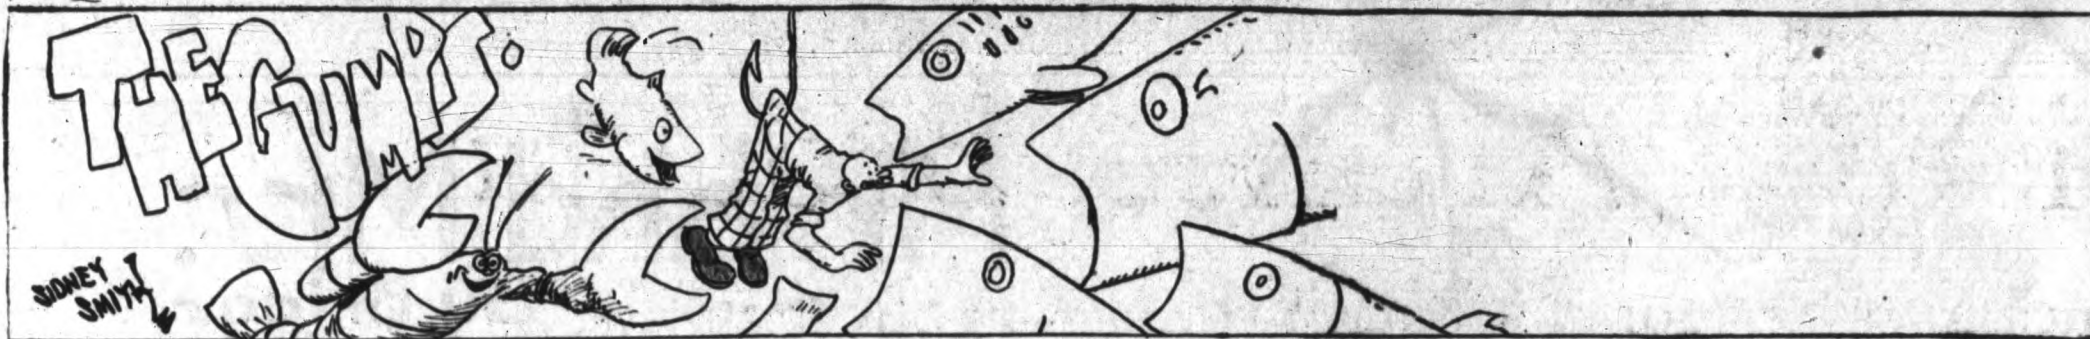

The fair rider carried the smallest possible amount of luggage, but this included an evening robe and slippers, a complete toilet set, and a revolver. With her chic riding clothes, derby hat and jeweled stick, she appeared and carried herself as much the thoroughbred as La Huppe. She is now planning other long journeys, and she insists upon making them alone. She doesn't want any spirited knight with her.

Mlle. Dorange, en route on "La Huppe" from Paris to Berlin, receives the well-wishes of a passerby

VICTORIA, B.C. SATURDAY, OCTOBER 1, 1927

WELL, HERE'S WHERE I GET EVEN WITH HAROLD DYRENFORTH FOR CHUCKING ME IN THE MUD YESTERDAY -

HE SAYS HE CAN KICK A FOOT BALL FARTHER THAN ANY BOY ON OUR STREET -

I'LL GIVE HIM A CHANCE TO PROVE IT - WE'LL SEE HOW FAR HE CAN KICK A HUNDRED POUNDS OF CEMENT -

GOLLY! I CAN HARDLY CARRY IT TEN FEET, LET ALONE KICK IT - HE'LL DO ALL OF HIS KICKING AFTER HIS FOOT HITS THIS -

I'LL LET IT SET THERE AND TOMORROW WHEN IT'S GOOD AND HARD I'LL INVITE HIM OVER AND BET HIM I CAN KICK IT FARTHER THAN HE CAN - AND LET HIM KICK IT FIRST -

CHESTER! IT'S YOUR BED TIME

The golden sun slowly sinks into a sea of molten gold - Twilight creeps over the hills and spreads its sable wings over a sleeping world - The harvest moon sails majestically across the star sprinkled sky - Soon a rosy flush mantles the eastern skies - The sleepy birds awaken and fill the morn with joyous music - As our hero steps out the front door into a happy sun kissed world -

WHAT A WONDERFUL DAY - THE AIR FEELS SO GOOD SOME ONE OUGHT TO GATHER IT UP AND SELL IT FOR A DOLLAR A BOTTLE -

WHAT DO YOU KNOW ABOUT THAT! SOME WILD COLLEGIATE BIRD HAS LAID AN EGG IN MY FRONT YARD - IT BRINGS BACK THE OLD DAYS WHEN I LED MY TEAM IN ALL THEIR HARD FOUGHT VICTORIES -

THE LAST QUARTER - TWO MINUTES TO GO - THE BALL IS ONLY THIRTY YARDS FROM THE GOAL - AND A WELL PLACED KICK WILL WIN FOR THE OLD SCHOOL -

HEAR THAT CROWD ROAR - THE ROOTERS HAVE GONE WILD - AS THE COACH SENDS SURE FOOT ANDY OUT TO WIN THE GAME FOR THE HONOR OF HIS OLD SCHOOL -

RAH! RAH! SIZZ BOOM! AH!

OH MIN!
